

ALPINE ANGLUS

11TH ANNUAL BULL & FEMALE SALE

THURSDAY 27TH MARCH 2014

56 Stud & Commercial Bulls

10 HBR Stud Females

LOT 2

CGKH034

ALPINE HECTOR

Low Birth Wt.
Calving ease prospect.
Top 20% 200 Day Wt,
CAAB Index and IMF.

LOT 3

CGKH033

ALPINE HERCULES

Top 20% 200 Day Wt.
Retail Beef Yield and
Heavy Grass Fed Steer Index.
Top 25% CAAB and
Short Fed Domestic Index.

LOT 4

CGKH037

ALPINE HIGH OCTANE

Top 1% 200, 400 & 600
Day Wt, Carcase Wt,
Heavy Grass
and Terminal Indexes.

1 1th Annual Sale

**56 STUD & COMMERCIAL
ANGUS BULLS
10 HBR STUD FEMALES**

Thursday 27th March, 2014

Sale commences 1 p.m. at the Alpine Angus Sale Complex
Rosewhite Farm, Myrtleford-Mt Beauty Road, Rosewhite, Vic.

(50 minutes from Wodonga) (50 minutes from Wangaratta)

**Enquiries: CHRIS OSWIN: Mobile 0427 562254, chris@alpineangus.com.au
Tim Brown 0428 535 244 Jim Delany 0408 535 658**

SALE INFORMATION

INSPECTIONS

Sale will commence at 1 pm on Thursday 27th March.

All sale lots can be inspected from 10 am sale day or at anytime prior to the sale by arrangement with Agents or Vendors.

GENETIC DEFECTS

All cattle in the sale are sold free of AM, NH, CA and DD, either by pedigree or testing.

HEALTH

Ear notch tested for Pesti Virus.

Vaccinated for Pesti Virus, Vibriosis and 7 in 1.

Fertility and semen tested by Hayden Shippard.

Alpine Angus is an MN2 Accredited Herd, Certificate Number VC462.

BIDDING/BUYER

NUMBER SYSTEM Please register with Agents on Sale Day.

ACCOMMODATION

Motel accommodation available in Albury/Wodonga, Myrtleford, Beechworth, Wangaratta and Bright.

REBATE TO OUTSIDE AGENTS

Outside Agents accompanying a purchaser to the sale are entitled to a 4% rebate. To qualify, the agent must register with Alpine Angus in writing or by fax or email no later than 5 p.m. on the day prior to the sale and must settle within 7 days of the date of invoice.

2% will be paid to agents if purchases are booked by buyers to agents without introduction.

DELIVERY

Cattle purchased by clients for delivery within 150kms of the sale complex will be delivered free of charge by the vendor. Outside of this we will endeavour to assist in whatever way we can.

CATERING

Bright St Vincent de Paul will be providing complimentary morning tea and lunch. Please join us for refreshments at the conclusion of the sale.

DISCLAIMER

Whilst all care and attention has been paid to accuracy in the compilation of this catalogue, neither the vendors nor the sell agents or representatives thereof resume any responsibility whatsoever for the correctness use or interpretation of the information on animals included in this sale catalogue.

ALPINE ANGUS 11TH ANNUAL SALE

Welcome to our Annual Sale. This year we are offering 56 bulls and 10 females. This year's sale provides an opportunity for buyers to access high quality genetics from leading and well sought after sires. The sale offering is headlined by progeny of the \$91,000 Te Mania Emperor, our resident herd sire Ardrossan Casino and leading carcass sires Lawsons Invincible and Tuwharetoa Regent. The selection of these high performance sires has been carefully targeted to compliment the outstanding Alpine female herd. The result is a selection of bulls and females which are sound, free moving, with plenty of scope, performance and growth whilst maintaining moderate birth. The sale offering includes 8 sons and 5 daughters by Emperor. There are 17 Casino sons, 6 bulls by Invincible and 3 by Regent.

As always, the sale cattle are strong for IMF and EMA. All bulls have undergone rigorous selection for temperament and structure. They are all independently fertility and semen tested. Our aim is to provide you with a bull which will be ready to go when you get him home, who will work well and will compliment and strengthen your herd.

Our female selection is packed with quality. The two cows with calves at foot, Alpine Wilcoola CGKC72 a Dinky Di daughter out of the legendary Q6 and Alpine Faigel by Casino headline the female sale. The 5 Emperor daughters, all PTIC, provide a unique opportunity to access highly sought after genetics. We thought long and hard about offering such quality females for sale but decided to continue the tradition of offering a select group that has the ability to make a significant impact on the herds that they join.

All sale cattle are sold free of known genetic defects, either by pedigree or by testing. We have conducted our sale for the last two years on this basis. We are conscious of the fact that whilst management of such defects is a day to day incident of stud breeding, commercial breeders need, and are entitled to, certainty and minimisation of known risk. The discovery in 2013 of the recessive gene defect, developmental duplications, DD, has impacted significantly across the whole of the Angus Breed. Our policy is simple, if a genetic defect is identified, we will not sell cattle with that defect as part our annual auction sale. We consider that stud breeders should bear the cost of genetic defects once they are identified.

To remove such cattle from the sale offering comes at a cost to us, but it is part of our policy to do our best to protect our clients against risk. As part of our management program we take hair samples from all Alpine cattle, including sale bulls and females. Those samples are stored at the University of QLD so that if any issue should arise in the future we and our clients will be well positioned to respond.

Thankyou to all of our clients for your past support. Thanks also to our agents within the Paull & Scollard and Elders networks, and to our auctioneer Michael Glasser. If you would like further information about cattle on offer please contact Chris on 0427562254 or Jim on 0408535658 or one of the agents.

Please accept our invitation to join us for an open day and sale preview on Friday 7 March 2014, after the Myrtleford weaner sales.

Chris Oswin and Jim Delany

GUARANTEE

In the event of a bull proving to be infertile or incapable of natural service in the 12 months from sale date, the vendor will offer to supply a suitable replacement if available, or credit the purchase price to be used at the next sale, less the salvage value of the bull provided the problem is not caused by injury or disease contracted since taking delivery.

Any claim must be accompanied by the relevant Veterinary Certificate.

A BRIEF DESCRIPTION OF EBVS AND \$INDEX VALUES

The following is a brief description of **Angus GROUP BREEDPLAN EBVs** and **Breedobject \$Index Values** and Accuracies. For a more detailed explanation of these please refer to the Angus Society of Australia web site (<http://www.angusaustralia.com.au>).

Angus GROUP BREEDPLAN is an advanced genetic evaluation system that provides a genetic description of Angus cattle for a comprehensive range of traits influencing fertility, growth and carcase performance. It provides predictions of the genetic merit of individual animals called Estimated Breeding Values (EBVs). EBVs are based on all available pedigree and performance records provided by breeders in Australia and New Zealand, along with available overseas genetic information.

EBVs are expressed in the units of measurement for each particular trait, and are shown as +ive or -ive differences from the breed base. The average EBV for different traits changes over time as the breed makes genetic progress. The averages for calves born in 2011 are shown below. These averages provide a useful benchmark for comparisons of EBVs for individual animals.

February 2014 ANGUS GROUP BREEDPLAN AVERAGE EBVs FOR ALL 2012 DROP CALVES

Calving Ease Direct	Calving Ease Dtrs	Gestation Length (days)	Birth Wt (kg)	200-Day Wt (kg)	400-Day Wt (kg)	600-Day Wt (kg)	Mature Cow Wt (kg)	Milk (kg)
+0.0	+0.4	-3.3	+4.5	+40	+75	+94	+85	+13

Days to Calving	Scrotal Size (cm)	Carcase Wt (kg)	EMA (sq cm)	Rib Fat (mm)	Rump Fat (mm)	Retail Beef Yield%	Intra-Muscular Fat %	Docility (Trial)
-3.4	+1.5	+54	+4.2	-0.1	+0.0	+0.4	+1.3	+3

February 2014 AVERAGE BREEDOBJECT \$INDEX VALUES FOR ALL 2012 BORN CALVES

Long Fed/CAAB Index (\$)	Heavy Grass Fed Steer Index (\$)	Short Fed Domestic Index (\$)	Terminal Index (\$)
+\$104	+\$83	+\$73	+\$73

ACCURACY (%) ~ Provides an indication of the reliability of an EBV. As more performance information becomes available on an animal (or it's progeny, or relatives) then the accuracy of it's EBVs for particular traits will increase. See Understanding Accuracies (http://www.angusaustralia.com.au/BP_Understanding_Accu.htm) for a more detailed explanation.

TRAITS OBSERVED ~ Indicates those traits that have been recorded and are contributing to the EBV's calculated for an animal. *(These should appear directly below the table displaying the animals EBV's).*

CALVING EASE DIR (%) ~ Estimates of the genetic differences between animals in the ability of their calves from 2 year old heifers to be delivered without assistance.

CALVING EASE DTRS (%) ~ Estimates of the genetic differences between animals in the ability of their 2 year old daughters to calve without assistance.

GESTATION LENGTH (DAYS) ~ Estimates of the genetic differences between animals in the number of days from the date of conception to the calf birth date.

BIRTH WT (KG) ~ Estimates of the genetic differences between animals in calf birth weight.

200-DAY WT (KG) ~ Estimates of the genetic differences between animals in liveweight at 200 days of age.

400-DAY WT (KG) ~ Estimates of the genetic differences between animals in liveweight at 400 days of age.

600-DAY WT (KG) ~ Estimates of the genetic differences between animals in liveweight at 600 days of age.

MATURE COW WEIGHT (KG) ~ Estimates of the genetic differences between animals in cow weight at 5 years of age.

MILK (KG) ~ Estimates of the genetic differences between animals in milk production, expressed as variation in 200-day weight of daughter's calves.

SCROTAL SIZE (CM) ~ Estimates of the genetic differences between animals in scrotal circumference at 400 days of age.

DAYS TO CALVING ~ Estimates of the genetic differences in female fertility, expressed as the number of days from the start of the joining period until subsequent calving.

CARCASE WEIGHT (KG) ~ Estimates of the genetic differences between animals in carcass weight, adjusted to 650 days of age.

EYE MUSCLE AREA (CM²) ~ Estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site, in a 300kg carcass.

RIB FAT (MM) ~ Estimates of the genetic differences between animals in fat depth at the 12/13th rib site, in a 300 kg carcass.

RUMP FAT (MM) ~ Estimates of the genetic differences between animals in fat depth at the P8 rump site, in a 300kg carcass.

RETAIL BEEF YIELD % (RBY%) ~ Estimates of the genetic differences between animals in percentage retail beef yield, in a 300kg carcass.

INTRA-MUSCULAR FAT % (IMF%) ~ Estimates of the genetic differences between animals in percentage intramuscular fat (marbling) at the 12/13th rib site, in a 300 kg carcass.

DOCILITY TRIAL ~ Docility EBVs are expressed as differences in the percentage of progeny that will be scored with acceptable temperament (ie. either “docile” or “restless”). Higher, more positive, Docility EBVs are more favourable. For example, a bull with an EBV of +20 would be expected to on average produce 15% more progeny with acceptable temperament than a bull with an EBV of -10.

NET FEED INTAKE TRIAL (KG/DAY) ~ Estimates of the genetic differences between animals for feed efficiency. For a more detailed explanation of Group BREEDPLAN EBV's and Accuracies, please refer to Understanding EBVs (http://www.angusaustralia.com.au/BP_Understanding_EBVs.htm) and Understanding Accuracies (http://www.angusaustralia.com.au/BP_Understanding_Accu.htm).

Long fed / Certified Australian Angus Beef \$ Index ~ based on a high fertility self replacing commercial Angus herd where steers are grown out to be long fed for the high quality, high marbled Japanese export market. Selection of animals using this index will increase IMF % of your herd, and emphasis is also placed on 600 day growth.

Short Fed Domestic \$ Index ~ based on a high fertility self replacing Angus herd selling feeder steers and heifers for the short fed domestic feedlot trade. Emphasis is placed on growth to 400 days and high carcass yield while maintaining fertility and marbling.

Heavy Grass Fed Steer \$ Index ~ based on a self replacing herd that sells heavy grass fed steers for markets like the EU and light grass fed Jap Ox. Emphasis is on growth and carcass yield while maintaining fertility and marbling.

Terminal \$ Index ~ for herds where no animals are kept for breeding. For example using Angus bulls over dairy cross cows for vealer production or over tropical cows with steers and heifers grown out for short feeding. Emphasis is on growth and carcass yield with no weighting placed on calving ease, female fertility or milk.

NB. Actual \$Index Values for individual animals are sensitive to the assumptions used in the BREEDOBJECT analysis used to calculate the selection index. Please refer See Understanding \$Index Values (http://www.angusaustralia.com.au/BP_Understanding_Index.htm) for a more detailed explanation. NB. EBVs and \$Index Values are calculated using software developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and The University of New England. Ongoing research and development at AGBU is supported by funding provided by Meat and Livestock Australia.

IMPORTANT NOTICES FOR PURCHASERS

~ SALE CATALOGUE DISCLAIMER ~

All reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor nor the selling agents make any other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in this catalogue. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

~ DNA PATERNITY VERIFICATION ~

It is a requirement of Angus Australia that all bulls used to sire calves for registration in the Angus Australia Herd Book Register, Red Angus Register or Angus Performance Register must have been DNA paternity verified if they are born in or after the 'Y' year (2003). Buyers intending to use bulls listed in this catalogue to produce calves to be registered in these registers should obtain DNA paternity verification on those bulls before they are used for breeding.

~ PRIVACY INFORMATION ~

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYER'S OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO THE ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its databases and disclosing that information to its members on its website.

*I, the buyer of animals with the following registration numbers
..... from
member (name) do not consent to Angus Australia
using my name, address and phone number for the purposes of effecting a change of registration of
the following animal(s) that I have purchased, maintaining its databases and disclosing that
information to its members on its website.*

Signature:

Date:

*Please forward this completed consent form to Angus Australia, Glen Innes Road, Locked Bag 11,
Armidale NSW 2350. If you have any queries, please telephone 02 6772 3011 or
e-mail office@angusaustralia.com.au.*

Angus GROUP BREEDPLAN EBV percentile bands for animals born in 2012*

Use this table as a guide to compare individual animals with the current genetic level of the Angus breed

The Kilns

Staying at the kilnhouses at Alpine Angus is a unique experience where contemporary luxury and design is combined with the stunning beauty of the Ovens Valley landscape in Porepunkah. The three houses – **Cavedon's Kilnhouse**, **Chinaman's Kilnhouse** and **The Sorting Shed** – are each in a separate part of the Alpine Angus stud. Each of the houses have spectacular views of Mount Buffalo, Feathertop and Bogong, with grape vines and - alpine angus cattle.

For bookings or enquiries
www.kilnhouse.com.au or call
Clare Delany 0408553332 or
the onsite kilnhouse manager
Elissa Oswin 0400733170

Te Mania Modest M126

Sire: Ardrossan Modest W37

Ardrossan Wilcoola U21

Ardrossan Casino C18

C A Future Direction 5321

Dam: Ardrossan Princess W211

Ardrossan Princess Q87

Ardrossan Casino C18 NAQ C18

Casino is stamping his calves with exceptional length and thickness. They are powerful cattle, that visually are soft fleshed with a fantastic skin and have an impressive butt shape. They move extremely well with a balanced back leg set. His performance

figures have remained strong and with docility data now starting to come in he has gone straight to the top 10% for this trait also. It is pleasing to see his sons now performing well at other sales, as well as our own. We have 17 bulls and two females in this year's sale.

Currently a trait leader for 200, 400 and 600 days and for carcass.

Semen available from Agri-gene.

Te Mania Lowan Z53

Te Mania Emperor E343

B T Ultravox 297E

Dam: Te Mania Lowan Z74

Te Mania Lowan V201

Te Mania Emperor E343 VTME343

Te Mania Emperor was the high selling bull at the 2011 Te Mania sale where he stood out for his style, massive weight for age and performance. He made a then Australian record \$91,000. We had already used his sire Berkley, so purchasing

a package of Emperor semen was a logical extension. He is in the top 10% of the breed for an amazing 14 traits.

He produces strong, thick topped cattle with impressive growth. His first few sons to sell across the country last year met strong demand and his heifers were highly sort after at the Aberdeen Estate dispersal.

Selling 8 sons and 5 PTIC daughters from our leading cow families.

ACC	78%	74%	74%	70%	61%	46%	76%	63%	57%	63%	64%	57%	53%

Traits Observed: GL,BWT,200WT,400WT(x2),SS,FAT,EMA,IMF,DOC

Notes: First of the sons from our Wilcoola line cows, lot 6 is definitely bred in the purple, with his dam being by Dinky Di, who is leaving outstanding daughters -they would have produced our top 4 or 5 bulls last year. Well below breed average for Birth Wt, yet still top 10% for RBY% and top 20% for Carcase Wt and HGF Index.

BREEDOBJECT \$INDEX VALUES			
Long Fed/CAAB	Heavy Grass Fed	Short Fed Dom	Terminal
+\$119	+\$96	+\$81	+\$80

Lot 7 ALPINE HIGH FLYER H190 (AI) Ident: CGKH190

Traits Observed: GL,BWT,200WT,400WT(x2),SS,FAT,EMA,IMF,DOC

Notes: High Flyer is a standout whichever way you look at it. He was easily the top scanning out of 70 Spring bulls for both eye muscle and IMF, as well as being in the top 3 for weight and fat. The majority of his EBVs and Indexes sit in the top 1% or 5% of the breed and his dam is a Dinky Di stemming from our famous Q6 line.

Traits Observed: BWT,200WT,400WT(x2),SS,FAT,EMA,IMF

Notes: Again a calving ease prospect by Full House. The sire of Full House is renowned for producing big growth, sound quiet cattle and his dam is a sister to the two highest selling Australian Angus females. H373 is low birth with Carcase Wt and EMA in top 5% of breed, growth and Indexes in top 10% and IMF top 20%.

Bringing Your New Bull Home

BRINGING YOUR NEW BULL HOME

PURCHASE

DELIVERY

AFTER PURCHASE TIPS

ARRIVAL

MATING NEW/ YOUNG BULLS

MANAGING OLDER HERD BULLS

DURING MATING

NORTHERN AUSTRALIA

When purchasing a bull, care and handling after the sale can be as important as the purchase itself. Looking after your bull well during the initial stages of his working life may ensure longevity and success within your breeding herd.

Purchase

Temperament is an important characteristic when selecting a bull. Selecting a bull that may be flighty or aggressive will make life difficult for you each time he is handled. Note which bulls continually push to the centre of a mob, run around, or are unreasonably nervous, aggressive or excited.

At the sale, note any changes of temperament by individual bulls. Some bulls that are quiet in the yard or paddock may not like the pressure and noise of the auction and become excited. Others that were excited beforehand get much worse in the sale ring and can really perform. Use the yard or paddock behaviour as a guide, rather than the temperament

shown in the ring.

Delivery

When transporting your new bull insurance against loss in transit, accidental loss of use, or infertility, is sometimes provided by vendors. Where it is not, it is worth considering.

After purchase tips:

- When purchasing, ask which health treatments he has received.
- Treat and handle him quietly at all times - no dogs, no buzzers. Talk to him and give him time and room to make up his mind.
- With more than one bull from different origins, you must be able to separate them on the truck.
- Make sure that the truck floor is covered to prevent bulls from slipping. Sand, sawdust or a floor grid will prevent bulls from being damaged by going down in transit.

- If you can arrange it, put a few quiet cows or steers on the truck with the bull. Let them down into a yard with the bulls for a while before loading and after unloading.
- Unload and reload during the trip as little as possible. If necessary, rest with water and feed. Treat bulls kindly—your impatience or nervousness is easily transmitted to an animal unfamiliar to you and unsure of his environment.

If you use a professional carrier:

- Make sure the carrier knows which bulls can be mixed together.
- Discuss with the carrier, resting procedures for long trips, expected delivery time, truck condition and quiet handling.
- Give ear tag and brand numbers to the carrier and make sure you have the carrier's phone number.
- If buying bulls from interstate, organise any necessary health tests before leaving and work out if any other requirements must be met before cattle can come into another State.

When buying bulls from far away, you may often have to fit in with other delivery arrangements to reduce cost. You should make it clear how you want your bulls handled.

Arrival

When the bull or bulls arrive home, unload them at the yards into a group of house cows, steers or herd cows. Never jump them from the back of a truck directly into a paddock—it may be the last time you see them. Bulls from different origins should be put into separate yards with other cattle for company.

Provide hay and water, then leave them alone until the next morning.

The next day, bulls should receive routine health treatments. If they have not been treated before, all bulls should be vaccinated with:

- 5-in-1 vaccine;
- vibriosis vaccine;
- leptospirosis vaccine (if in areas like the Hunter where leptospirosis exists);
- three-day sickness vaccine (if in areas where this sickness can cause problems).

Give particular attention to preventing new bulls bringing vibriosis into a herd. Vibriosis, a sexually transmitted disease, causes infertility and abortions and is most commonly introduced to a clean herd by an infected bull. These bulls show no signs of the illness. Vaccinated bulls are free from vibriosis, so vaccinating bulls against the disease should be a routine practice.

Vaccination involves two injections, 4–6 weeks apart, at the time of introduction, and then a booster shot every year. Complete the vaccinations 4 weeks before joining.

Consult with your veterinarian and draw up a policy for treating bulls on arrival and then annually. Bulls should be drenched to prevent introducing worms and, if necessary, should be treated for lice.

Plan to give follow-up vaccinations 4–6 weeks later.

Leave the bulls in the yards for the next day or two on feed and water to allow them to settle down with other stock for company. A bull's behaviour will decide how quickly he can be moved out to paddocks.

Mating new young bulls

Newly purchased young bulls should not be placed with older herd bulls for multiple-sire joining. The older, dominant bull will not allow the young bulls to work, and will knock them around while keeping them away from the cows.

Use new bulls in either single-sire groups or with young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later.

When the young bulls are working, inspect them regularly and closely.

Managing older herd bulls

Older working bulls also need special care and attention before mating starts. They should be tested or checked

every year for physical soundness, testicle tone, and serving capacity or ability.

All bulls to be used must be free-moving, active and in good condition. Working bulls may need supplementary feeding before the joining season to bring up condition

During mating

- Check bulls at least twice each week for the first 2 months. Get up close to them and watch each bull walk; check for swellings around the sheath and for lameness.
- Have a spare bull or bulls available to replace any that break down. Replace any suspect bull immediately.
- Rotate bulls in single-sire groups to make sure that any bull infertility is covered. Single-sire joining works well but it has risks. The bulls must be checked regularly and carefully, or the bulls should be rotated every one or two cycles.

Bulls are a large investment for breeding herds and they have a major effect on herd fertility. A little time and attention to make sure they are fit, free from disease and actively working is well worthwhile.

Northern Australia

Although the Angus breed originated in a cooler climate, they can adapt to subtropical regions with many straight-bred and cross bred producers finding success in Northern Australia. Some of the following information may also be helpful for new bulls located in more temperate climates.

Adaptation

The key to Northern success for Angus is that cattle introduced from the Southern regions of Australia be allowed to adapt to their new environment before commencing their working life. If possible, a break of 3 months is advisable before you set your bull to work.

Purchase in cooler months

Ensure your bulls are in good condition before they do commence their working life. The cooler months are an ideal time to purchase and introduce Angus cattle, allowing them plenty of time to acclimatise.

Change of feed source

When inducting Angus cattle into your herd consider their source of feed. Have you taken an animal which has been supplemented on grain straight to a dry pasture? Animals should be gradually changed over to their new feed to ensure they do not lose condition. This may involve using supplements which could include dry lick/urea blocks.

Managing Cattle Ticks

For ticky areas, bulls should be vaccinated prior to transport and given another booster afterwards. Remember males are more susceptible to ticks than females.

AGRI-GENE

We're here when you need us.

The business of farming is not for everyone. But like you that's the business we're in.

With 170 years experience, Elders has the livestock knowledge to support your business. We market over 2.3 million cattle and 13.5 million sheep each year. But there's so much more we can offer. Our specialist animal health services and exclusive ELMS protocols improve the health, weight and quality of your cattle and sheep, whether they're on the farm, in transit or in the yard. And through traditional or online auctions, forward contracts or direct to processor, we ensure more options for buyers and sellers. So, when you're looking for the best livestock partner, we're here when you need us.
