

The 2017 Alpine Angus Autumn Bull Sale

Presenting 100 HBR and APR Registered Angus Bulls.
To be held at the Alpine Sale Complex, Rosewhite on
Tuesday 7 March at 1pm.

After a successful 2016 Alpine Angus is looking forward to the 2017 bull selling season with our first sale being the Alpine Autumn Bull Sale where approximately 100 HBR and APR Angus Bulls will be offered at the earlier sale date of Tuesday 7 March at 1 pm at the Alpine Sale Complex at Rosewhite.

2016 was a watershed year for Alpine Angus – all up over 160 Angus bulls sold through our sale ring at Auction last Autumn and Spring for an average of \$4600. This was achieved in conjunction with Jim and Suzy Martin as they sold the last of their Welcome Swallow bulls through our sale ring after dispersing their females in 2015.

Alpine purchased a number of females at the Welcome Swallow Complete Dispersal in 2015 as well as their embryo calves in utero in a co-op herd in Northern NSW. These purchases along with the natural growth in our female numbers has set the stage for Alpine to maintain into the future the increased offering with approx. 100 Bulls at the upcoming Autumn Bull Sale with a further 60 to be offered at our Spring Sale in September later this year.

The timing of our expansion has been in the making for a number of years. Our aim is to be able to offer clients with larger herds the opportunity to put together large lines of bulls of the same bloodlines so as to help them breed more consistently whilst at the same time offering the smaller producer more choice so they are not forced to chase one bull at Auction. Another key objective is to ensure value for our clients which the larger volume is designed to deliver.

The Autumn sale line-up comprises one third rising two year olds and two thirds 16–18 month old Angus HBR & APR Bulls. Also among the offering will be 23 Welcome Swallow bred embryo Bull calves. These calves stem from the elite of the Welcome Swallow cow families and for ease of identifying include WS in their name.

The genetic focus at Alpine is to breed structurally sound cattle with great temperament plus performance – calving ease and growth spread are seen as foundations to the profitability of our beef

producer clients. The sale line up consists of big lines of Coonamble Z3 bloodlines with 25 grandsons in the sale. TC Total bloodlines are also strongly represented with 25 grandsons. Other sires represented include VAR Reserve a widely used AI Sire who has approximately 20 sons in the sale as well as TenX and his son Deer Valley All In.

All Sale bulls are independently assessed by Ian Moreland accredited with the Angus Society – we rate his experience and skill at this task highly – as do many other seedstock operations. The Autumn Sale line up are a true representation of the type and structural integrity of our herd. Please take time to have a good look at these scores. Clearly the Welcome Swallow program has similarly done their due diligence as their structural scores are also excellent. The true strength of the sale line up is the pastern angle of the bulls and their fluid movement. So often the only thing looked at on structure assessment scores is the front claw score. This is very important but only a part of the picture – for it is when this score is combined with pastern angle scores and how an animal moves – the sum of all three is what provides a true reflection of an animal's structural integrity.

The reason we are so big on structural integrity is simple. After all when you go and buy a bull for breeding purposes it is these traits you are dealing with every time you go out to check or handle your stock. Numbers (EBVs) of course are important but equally or perhaps even more important to your herd's performance is the good temperament and structure of your cattle as this delivers an enjoyable, hassle free and profitable existence and enterprise.

When making your selection this Autumn we invite you to give the Alpine Autumn Bull Sale line up careful consideration!

We look forward to welcoming you to Rosewhite on Sale Day, Thursday 7 March 2017.

All the best,
Jim Delany Principal
Chris Oswin Manager

- On inspection Reserve was a strong muscled, long fronted bull with a quiet nature.
- Proven high calving ease sire with excellent progeny docility and big EMA.
- Throwing calves with tremendous thickness, temperament, butt shape and eye appeal.
- His sire is a noted producer of high production, moderate, low maintenance females.
- Dam is one of the hottest females in USA at present with over \$2,500,000 progeny sales in last 4 years and over 10 sons in AI collection centres.

- Long, strong and powerful with fluid movement was what we liked about Novak when we saw him.
- EBVs rate him as a high IMF bull with good birth to growth spread.
- Producing cattle with excellent structure, muscle pattern, shape and docility – a rare combination for a high IMF bull.
- Dam is now a donor at Alpine. She stems from one of the USA's most potent performance cow family's. The matron of this, GAR EXT 614 has produced over \$7,000,000 of progeny and is in the pedigree of many leading AI sires.

- Low Birth Wt Coonamble Z3 son with good frame and impeccable structure.
- Balance EBV set combining great calving ease, good growth and carcase and excellent docility.
- Few bulls can match his ability to consistently stamp his progeny with such correctness. Sired last years top priced Autumn sale bull who had perfect 5's for structure.
- Dam is out of the Australian record breaking Dream family and is a half sister to Australias two highest priced females. She has already produced 9 stud sires, three of which sired the top priced bulls at Alpine, Banquet and Onslow Angus bull sales last year.

- A thick topped Coonamble Z3 grandson with explosive early growth and near faultless type.
- His EBVs offer an incredible combination of calving ease, birth to growth, EMA and docility.
- Dam, Texas Undine Z183 has had a massive influence on the Texas Angus herd with sons topping no less than four of their Annual Sales. This includes Texas Mount K2, purchased by Welcome Swallow and Glenoch Angus for \$45,000 in 2015. At last count she had something like 16 sons working in Angus studs and Brangus bull breeding operations.

THE ALPINE BREEDING PHILOSOPHY

By Alpine Angus Manager Chris Oswin

The females behind our sale bulls are of the utmost importance to our program. The more uniform our cow herd, the more able we are to produce consistency in our bulls and consistency in the way they breed on.

The more we can bias our herds genetics towards the performance parameters we consider important without compromising on the basics, the more chance we have of developing a mob of cattle that have both the performance and durability to improve the true genetic potential and profitability of the herds and farms using our bulls.

The more we can stack pedigrees with similar desirable phenotypical and production traits, the greater the chance our cattle have of breeding with consistency and certainty. This is at the core of our breeding philosophy. It emphasises how important the female lines are in helping to produce consistent production.

It also helps to explain the reasoning behind the Sires we bring in to use.

We target AI Sires with big performance data, that are responsible in frame and tend to an earlier maturity pattern. We look to sirelines that have consistently produced phenotype with fleshing ability, muscle and good temperament. Most importantly we source those bred from females and female lines with a proven ability to produce superior cattle. We feel this gives us a much better balance of genes passed through to the next generation of our cattle. These elite female lines have often proved their worth over generations, producing high-value cattle and it makes sense to try to blend these genetics into our herd.

Computer mating programs are in widespread use within the seedstock industry – we choose not to use them. Many a marketing campaign has sought to sell a story about flash EBV sets. The numbers can indeed

The 2017 Alpine Angus Autumn Sale features 6 sons of Welcome Swallow Bando 9074 C136 (top) and 4 sons of Welcome Swallow X13 Foresight D121 (bottom)

look crash-hot but that is no guarantee of success if the progeny are not structurally sound or have a bad temperament. These are everyday traits not used in computer analyses so they leave out consideration of the traits and characteristics that make running cattle on a day-in day-out basis that much easier and more profitable. Our job is to blend the two extremes to develop high performance cattle that are easy to handle, who breed consistently and excel, and last in the paddock where it counts.

We are fortunate to have a strong core group of outstanding foundation matrons whose influence has spread throughout our herd and beyond. We have selectively added a couple of potent cow families to this mix in recent years and now look forward to the introduction of key Welcome Swallow female lines into our herd. It is a rare opportunity to tap into core breeding females that
