OUR GUARANTEE

BULLS

All bulls are guaranteed for up to three years from the date of sale. Every effort has been made to ensure our bulls leave Alpine in top working order. However should any Alpine or Welcome Swallow bull prove to be infertile or incapable of service we undertake to:

1. Replace the bull with one which all parties agree is a satisfactory substitute, or
2. Issue a refund equal to the purchase price less the salvage value and is calculated on the basis that the amount is reduced by one third for each year of service from the date of sale. The guarantee covers the purchase value of the bull, without interest, cost and damages. The guarantee shall apply providing the bull's incapacity is not caused by injury or disease contracted since leaving Alpine. A veterinary certificate must be supplied by the purchaser upon request. Alpine Angus is covering all guarantees from past Welcome Swallow sales.

Please contact Chris Oswin.

SALE INFORMATION

CATERING

Morning tea and a delicious beef lunch will be provided on Sale Day.

PRE SALE INSPECTION

Sale commences at 1pm Tuesday 7 March. Private inspections prior to sale day by appointment are welcomed. Bulls will be yarded for inspection by 10am on sale day.

OUTSIDE AGENT REBATE FOR BULL SALE

A 5% Rebate will be paid ONLY to those outside agents who ACCOMPANY buyers to the sale OR to those who INTRODUCE BUYERS IN WRITING 24 hours prior to the sale.

A 2% Rebate will be paid to Agents who handle the sale transaction only.

GST

All bulls are sold GST exclusive.

TRANSFER OF REGISTRATION

All bulls will be transferred on the Angus Australia Register. If you have an Angus Society prefix, please provide it when registering.

FREE FREIGHT & DELIVERY

The purchase price paid for bulls includes free delivery by Alpine Angus up to 250km by road from the Alpine Sales Complex. Please note delivery will take place within 2 weeks of sale day. Buyer co-operation in co-ordinating delivery is greatly appreciated.

Outside of this we will endeavour to assist in any way we can. If bulls are needed ASAP, please let us know.

OUR QUALITY ASSURANCE

All Sale bulls must complete the following before being deemed suitable to be offered for sale:

- A semen quality test.
- Independent structural assessment by Ian Moreland from Studcare Genetics (see page 5 for further details).
- Performance recorded HBR or APR with Angus Breedplan.
- 7 in 1 vaccination (2 initial and then annually).
- Vibrio vaccination (2 initial and then annually).
- Sale bulls drenched just prior to sale day – please refer to the NVD.
- Pestivirus earnotch test negative PI plus Pestiguard vaccination (2 initial and then annually).

GENETIC CONDITIONS

All Sale Bulls offered whose pedigree indicates a possibility of being a Carrier for AM, NH, CA or DD have been tested. The gene status is clearly marked next to the heading for each Lot.

We have worked hard to remove genetic defects from our herd and are now at a stage where only a few key performing females remain.

There are two carriers in the sale clearly marked, lots 58 and 60.

Lots 28, 42, 68, 97 and 99 have tests pending at time of catalogue printing.

WELCOME SWALLOW LINE BULLS

For those interested in accessing Welcome Swallow genetics, we have decided the easiest way to identify them is to add the letters WS into their name. Thus, any bulls bred from Welcome Swallow line females are clearly recognised by their name – ie lot 21 is 'Alpine WS Docklands L450'.

DISCLAIMER

Whilst all care and attention has been paid to accuracy in the compilation of this catalogue, neither the vendors, selling agents or representatives thereof assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this sale catalogue.

CONTACT

Please feel free to contact us, or our representatives for advice or assistance throughout the year.

ALPINE ANGUS 2017 AUTUMN BULL SALE

Alpine Manager Chris Oswin with Mark McPherson. Congratulations to long time clients the McPherson family, who on 6 January sold 180 weaner steers at the Wodonga Weaner Sale. Average weight 298 kg. Average price per kg \$4.16. Average price per head \$1240!

Our promise to our clients is to deliver

**VOLUME.
VALUE.
VELOCITY.**

The 2017 Alpine Autumn Bull Sale at the Alpine Selling Complex, 1138 Happy Valley Rd Rosewhite will see us offering 100 HBR and APR Angus Bulls bred by Alpine together with the pick of the Welcome Swallow genetics.

The current seasonal and market conditions being in such a great space places an even greater emphasis on using the right genetics to maximise profits. The 2017 Sale lineup offers large lines of the same genetics to enable bigger herds to maximise genetic consistency and to increase available choices for smaller producers.

We spend a lot of time travelling and researching the sirelines we use. We do our due-diligence to ensure sires are from dam and sirelines that are structurally sound and have good temperament as well as performing well on paper with their EBV's.

All of the bulls have been independently structurally assessed by Ian Moreland and good structure is a dominant feature of all of the sale lots, from the first to the last.

The bottom line for Beef producers is boosted when the number of live calves and the KG Beef per Hectare is maximised. This focuses us on calving ease and growth spread so we can add to the profitability of our clients' farming enterprises.

The genetics offered in this sale lineup consist of big lines of Coonamble Z3 bloodlines with 25 grandsons in the sale. Z3's son Texas Hold'em H126 has 10 sons. Hold'em is already a trait leader for Calving Ease and Gestation Length plus he also has an amazing birth to growth spread. His dam has produced multiple high performance stud sires.

TC Total bloodlines are also strongly represented with 25 grandsons. This lineup includes 10 high marbling grandsons by Total son Lawsons Novaks displaying great body, temperament and structure – a rare combination indeed. Novak's dam is now a donor at Alpine.

Other sires strongly represented in the offering include VAR Reserve, a widely used AI Sire as well as TenX and his son Deer Valley All In.

This sale also sees the first draft of Welcome Swallow ET calves purchased in utero by Alpine after the Welcome Swallow Dispersal in Spring 2015. We are excited to offer these calves – they are from the very core of the Welcome Swallow herd. The fact that both Alpine and the Swallow used Sires like Reserve and 10X reflects the strong synergy between our breeding strategies.

We are confident this sale will deliver great value to purchasers. All bulls sold are backed by our comprehensive QA program and After Sales Service which includes a 3-year guarantee and free delivery within 250 kms. We hope you can see that the Alpine Program is totally focused on delivering quality, value and friendly reliable service to our clients.

Jim and Suzy Martin, former Principals of the now dispersed Welcome Swallow Angus stud have continued their involvement with Alpine Angus. Says Suzy, 'Alpine now own a lot of our core genetics. Jim and I are excited to see how they develop our bloodlines. I have also been following up with past clients to ensure the bulls they have bought from us are working well. Although I have not got to everyone yet the feedback so far is so positive. Alpine share the same customer service and genetic focus and have taken over honouring the past Welcome Swallow bull sale guarantees. Working with Chris Oswin and Jim Delany over the past year has been a great experience and has made our exit from breeding seedstock easier for Jim and I and more importantly for our clients.'

We welcome all to come and see for themselves what the Alpine Angus program has to offer.

We look forward to seeing you on Sale Day!

All the best,
Jim Delany, Principal
Chris Oswin, Manager

THE ALPINE ANGUS LEGACY

1.

2.

3.

4.

5.

1. SRKJ310 BOWMONT JACKPOT
AI sire owned by Alpine Angus with semen marketed by Genetics Australia. Jackpot is currently serving cows at Alpine.

2. CGKG196 ALPINE GOLD EDITION
5 sons averaged over \$13,000 in last years record breaking Coonamble WA bull sale.

3. CGKG155 ALPINE GRACE G155
Dam of Cherylton Angus' lot 1 in their production sale this year.

4. CGKH147 ALPINE HUSSONET
Stud Sire working cows at JB Angus SA and progeny in JB Angus Bull Sale.

5. CGKH037 ALPINE HIGH OCTANE
Stud sire in use at Little Meadows Angus Stud, WA, with 6 sons from his first crop of calves in their 16th Annual Bull Sale.

6. CGKJ052 ALPINE JUMBO
Working stud cows at Texas Angus, Warialda NSW.

7. NAQC18 ARDROSSAN CASINO
Alpine Angus owned old AI sire. Semen was marketed through Agri Gene. Over 600 registered progeny across many herds and dam sire of many of this years catalogue lots.

8. VLYZ191 LAWSONS DINKY DI
Alpine Angus owned old AI sire with semen marketed by Agri Gene. Was one of the high use sires of his time with over 3,700 registered progeny and many daughters still in the Alpine Angus herd.

8.

6.

7.

9.

10.

11.

12.

13.

14.

9. CGKH190 ALPINE HIGH FLYER

7 sons in Little Meadows Angus Stud Annual Sale.

10. WLHG60 CHERYLTON INFINITY

Cherylton Angus herd sire and a son of Alpine Lowan B24

11. DXTH126 TEXAS HOLD'EM

High quality sire owned by Alpine Angus but unfortunately deceased. Calves on ground also at Pathfinder Angus Vic, Glatz's Black Angus SA, Little Meadows WA, Stephen Palmers NSW. & Roger Dunns N.S.W.

12. SPLJ231 STERITA PARK BLACK JACK

AI sire owned by Alpine Angus and Sterita Park Angus, semen marketed by ABS Australia. Full possession rights owned by Alpine Angus and working cows full time at Alpine.

13. NJWG279 MILWILLAH GATSBY

We are a part owner in this current AI sire with over 1,300 registered progeny. Semen marketed by ABS Australia.

14. NENK176 KAROO KNOCKOUT

Exciting new sire purchased last November by Alpine Angus and Texas Angus. Currently on stud duties at Texas Angus and will be working cows at Alpine this Spring. Semen to be marketed by Agri Gene.

15. CGKD18 ALPINE WILCOOLA D18

Donor part owned by Reiland Angus. Dam of Reiland Angus's top priced bull last year. Has produced sale toppers & stud sires for both Alpine and Reiland.

16. CGKJ260 ALPINE JAGGER

Main sire at JB Angus Stud, Naracoorte SA.

* The percentile bands represent the distribution of EBVs across the 2015 drop Angus and Angus influenced animals analysed in the February 2017 TransTasman Angus BREEDPLAN genetic evaluation.

SUMMARY OF ANGUS EBVs & \$ INDEX VALUES

The following is a brief description of EBVs and \$Index values and Accuracies.

Accuracy (%) – Provides an indication of the reliability of an EBV. As more performance information becomes available on an animal (or it's progeny, or relatives) then the accuracy of it's EBVs for particular traits will increase. See Understanding Accuracies for a more detailed explanation.

Calving Ease DIR (%) – Estimates of the genetic differences between animals in the ability of their calves from 2 year old heifers to be delivered without assistance.

Calving Ease DTRS (%) – Estimates of the genetic differences between animals in the ability of their 2 year old daughters to calve without assistance.

Gestation Length (Days) – Estimates of the genetic differences between animals in the number of days from the date of conception to the calf birth date.

Birth Wt (kg) – Estimates of the genetic differences between animals in calf birth weight.

200-Day Wt (kg) – Estimates of the genetic differences between animals in liveweight at 200 days of age.

400-Day Wt (kg) – Estimates of the genetic differences between animals in liveweight at 400 days of age.

600-Day Wt (kg) – Estimates of the genetic differences between animals in liveweight at 600 days of age.

Mature Cow Weight (kg) – Estimates of the genetic differences between animals in cow weight at 5 years of age.

Milk (kg) – Estimates of the genetic differences between animals in milk production, expressed as variation in 200-day weight of daughter's calves.

Scrotal Size (cm) – Estimates of the genetic differences between animals in scrotal circumference at 400 days of age.

Days to Calving – Estimates of the genetic differences in female fertility, expressed as the number of days from the start of the joining period until subsequent calving.

Carcase Weight (kg) – Estimates of the genetic differences between animals in carcass weight, adjusted to 650 days of age.

Eye Muscle Area (cm²) – Estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site, in a 300kg carcass.

Rib Fat (mm) – Estimates of the genetic differences between animals in fat depth at the 12/13th rib site, in a 300 kg carcass.

Rump Fat (mm) – Estimates of the genetic differences between animals in fat depth at the P8 rump site, in a 300kg carcass.

Retail Beef Yield % (RBY%) – Estimates of the genetic differences between animals in percentage retail beef yield, in a 300kg carcass.

Intra-Muscular Fat % (IMF%) – Estimates of the genetic differences between animals in percentage intra-muscular fat (marbling) at the 12/13th rib site, in a 300 kg carcass.

Trial Net Feed Intake (NFI) – Estimates of the genetic differences in feed intake for animals adjusted to the same growth rate and weight base.

Following a review last year a whole suite of new Selection Indexes were introduced with the December 2014 Group Breedplan run. The objective with the new Indexes was to bring them into line with the changes in cattle markets over time.

Angus Breeding Index – estimates the genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls.

This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.

The Angus Breeding Index is particularly suited to commercial producers who sell progeny into different markets, or to seedstock producers supplying bulls to commercial clients who produce for a range of different production systems and market end points.

Domestic Index – estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade. Steers are assumed to be finished using either grass, grass supplemented by grain or grain (eg. 50 – 70 days) with steers slaughtered at 490 kg live weight (270 kg carcass weight with 12 mm P8 fat depth) at 16 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. Emphasis has been placed on eating quality and tenderness to favour animals that are suited to MSA requirements.

Heavy Grain Index – estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.

Steers are assumed to be slaughtered at 760 kg live weight (420 kg carcass weight with 30 mm P8 fat depth) at 24 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. There is a significant premium for steers that exhibit superior marbling.

Heavy Grass Index – estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.

Steers are assumed to be slaughtered at 620 kg live weight (340 kg carcass weight with 12 mm P8 fat depth) at 22 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. Emphasis has been placed on eating quality and tenderness to favour animals that are suited to MSA requirements.

REFERENCE SIRES

3 SONS (8 GRANDSONS, 14 GREAT GRANDSONS) COONAMBLE Z3

IDENTIFIER:
WDCZ3
BIRTH DATE:
09/02/2004

CE-DIR	CE-DTR	GL	BW	200	400	600
-1.7	-3.4	-5.4	+5.4	+50	+92	+121
MCWT	MILK	SS	DTC	CWT	EMA	RIB
+132	+2	+1.2	-1.6	+70	+8.3	-2.2
RUMP	RBV%	IMF	ANGUS BREEDING	DOM.	HEAVY GRAIN	HEAVY GRASS
-2.3	+1.5	+1.6	\$112	\$108	\$120	\$110

- Z3 is an absolute standout when looking for a sire combining growth, structure and docility.
- His sons and grandsons continue this legacy, proving what a dominant influence this sireline has on progeny for these traits.
- Coonamble Angus, founded by Murray Davis is the W.A. herd that bred Z3 and is noted for producing strong, sound quiet cattle with genuine growth. This herd is dominated by Z3 genetics with his sons and daughters having a massive impact on the quality of this herd.
- Two years ago Coonamble sold their entire run of PTIC dry cows four years and older to average over \$8,000 for 77 cows, an Australian record. Last year Coonamble broke the WA bull sale record, averaging over \$11,300.
- Z3's dam, Imran Rosebud U17, is one of the highest docility EBV cows in the breed. She has an amazing production record and is also the grand dam of Ardrossan Admiral A2, an AI sire who also excels in the areas of structure, growth and docility.

- Low Birth Wt Coonamble Z3 son with good frame and impeccable structure.
- Balanced EBV set combining great calving ease, good growth and carcass and excellent docility.
- Few bulls can match his ability to consistently stamp his progeny with such correctness. Sired last years top priced Autumn sale bull who had perfect 5's for structure.
- Dam is out of the Australian record breaking Dream family and is a half sister to Australia's two highest priced females. She has already produced 9 stud sires, three of which sired the top priced bulls at Alpine, Banquet and Onslow Angus bull sales last year.

12 SONS TEXAS HOLD 'EM H126

+0.2	+0.6	+1.0	\$116	\$109	\$112	\$120

- A thick topped Coonamble Z3 grandson with explosive early growth and near faultless type.
- His EBVs offer an incredible combination of calving ease, birth to growth, EMA and docility.
- Very rarely does a bull with such calving ease and low birth produce cattle with the substance and capacity that Hold'em passes onto his progeny.
- Dam, Texas Undine Z183 has had a massive influence on the Texas Angus herd with sons topping no less than four of their Annual Sales. This includes Texas Mount K2, purchased by Welcome Swallow and Glenoch Angus for \$45,000 in 2015. At last count she had something like 16 sons working in Angus studs and Brangus bull breeding operations.

- On inspection Reserve was a strong muscled, long fronted bull with a quiet nature.
- Proven high calving ease sire with excellent progeny docility and big EMA.
- Throwing calves with tremendous thickness, temperament, butt shape and eye appeal.
- His sire is a noted producer of high production, moderate, low maintenance females.
- Dam is one of the hottest females in USA at present with over \$2,500,000 progeny sales in last 4 years and over 10 sons in AI collection centres.

-2.3	+0.4	+3.0	\$111	\$104	\$126	\$104

- Long, strong and powerful with fluid movement was what we liked about Novak when we saw him.
- EBVs rate him as a high IMF bull with good birth to growth spread.
- Producing cattle with excellent structure, muscle pattern, shape and docility – a rare combination for a high IMF bull.
- Sire T C Total is a gun producer of females and his dam sire Predestined is one of the USA leading sires when it comes to producing high quality females with high carcass values.
- Dam is now a donor at Alpine. She stems from one of the USA's most potent performance cow family's. The matron of this, GAR EXT 614 has produced over \$7,000,000 of progeny and is in the pedigree of many leading AI sires.

-0.7	-0.2	+2.5	\$109	\$106	\$116	\$107

- High Roller is a wonderfully balanced bull, displaying impeccable structure & type.
- He is producing extremely quiet cattle with an early maturity pattern and soft, thickset body.
- By TC Total, the same sire as Novak and dam is by one of the breeds most dominant producers of quality females, LT Bando 9074.
- High Rollers dam, Hazeldean A90, is a leading donor at Hazeldean and has already produced a couple of other stud sires. She stems from the damline that produced arguably one of Te Mania's most influential matrons, VTMR312.

-3.4	+2.2	+1.8	\$142	\$136	\$152	\$138

- Ten X is presently the highest registration bull in the United States due to his high octane performance coupled with amazing calving ease.
- His birth to growth spread is enormous and passes on tremendous carcass attributes.
- He sits in the top 1% of the breed for marbling in the USA with over 8,000 progeny evaluated.
- His dam A A R Lady Kelton 5551 is a moderate framed deep ribbed cow with a near perfect udder. Her production record was one of the main reasons some leading American herds first used Ten X.

-4.5	+2.7	+1.9	\$143	\$142	\$154	\$139

- All In is sired by Ten X and like his sire takes performance combined with Birth Weight to an amazing level.
- His calves stand on good feet, with frame but develop plenty of muscle and body composition when the feed kicks in. They are capable of rapid weight gain.
- His damline is a massive stud sire producer. Dam Deer Valley Rita 0274 is also the dam of the high performance sire Deer Valley Patriot, while the grand dam GAR Objective 2345 is one of Americas leading producers of Calving Ease and marbling genetics. Her and her daughters are responsible for producing multiple high use AI sires.

- A241 is one of the most complete Angus sires and has been a mainstay of our program for the last few years.
- He has excelled at producing moderate birth, high growth cattle with frame.
- Leaving a lasting legacy with a multitude of sons working in leading Angus herds. One of our previous A241 sons, Alpine Gold Edition produced progeny bulls to average close to \$14,000 at last years record breaking Coonamble sale.
- We have another currently working cows, Bowmont Jackpot SRKJ310, who is an AI sire marketed by Genetics Australia.
- Daughters are excellent producers and are starting to put quality cattle through our program. A number of our A241 daughters have bulls in this years sale.

The Kilns

Staying at the kilnhouses at Alpine Angus is a unique experience where contemporary luxury and design is combined with the stunning beauty of the Ovens Valley landscape in Porepunkah. The three houses – **Cavedon's Kilnhouse**, **Chinaman's Kilnhouse** and **The Sorting Shed** – are each in a separate part of the Alpine Angus stud. Each of the houses have spectacular views of Mount Buffalo, Feathertop and Bogong, with grape vines and – alpine angus cattle.

For bookings or enquiries
www.kilnhouse.com.au or call
Clare Delany 0408553332 or
the onsite kilnhouse manager
Elissa Oswin 0400733170

BEEF CLASS STRUCTURAL ASSESSMENT

HOW TO USE THE BEEF CLASS STRUCTURAL ASSESSMENT SYSTEM

The 2016 'The Swallow lands at Alpine Angus Spring Bull Sale' Bulls were independently structurally assessed in August 2016 by Ian Moreland.

The Beef Class Assessment System uses a 1–9 scoring system for feet and leg structure;

- A score of 5 is ideal. (Note: Except for Temperament Score where score of 1 is preferable – refer notes below)
- A score of 4 or 6 shows slight variation from ideal, but this includes most animals. An animal scoring 4 or 6 would be acceptable in any breeding program.
- A score of 3 or 7 shows greater variation but would be acceptable in most commercial programs.
- A score of 2 or lower or 8 & higher are low scoring animals and are culled.

Abbreviations:

FC: Front Claw
 RC: Rear Claw
 FA: Front Foot/Pastern Angle
 RA: Rear Foot/Pastern Angle
 RS: Rear Leg Side View
 RH: Rear leg Hind View

HOW TO USE THE BEEF CLASS TEMPERAMENT SCORE

- A score of 1 is ideal.
- The score is evaluated as bulls leave the crush when being assessed for structure at approx 18 mths. This is not ideal as peer group behaviour in the yards can distort the result so in future these assessments will be made at weaning.

Structural problems in cattle have a substantial effect on both the reproductive and growth performance of a beef herd. It is widely recognised that structural problems in sires have detrimental effects on conception rates, calving patterns and thus profitability. Similarly, females with inadequate structural characteristics are more prone to weaning lighter calves or conceiving later in the breeding season than their more functional counterparts. These structural problems are filtered through the supply chain resulting in reduced income for the producer, feedlot and thus reducing the overall productivity of the Australian Beef Industry. The current trend for improving consistency and quality has shifted producers' focus, towards selecting seedstock on carcase and growth genetic traits (EBVs). Whilst, this selection has been, and will continue to be pivotal in developing the Australian beef industry, we must not forget the fundamentals of livestock breeding. The Independent Assessment System was designed by the MLA, the BIA and several breed societies to address structural problems in the beef industry. Detailed analysis of three thousand genetically linked herds indicated that structural characteristics such as leg and foot structure were moderately to highly heritable.

MYRTLEFORD CATTLE SALES *(pictured above)*

Top Quality Local Bred Cattle

- Annual Weaner Sale - March
- Autumn Sale - May
- Spring Sale - October

1	ALPINE RESERVE L005 (AI) (ET)	AMFU NHFU CAFU DDFU	Identifier: CGKL005 Birth Date: 06/02/2015 Register: HBR
BOYD NEW DAY 8005 B/R NEW DAY 454 B/R RUBY 1224 Sire: USA16916944 V A R RESERVE 1111 (ET) CONNEALY ONWARD SANDPOINT BLACKBIRD 8809 RIVERBEND BLACKBIRD 4301		G A R PRECISION 1680 J L B EXACTO 416 BROST BURGESS 041 Dam: CGKX40 ALPINE WILCOOLA X40 (AI) (ET) ARDROSSAN JACKSON J6+89 (AI) (ET) ARDROSSAN WILCOOLA Q6 ARDROSSAN M30+92 (AI)	
Heavy bodied Reserve son with excellent structure and mobility. Dam is one of our strongest breeding females with three of her daughters producing stud sires. This damline excels for the hip and butt shape they put in their offspring as well as incredibly soft, slick skin. There are 4 full ET brothers in the sale and they are all stamped with the same thickness and excellent type. L005 combines an outstanding muscle pattern with moderate birth and above average growth.

Balanced Novak son with plenty of body, capacity, length and extension. Combines a big birth to growth spread with an IMF EBV around the top 10% of the breed. Out of a full sister to one of our higher priced bulls in 2011, Alpine Farley who is still going strong breeding bulls for Sharinda Angus. Highest ultrasound scanning bull for IMF and fat cover amongst the 2 year olds and third highest for eye muscle.

A241 son with outstanding performance, responsible maturity pattern and first class pedigree who was the highest EMA scanning bull in December. We purchased his dam in conjunction with Coonamble Angus and she is very closely related to AI sire Carabar Docklands. Sisters to this cow have produced numerous stud sires including AI sires Booroomooka Frankel, Booroomooka Hyperno, Booroomooka Yogi as well as Docklands.

4	ALPINE ELEVATOR L078 (AI) (ET)	AMFU NHFU CAFU DDFU	Identifier: CGKL078 Birth Date: 30/04/2015 Register: HBR
B S S LIMITED DESIGN COONAMBLE Z3 (AI) (ET) IMRAN ROSEBUD U17 (AI) (ET) Sire: WDCE11 COONAMBLE ELEVATOR E11 KOOJAN HILLS XCELL W29 (AI) BANGADANG B31 BANGADANG WILCOOLA Y1 (AI) (ET)		C A FUTURE DIRECTION 5321 ARDROSSAN DIRECTION W109 (AI) (ET) ARDROSSAN WILCOOLA Q71 (AI) (ET) Dam: QHEB37 CARABAR BLACKCAP MARY B37 (AI) (ET) SUMMITCREST SCOTCH CAP OB45 BOOROOMOOKA TRACY T4 (AI) (ET) SUMMITCREST BLKCAP MARY E210 (ET)	
This time an Elevator son out of Carabar Blackcap Mary B37. As suggested by his EBVs this bull, like his sire, has explosive growth and power and is exceptionally quiet. Gives away a fair bit of age to the others as he is the result of some late embryos and as a result was weaned with the rest of the mob at 5 1/2 months of age. This bull has performed remarkably well to end up being one of the heaviest and the equal 3rd highest scanning EMA bull.

This Earnan son has some serious performance and power behind him. No surprise he has always been one of the heaviest in the mob and was the 2nd highest scanning EMA bull. No surprise his growth EBVs are easily in the top 5% of the breed with his 600 Day Wt nudging the top 1% Dam has produced two powerful higher end bulls last two sales, selling to Ian Nicklaus at Omeo and Scott Anderson Killara Angus.

Supersound ET full brother to lot 1 and a product of one of our most dominant females. As mentioned earlier there are four full brothers in this sale, all have near perfect structural scores backed up by exceptional muscle scores with 3 registering scores in the Bs and the youngest gaining a C+. The maternal value of these bulls cannot be overlooked either with their sire being the son of one of the USAs most dominant cows.

Calving ease Full House son with with good frame and plenty of constitution. Full House consistently produces these sleep easy calving bulls that have plenty of capacity and enough performance and scale to go out over cows as they mature. As a sire group they consistently come in with structure scores amongst the highest. No surprise when you think Full House is currently in with 100 cows and feet are still near perfect.

RODWELLS

LOCAL SERVICE NATIONAL STRENGTH

It's a trust thing

Representative, negotiator, ally, and mate – this is a relationship business.

At Rodwells we are known for our team of local, experienced, independent livestock specialists and property agents across Victoria, New South Wales and South Australia.

Backed by the strength of a national network, our Rodwells agents deliver the most effective solution tailored for your livestock. Our knowledge and experience in local markets and seasonality means that you can trust us to deliver the highest standard of service.

And as part of the Ruralco group of businesses, we are able to draw on the resources of Ruralco Property, providing real estate agency services in both rural and residential markets, as well as a comprehensive property management service.

Our agents have access to up-to-the-minute market intelligence, including market trends and performance statistics, and are committed to securing successful buying and selling results for their clients.

Whatever your livestock or property needs, we are confident our service offering provides the best possible outcomes at all levels of the industry supported by our ethos of Local Service, National Strength.

Talk to your local Rodwells expert...

A Novak son with some serious credentials behind him. At scanning in December was the 2nd heaviest and equal 2nd highest scanning EMA Spring drop bull. Is out of one of our best H drop females, a product of the strong Wilcoola cow family and our old matron Q6. Massive 200, 400 & 600 Day Wts in top 2% of EBVs without going over the top for Birth Wt. Indexes in top 10%.

L139 proves the paddock performance of the last Novak son was no fluke. At scanning this bull was the heaviest Spring bull and incredibly scanned the highest for EMA and IMF as well. Once again big growth EBVs in the top 2% of the breed. Another product of the Wilcoola cow family, this time out of a granddaughter of Ardrossan Wilcoola U20. This cowline excels at producing powerful, sound stout cattle.

More moderate birth weight Novak son, but still plenty of body and growth. Below breed average for birth yet growth EBVs in the top 15% of the breed. Very sound, free moving bull. We are happy with the correctness of the Novaks and this is backed up by how well they have assessed for structure across a range of herds. There are few high marbling sires that can match Novaks ability to pass on structural correctness, temperament and docility.

Low birth weight Novak son with the constitution to produce strong calves that will grow, with a high propensity to marble. Combines a birth weight in the lightest 20% of the breed with a 400 Day Wt in the top 20% and IMF in the top 10%. Dam goes back to the grand old Wilcoola Q6 cow. Top 10% Domestic Index and Heavy Grain.

Well muscled Reserve son with plenty of shape and a C+ muscle score. Low Birth Wt, big calving ease bull without sacrificing any fleshing. High maternal value too. Already mentioned that Reserve has such a strong maternal influence in his pedigree and the dam of this bull has a fantastic production record. Two of her daughters have high quality bulls in this sale, one of which produced Alpine Justice 1108 currently in use as a stud Sire at Bald Blair Angus.

These four full ET brothers by Identity sure have some growth numbers about them. We are lucky to have sisters to these bulls in calf already and are looking forward to watching their progress. Like his brothers a sound, well constructed bull with excellent structure scores. Combines a birth weight under 5 with 400 & 600 Day Wts in top 5% and Heavy Grass Index in top 10% of the breed.

WHAT YOU SEE IS WHAT YOU GET

By Alpine Angus Manager Chris Oswin

EBVs are great for giving an indication of the performance of a bull for a range of different traits, but don't forget – what you see when you are looking at a bull is what you get.

The temperament, type, structure, frame and maturity pattern are all in front of you when you are looking at a bull. Once your bull gets home the EBVs and traits you have selected for are locked in and add to the genetic potential of your herd. Remember though, the physical characteristics you observe in the bull you select is what you will be dealing with day-in day-out, year after year, as his calves and daughters go through your herd.

Breeding cattle is far from a perfect science and nothing is certain. We are not trying to say we always get it right either, but by selecting for characteristics you require goes a long way to help producing what you are looking for. The more generations you can stack with the characteristics you require, and cull for those that don't meet those requirements, the greater the chance of your herd breeding true and consistently.

We keep this in the front of our mind when selecting sires to use, replacement heifers and as we go through our cows each year. We don't see much point chasing some of these massive numbered or big hype bulls if they can't produce cattle that do what we want. Sure we have got to take the odd calculated risk and carefully use some animals that may benefit our herd for certain traits, but if the progeny don't fit in with the rest they are out the door pretty quick.

It makes no sense having to tear around chasing half-mad stock, or getting belted in the yards just because we are happy to overlook temperament in the pursuit of producing a catalogue with a pretty set of EBVs that is easy to market. Same goes for structure and feet, bad footed or lame cattle drive us around the bend when we shift stock. While bulls need to be easy to handle, able to cover ground and breed as many cows as possible in a limited amount of time. The list goes on...

29	ALPINE WS RESERVE L462 (APR) (AI) (ET)	AMFU NHFU CAFU DDFU	Identifier: CGKL462 Birth Date: 24/08/2015 Register: APR
BOYD NEW DAY 8005 B/R NEW DAY 454 B/R RUBY 1224 Sire: USA16916944 V A R RESERVE 1111 (ET) CONNEALY ONWARD SANDPOINT BLACKBIRD 8809 RIVERBEND BLACKBIRD 4301		SITZ ALLIANCE 6595 K C F BENNETT TOTAL EXT OF CONANGA 6790 Dam: CMAE124 WELCOME SWALLOW TOTAL PRINCESS E124 (APR)(AI)(ET) DUNOON REAGAN R093 (AI) (ET) WELCOME SWALLOW X7 (APR) (AI) WELCOME SWALLOW PRINCESS NIGEL S28	

A heavy fleshed Reserve son who scored a C+ muscle score and was equal highest bull for EMA at scanning amongst these embryo calves. Like many of the bulls in this pen goes back to a daughter of Welcome Swallow X7. We are pretty lucky to have gained access to a group of calves from such a strong dam line. Positive Calving Ease Direct, low birth wt yet 400 Day Wt in top 20% of the breed, 5% EMA and 10% Domestic & Heavy Grass Index.

World Class Beef Genetics

Bowmont Jackpot J310

Ardrossan Equator A241 X Vermilion Yellow Stone

- Bullet proof type, tremendous eye appeal, balanced EBVs and a first class pedigree
- A logical progression from A241 now that semen is very limited
- Near perfect independent structural assessment, excellent birth to 600D growth spread and breed leading scrotal and milk
- One look at his EBV graph and it is no surprise that Jackpot is one of A241s leading performance sons
- Dam is a product of Ardrossans sire producing Wilcoola cow family. She is a half sister to AI sires Ardrossan Connection X3 & X15.

7AN379 Deer Valley All In

AAR Tenx 7008 X Sitz Upward 307R

- Without question one the best Calving Ease sire now available in Australia
- No Ten X son matches All In's blend of CED, \$Weaning and \$Beef in the USA or Australia
- His powerful dam goes back to the Calving Ease and Marbling leader, GAR Objective 2345
- Use to improve virtually every EBV with no sacrifices in phenotype

7AN349 Plattermere Weigh Up

Sitz Upward 307R X GAR Retail Product

- Pedigree, Performance and Phenotype all wrapped in one unique package
- His Pathfinder dam serves as an elite donor for the Deer Valley program
- Progeny from Weigh Up and his dam were sale toppers in the 2014 Deer Valley Farms sale
- Weigh Up was an impressive individual on inspection in 2015 and his progeny were outstanding
- Sons of Weigh Up have been highly sought after in the USA to join the AI industry

Another balanced quiet Z3 son with near perfect structure scores. We have spent a lot of time and effort sourcing bulls that we think can add to our structural correctness and docility and the Z3 line is at the top of our list when it comes to selection for these traits. Once again a very balanced combination of calving ease, Birth Wt, Growth, EMA, IMF docility and structural scores. Similarly bred to last lot both being out of Dinky Di dams.

High class Holdem son with plenty going for him including C+ muscle score and great structure data. When we found Holdem we couldn't believe the birth to growth combination he had to offer, especially combined with such an appealing phenotype. Dam is a full sister to lot 34s dam and her previous 3 sons have all been amongst our top end sale bulls. This bulls balanced data set speaks for itself, top 5% Calving Ease, below breed av Birth Wt and Gestation Length, Growth, Milk, Carcase Wt & EMA EBVs top 5 - 10%.

Big time Calving Ease Holdem son not lacking for much. Pretty difficult to combine a calving ease in the top 2 or 3% of the breed, Birth Wt top 10% and a 600 Day Wt in the top 20% but that's what Holdem seems to be able to do. Holdem himself was born two weeks early with a 30 kg Birth Wt and went on to be a standout at 12 months of age at Texas Angus and it appears he is passing this explosive growth and maturity pattern onto his calves.

Yep you guessed it, another Holdem son with massive Calving Ease, top structure scores and impressive Birth to Growth spread. Well below breed average for Birth Wt, top 5% Calving Ease & Gestation Length and top 10% Growth EBVs, Scrotal and Carcase Wt. Its only early days but we have not seen such a low birth weight bull be able to breed cattle like this before.

Bit more punch here on the EBV side of things but still moderate birth, positive calving ease and explosive growth. The dam and grandam of this bull consistently turns off our heaviest calves, so Breedplan has the milk figure right here. They descend from Te Mania Lowan R133, a cowline renowned for producing high quality sires from a range of herds.

A real Alpine pedigree here with a Full House, out of a Casino daughter. Full House and Casino are two extremely sound bulls that have stood the test of time working cows at Alpine and have also had a positive effect on other herds around the country. This bull combines positive Calving Ease with a good Birth to Growth spread and handy IMF. Near perfect structural scores and a C+ for muscle score.

BOYD NEW DAY 8005 B/R NEW DAY 454 B/R RUBY 1224 Sire: USA16916944 V A R RESERVE 1111 (ET) CONNEALY ONWARD SANDPOINT BLACKBIRD 8809 RIVERBEND BLACKBIRD 4301		G A R PRECISION 1680 J L B EXACTO 416 BROST BURGESS 041 Dam: CGKX40 ALPINE WILCOOLA X40 (AI) (ET) ARDROSSAN JACKSON J6+89 (AI) (ET) ARDROSSAN WILCOOLA Q6 ARDROSSAN M30+92 (AI)	
Talking about breeding, muscle and high maternal value - L266 ticks all these boxes as well. Full ET brother to lots 1, 7 & 49. One of lams picks when he was assessing the bulls (as were his 3 brothers!). Very well put together, scoring perfect 5s for structure & B- muscle score. His dam X40s ability to throw quality cattle with extra hip and butt shape is a real feature of this line and one of the reasons her daughters produce such high demand progeny.

High Calving Ease, low Birth Wt Reserve son with the fleshing and temperament so evident in this sireline. Reserve sure has stamped his progeny as we had hoped, well muscled, quick growing moderate framed cattle that are easy to handle. Good thing for us going forward is his dam is an absolute gun and his sire is a noted female producer so the future Augers well for our Reserve daughters.

Handy Ten X son bred along similar lines to last lot. The dam of this bull is sired by Alpine Bradman B31, a high performing Te Mania Lowan R133 son that topped our 2008 sale, going to Fred Bells Glenavon stud at Guyra. This bull has terrific calving ease and birth to growth spread combined with stature and strength of body that makes him more than a low birth weight one trick pony. Top 10% Calving Ease & Birth Wt and top 20% 200 & 400 Day Wts.

Typical Highroller son, very sound, well fleshed with a docile nature and soft easy doing maturity pattern. We purchased High Roller because of his strong maternal pedigree, excellent type and structure, moderate frame and thickset, early maturity pattern and he is stamping his calves with these attributes. L058 is positive calving ease, moderate birth, top 10% growth EBVs, IMF and most indexes.

Once again a bull out of a Te Mania Emperor first calf heifer. Very similar breeding to the last lot when you consider Novak and High Roller are both TC Total sons. These two bulls show that if you get things right you can still get capacity and fleshing into high IMF cattle. Good birth to growth spread being top 5 - 10% 200, 400, 600 Day Wts, top 10% IMF and top 20% Heavy Grain Index.

This next High Roller son is another thickest bull stacked with high maternal and performance merit. His first calf dam by the record breaking Te Mania Emperor, is a granddaughter of V803 a cow that has left many functional daughters in our herd. A couple of V803s brothers were stud sires so gives a fair indication of the strength breeding behind this line. C+ muscle score, moderate birth, 10% 200 & 400 Day Wts, 20% IMF and top 25% most Indexes.

MAR INNOVATION 251

- ▶ Innovation has been one of the best semi-proven sires ever brought into the CRI program. He displays incredible Body Capacity and Width of Base with huge Testicles, great Temperament and just about the best Feet in the CRI Angus line-up.
- ▶ An all-round Performance Sire he excels for Maternal Values, his dam is a super productive "Final Answer" daughter who is a great Uddered, good Footed Easy Fleshing cow that could survive in the harshest of environments.

EF COMMANDO 1366

- ▶ New Release "Complement" son who is one of the most sought after sires in the USA for 2016. In January 2016, twenty of his first sons offered for sale averaged US\$35,000 at Baldrige Bros Angus. Three sold for over US\$100,000, all to AI Studs.
- ▶ A genuine Calving Ease Sire, Commando combine's breed leading Growth with elite Ribeye, Marbling and Index Traits which all add up to increased Profitability.
- ▶ Commando sires Thick, Muscular progeny that have are Capacious with Sound Feet and great Temperament; few bulls can match his combination of Calving Ease, Carcase and Index with the flexibility his pedigree provides.

It is becoming pretty obvious the impact Holdem can have on producing high growth cattle with substance and strength. A rare for commodity for such a low Birth Wt bull. These cattle have been through a very tough winter and late Spring. Would be interesting to see what they would present like in a pampered environment! Positive Calving Ease, moderate Birth Wt, top 3% 600 Day Wt, 20% Milk & top 20% Heavy Grass Index.

Low birth weight Novak son with excellent structure. Our theory is the better these structure scores, the better chance the animal has to lead a problem free existence. Combine this with strong toplines and fluid movement and you would hope you are stacking the odds further in your favour against breakdowns and associated problems.

Talking about structural integrity, every year Full House throws up these perfect 5s for structure. The last two years our lot 1 bulls have been Full Houses with straight 5s including last years sale topper. High Calving Ease, low Birth Wt Heifer prospect, still maintaining frame and depth of body to ensure you dont start breeding calves resembling guinea pigs.

Its not bad when 5 out of 12 bulls in your second last pen score perfect 5s for structural assessment. It gives an indication of how strong our cattle are in relation to the physical characteristics assessed. This time it is a high carcasse Gatsby son out of a daughter of the supersound Little Meadows Edwina X3. As his numbers suggest L172 has a lovely soft body type and the Gatsbys are always particularly soft coated. Above breed average for growth, top 25% EMA , 5% IMF and high fats.

Thickset, dense bodied High Roller son that should develop into a meat machine. The Mature Cow Weight and fat EBVs for High Roller are a bit of a joke at present until we get enough data through, but unfortunately the computer cant see the animals to know it is wrong! Ideal maturity pattern, placid natured and C+ muscle score. Moderate Birth, top 15% Growth EBVs with good EMA and IMF.

This well fleshed Reserve son is out of the powerful donor D121. Once again first class structural scores. Pretty simple when sound cattle are bred from and used in the right combinations. Very similar EBV set to last bull with ultra high Calving Ease and low Birth Wt, above breed average 200 & 400 Day Wts, 10% EMA 7 10% Domestic Index.

AFTER SALES SERVICE AND MANAGEMENT OF BULLS

BUYING A BULL IS AN INVESTMENT. THIS INVESTMENT SHOULD CONTRIBUTE TO THE GENETICS AND SALE INCOME OF YOUR HERD FOR MANY YEARS. IF YOU ARE TO GET THE MOST FROM YOUR NEW BULL, IT PAYS TO LOOK AFTER HIM WELL, ESPECIALLY IN THE FIRST SEASON OF USE.

Please remember, when working bulls through the yards, handle them with care. Preferably work them with other cattle and do not use force.

OUR GUARANTEE

All Alpine & Welcome Swallow bulls are guaranteed for up to three years from the date of sale. Every effort has been made to ensure our bulls leave Alpine in top working order. However should any Welcome Swallow bull prove to be infertile or incapable of service we undertake to:

1. Replace the bull with one which all parties agree is a satisfactory substitute, or
2. Issue a refund equal to the purchase price less the salvage value and is calculated on the basis that the amount is reduced by one third for each year of service from the date of sale.

The guarantee covers the purchase value of the bull, without interest, cost and damages. The guarantee shall apply providing the bull's incapacity is not caused by injury or disease contracted since leaving Welcome Swallow. A veterinary certificate must be supplied by the purchaser upon request.

AFTER SALES SERVICE

Our 3 year guarantee is designed to deliver the best quality assurance. The sale of a bull we regard as the beginning of a relationship with our clients rather than the end of a 'deal'. We also believe we have a vested interest in helping our clients breeding programs in any way we can.

If you have any problems with your bulls or any other aspect of your breeding program we invite you to make contact with us regarding your concerns as soon as possible. We endeavor to keep a supply of back up bulls at all times in order to meet our guarantee obligations and as a service to clients whose bulls are accidentally injured.

We also employ the services of Dr John Webb Ware from the Mackinnon Project based at Melbourne University Werribee campus who gives us veterinary advice and farm production advice as he does for many farming enterprises across Victoria. This means that if we do not have the answer we will call on outside expertise to assist you.

ARRIVAL OF YOUR NEW BULL

Bulls can become upset and excited in the sale and delivery process. They are

subjected to strange yards, different noises, loss of their mates, different people, different handling methods, trucking, unloading, new paddocks and different water and feed. This can upset animals, which are normally very quiet.

When the bull arrives home, unload him at the yards into a group of house cows, steers or herd cows. Never jump the bull from the back of a truck into a paddock. Bulls from different origins should be put into separate yards with other cattle, steers or cows, for company.

Provide hay and water, and then leave the bull alone until the next day.

All bulls should be drenched for worms every six months with a dectin drench. In addition they may need a drench for fluke if necessary and to be treated for lice. The following annual vaccinations are recommended:

- 7-in-1 vaccine annually.
- vibriosis vaccine annually.
- Pestiguard vaccination annually.

Give particular attention to preventing new bulls bringing vibriosis into a herd. Vibriosis is a sexually transmitted disease that causes infertility and abortions and is most commonly introduced to a clean herd by an infected bull. Vaccinated bulls are free from vibriosis so vaccinating bulls against the disease should be a routine practice. All Alpine Angus bulls are vaccinated.

MATING BULLS

For an efficient production system we recommend a 6–8 week joining season.

Newly purchased young bulls should not be multiple joined with older herd bulls. They will not be allowed to work much and in keeping them away from the cows, the older, dominant bull will knock them around.

Use new bulls in either single sire groups or with other young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later.

Ensure all bulls used are in good condition prior to working—condition score 3 is ideal. Remember bulls that are too light or heavy in condition may have problems with libido and semen production.

Yearling bulls are still growing strongly, so tend to be leaner, carrying less body fat reserves. The condition of the yearling bulls is critical. If they drop below condition score 3, sperm production may be impaired.

Service Ability Testing is recommended on all bulls prior to joining.

All working bulls should be tested or checked before joining for physical

soundness, testicular tone and serving ability.

All bulls to be used must be free moving, active and in good store condition. Bulls may need supplementary feeding before the joining season to bring them up to condition score 3. The Australian Association of Cattle Veterinarians (AACV) defines a normal, fertile bull as 'expected to get 90% of 50 normal, cycling, disease free females pregnant within 9 weeks, and 60% of these should become pregnant in the first three weeks of joining'. This expectation would apply to 2 year old bulls, but not to younger bulls.

DURING MATING

Whilst generally all good to plan we believe a proactive approach is best to ensure you get the best result.

We strongly recommend that you keep a close eye on the bulls if possible when joining. Even though we have performed a service ability test and had your bulls independently structurally assessed bulls are animals and things can still go wrong. Check bulls at least twice each week during joining. Get up close to them and see each bull walk; check for swellings around the sheath and for lameness. Watch them work if possible. A significant number of cows or heifers bulling after 6 weeks of joining may indicate there is a problem. Young bulls are particularly vulnerable in their first season. Common problems that can occur are;

- they may not have built up immunity to IBR (the cattle form of herpes—making it painful to insert the penis).
- or may be more prone to a fever event through the stress of working, new surroundings and establishing their ranking with other bulls. This can render them temporarily infertile for a six week period.
- Problems such as warts on the penis will mean that the bull will need to be attended to.
- and pay particular attention to any sign of abnormal serving problems like 'corkscrew penis'.

Replace any suspect bull immediately. If you think there is or might be a problem please do not hesitate to contact us immediately as we can help you investigate the problem and if available provide a replacement bull so your joining is uninterrupted by any unforeseen event.

If you have to replace a bull, it is always wise to get the problem bull checked by your vet. Sometimes prompt treatment for small problems can avoid culling.

Our thanks to the Angus Society for their contribution to this article.

TEXAS MOUNT K2

THE BEEF BREEDER'S BULL

Mount K2 was purchased at the Texas Angus Spring 2015 Bull Sale for \$45,000 (Texas record top price) by Glenoch Angus and Welcome Swallow Angus, with Texas retaining a 25% interest.

"Alpine focus on using sires descended from dominant female lines, that are structurally sound and excel for calving ease growth spread, carcase, fertility and temperament – we selected Mount K2 for our 2015 joining because he excels across all of these traits. We were lucky enough to purchase a sire by the same dam two years ago and look forward to the influence these two bulls, and their damline, will have on our herd in years to come."

– Alpine Angus manager Chris Oswin
