ALPINE GUARANTEE

YEAR 1:

(until conclusion of first breeding season)

Commercial Buyers: 100% Unconditional Guarantee for Feet & Fertility.

= (Purchase price – salvage value) × 100%

Which can be used as a credit for the purchase of a replacement bull as soon as available e.g (Purchase price \$6,000 – salvage value \$2,000) × 100% = \$4,000 Credit (ex GST).

Commercial Buyers: 66% Unconditional Guarantee for Death & Accidental Injury.

= (Purchase price – salvage value) × 66%

Which can be used as a credit for the purchase of a replacement bull as soon as available e.g (Purchase price \$6,000 – salvage value \$2,000) × 66% = \$2,640 Credit (ex GST).

Stud Buyers: 100% Guarantee for Feet & Fertility ONLY.

Guarantee does NOT cover accidental injury or death by misadventure. Stud Stock Insurance will be available Sale Day and is strongly recommended.

= (Purchase price – salvage value) × 100%

Which can be used as a credit for the purchase of a replacement bull as soon as available. e.g (Purchase price \$6,000 – salvage value \$2,000) × 100% = \$4,000 Credit (ex GST).

YEAR 2:

(until conclusion of second year breeding season)

66% Guarantee for Feet & Fertility ONLY.*

= (Purchase price – salvage value) × 66%

Which can be used as a credit for the purchase of a replacement bull as soon as available. e.g (Purchase price \$6,000 – salvage value \$2,000) × 66% = \$2,640 Credit (ex GST).

* Guarantee does not apply to injury or disease.

YEAR 3:

(until conclusion of third year breeding season)

33% Guarantee for Feet & Fertility ONLY.*

= (Purchase price – salvage value) × 33%

Which can be used as a credit for the purchase of a replacement bull as soon as available. e.g (Purchase price \$6,000 – salvage value \$2,000) × 33% = \$1,320 Credit (ex GST).

* Guarantee does not apply to injury or disease.

* In all cases, commercial buyers and stud buyers, the guarantee covers the purchase value of the bull, without interest, costs and damages (if any).

* The salvage value is retained by purchaser.

* A veterinary certificate must be supplied by the purchaser upon request.

In addition to the above guarantee, Alpine Angus endeavour to keep a team of back up bulls for commercial clients who have bull breakdowns. If available the back up bull service is free including delivery and collection.

SALE INFORMATION

OUR QUALITY ASSURANCE

All Sale bulls must complete the following before being deemed suitable to be offered for sale:

- Semen quality test and physical inspection by Haydn Shipard.
- Independent structural assessment by Ian Moreland from Studcare Genetics (see page 15 for further details).
- Performance recorded HBR or APR with Angus Breedplan.
- 7 in 1 vaccination (2 initial and then annually).
- Vibrio vaccination (2 initial and then annually).
- Sale bulls drenched just prior to sale day. Please refer to the NVD.
- Pestivirus earnotch test negative PI plus Pestiguard vaccination (2 initial and then annually).

CATERING

Morning tea and a delicious beef lunch will be provided on Sale Day.

PRE SALE INSPECTION

Private inspections prior to sale day by appointment are welcomed. Bulls will be yarded for inspection by 10am on sale day.

OUTSIDE AGENT REBATE FOR BULL SALE

A 5% Rebate will be paid ONLY to those outside agents who ACCOMPANY buyers to the sale OR to those who INTRODUCE BUYERS IN WRITING 24 hours prior to the sale.

A 2% Rebate will be paid to Agents who handle the sale transaction only.

GST

All bulls are sold GST exclusive.

TRANSFER OF REGISTRATION

All bulls will be transferred on the Angus Australia Register. If you have an Angus Society prefix, please provide it when registering.

FREE FREIGHT & DELIVERY

The purchase price paid for bulls includes free delivery by Alpine Angus up to 250km by road from the Alpine Sales Complex. Please note every effort will be made to ensure that delivery will take place within 2 weeks of sale day. Buyer co-operation in co-ordinating delivery is greatly appreciated.

Outside of this we will endeavour to assist in any way we can. If bulls are needed ASAP, please let us know.

GENETIC CONDITIONS

All Sale Bulls offered whose pedigree indicates a possibility of being a Carrier for AM, NH, CA or DD have been tested. The gene status is clearly marked next to the heading for each Lot.

DELAYED EBVS (LOTS 1, 15, 46, 47, 89 & 96)

Due to an unforeseen delay in receiving DNA results from Zoetis, the above listed bulls will not have accurate EBVs until the next Breedplan analysis, which will occur mid February. We have incorporated their mid parent EBVs which will give a general representation of where their EBVs will sit. Their updated EBVs will be available online from mid February and on the Sale Day supplementary sheet.

We are also awaiting genetic defect results on lots 80 & 93 and these will also be on the supplementary sheet.

DISCLAIMER

Whilst all care and attention has been paid to accuracy in the compilation of this catalogue, neither the vendors, selling agents or representatives thereof assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this sale catalogue.

WELCOME

Please join us at the 2019 Alpine Autumn Bull Sale. This year we will offer 96 Alpine bred HBR and APR registered bulls for sale by auction.

The sale team reflects our continued commitment to breeding quiet, sound, structurally correct bulls with a focus on birth to growth spread and carcase traits. Our breeding philosophy centres around selecting animals we feel can contribute significantly to our herd's phenotype by blending high performance sires with our strong and consistent female base.

Our aim is to reflect quality and consistency of phenotype with a good birth to growth spread from lot 1 right through to lot 96. That objective underpins the joining selections made 2-3 years ago the results of which are reflected in the sale catalogue.

The bulls offered in the sale this year are a combination of 2 year and 18 month old sires, independently structurally assessed, fertility tested, inoculated and ready to go to work.

All sale bulls have been independently structurally assessed by Ian Moreland. We value Ian's experience & independence. We encourage all readers of the catalogue to carefully read the structural scores on all the sale bulls. We think they stand up very well to scrutiny. Make sure that you compare the structural scores to other bulls that you may be considering from other programs. Structure is important. Bulls with good structure will last longer and stand the best prospect of passing on their good structure to their daughters, leading to improved quality and longevity in the female herds that they sire.

All sale bulls have been semen tested and assessed for fertility by Hayden Shipard. Hayden has decades of experience in bull fertility. We want to make sure that we do everything we can to make sure the bull that you buy gets your cows & heifers in calf.

For that reason also, all sale bulls have been ear notch tested PI free, vaccinated for Pestivirus, Vibriosis plus 7 in 1. To purchase a healthy bull is important.

We aim and seek to breed for good temperament in our bulls. Good temperament is better for us when handling bulls in the lead up to sale, more importantly, having good tempered bulls is important for those who buy bulls and are handling them after the sale for their first and later joinings. No-one wants a bad tempered bull. We do what we can in joining selection based on pedigree, in temperament scoring and in selecting the sale bulls to weed out bulls that are dodgy for temperament for inclusion in the sale.

The sires that we have selected and which make up the sires of bulls in the 2019 sale have been carefully selected for structure, phenotype and temperament. We are fortunate to enjoy a strong relationship with the WA Coonamble Angus program where structure and phenotype are key criteria. In our 2018 sales sons of Coonamble Hector, Junior and Elevator sold very well with an Elevator son topping our Autumn sale and a grandson topping our Spring sale. This year we have another first class lineup with 10 Hector and 7 Junior sons as well as 7 by Coonamble H176, an exceptional Elevator son that stands out for the growth and body his progeny exhibit.

There is a strong representation of low birth, high performance sires with outstanding Birth to Growth credentials such as Plattermere Weigh Up, V A R Discovery and Texas Mount K2. The type of bulls that can moderate birth without sacrificing kilograms at weaning and after.

We are very fortunate to have first class back up bulls working cows at Alpine. Those bulls include proven AI sires in their own right. Karoo Knockout, Sterita Park Black Jack and Bowmont Jackpot are all marketed

by major AI companies and performed very well through 2018.

We are really pleased with the first crop of Knockout sons to feature in a sale; six in all; lots 28, 29, 30, 62, 63 & 85. Whilst these 6 lots represent the opportunity to get in early Knockout is an exciting young sire and we look forward to his progeny featuring in Alpine sales into the future.

Black Jack, showed his class in the carcase context in 2018 when Rutherglen High School school exhibited the grand champion carcase at the 2018 Royal Melbourne show – an Alpine steer that we provided to the school and they did the rest. Well done Rutherglen High.

Jackpot sons met popular demand in 2018 with his best result being at the Hazeldean Spring Bull sale where he sired three out of the top four priced bulls. Hazeldean High Roller is another quality herd bull that has seen use in Angus stud herds. A High Roller son topped our 2017 Spring Sale. He is a higher marbling sire that excels in maternal performance and has breed leading docility and structure EBVs.

Experience of past Alpine sales shows that purchasers can be assured that they will get great value and choice and strong after sales support as needed when purchasing at the 2019 Alpine Autumn Bull Sale. That is our commitment.

For the last 15 years the local St Vinnies have done a great job catering for all who have attended our annual autumn sale. Unfortunately, like most of us, they have got a little older over the last 15 years. We are very pleased that the local Rosewhite CWA has agreed to take over the 2019 sale catering from St Vinnies. The Rosewhite CWA formed after the Black Saturday fires and are going strong.

We look forward to seeing you at the sale.

Chris Oswin and Jim Delany

THE ALPINE ANGUS LEGACY

1.

2.

3.

4.

5.

1. SRKJ310 BOWMONT JACKPOT

Alpine Angus owned AI Sire with semen marketed by Genetics Australia. 6 sons in sale.

2. VLYZ191 LAWSONS DINKY DI

Alpine Angus owned AI sire who was one of the high use sires of his time with over 3,700 registered progeny. Low Birth, high Carcase and maternal Traits. Features in pedigree of many of our females.

3. NAQC18 ARDROSSAN CASINO

Alpine Angus owned AI sire with over 600 registered progeny. Stamps his cattle with length, presence and structure. Features in pedigree of many females.

4. CGKJ260 ALPINE JAGGER

Stud sire at JB Angus, Naracoorte SA. Used in our AI program for the length and barrel he transmits to his progeny and has two sons in this year's sale.

5. HSHF12 LARGO FULL HOUSE

Alpine owned herdsire who has been a mainstay of our program over the last 5 years. Excels at producing sound, good footed cattle. Has 5 sons in this year's sale.

6. NJWG279 MILWILLAH GATSBY

We are a part owner in this current AI sire with exceptional carcase numbers. Daughters are first class. Semen marketed by ABS Australia.

7. VTML107 TE MANIA LONGSHOT

Alpine owned sire. High Indexing, big IMF, excellent docility and very sound. Semen used by some influential breeders.

8. NENM367 KAROO MAIN EVENT

A new addition to our sire battery. \$25,000 top priced bull at Karoo last Spring and closely related to Knockout. M367 assessed with perfect 5's for structure. Pictured a week after running with 45 cows.

8.

6.

7.

9. CGKM268 ALPINE ELEVATOR

\$18,000 top priced bull at last Autumn's bull sale, selling to Wes Hall from Tasmania. Has been used in our AI & ET programs.

10. CGKM245 ALPINE MUZZA

Full brother to M268 and retained by Alpine. Like his flush brother has excellent structure and scored perfect 5s for structural assessment. Their dam is one of Coonamble's top cows. Pictured a week after running with 45 cows.

11. SPLJ231 STERITA PARK BLACK JACK

AI sire owned by Alpine Angus and Sterita Park Angus, semen marketed by ABS Australia. Sired grand champion carcass Melbourne Royal. Has 6 sons in sale.

12. DXTH126 TEXAS HOLD'EM H126

Alpine owned sire and calving ease King. Unfortunately dead but plenty of daughters making their way into our herd.

13. CGKM339 ALPINE JAEGER M339

\$16,000 top priced bull at last year's Spring sale. High quality Coonamble line bull purchased by Stuart Bewley, Bewmont Angus.

14. NENK176 KAROO KNOCKOUT

Exciting herd sire part owned with Texas Angus. Semen marketed by Agri Gene. Has 6 sons in this year's sale.

15. CGKL004 ALPINE EQUATOR L004

Equal top priced bull in 2017 Autumn Bull Sale. Leased back by Alpine this year and working cows. Dam is QHEB37 owned by Alpine & Coonamble. B37 is from the Tracey family, a cowline unrivalled in their ability to produce high quality sires such as Frankel, Docklands & Yogi.

16. CGKM172 ALPINE HECTOR

One of the high sellers in last Autumn's sale, purchased by Nani DiGiorgio, Sterita Park Angus. By Hector out of a Gatsby daughter and with perfect structure scores, M172 has been used in our AI program.

* The percentile bands represent the distribution of EBVs across the 2017 drop Angus and Angus influenced animals analysed in the February 2019 Angus Australia BREEDPLAN genetic evaluation.

SUMMARY OF ANGUS EBVs & \$ INDEX VALUES

The following is a brief description of EBVs and \$Index values and Accuracies.

Accuracy (%) – Provides an indication of the reliability of an EBV. As more performance information becomes available on an animal (or it's progeny, or relatives) then the accuracy of it's EBVs for particular traits will increase. See Understanding Accuracies for a more detailed explanation.

Calving Ease DIR (%) – Estimates of the genetic differences between animals in the ability of their calves from 2 year old heifers to be delivered without assistance.

Calving Ease DTRS (%) – Estimates of the genetic differences between animals in the ability of their 2 year old daughters to calve without assistance.

Gestation Length (Days) – Estimates of the genetic differences between animals in the number of days from the date of conception to the calf birth date.

Birth Wt (kg) – Estimates of the genetic differences between animals in calf birth weight.

200-Day Wt (kg) – Estimates of the genetic differences between animals in liveweight at 200 days of age.

400-Day Wt (kg) – Estimates of the genetic differences between animals in liveweight at 400 days of age.

600-Day Wt (kg) – Estimates of the genetic differences between animals in liveweight at 600 days of age.

Mature Cow Weight (kg) – Estimates of the genetic differences between animals in cow weight at 5 years of age.

Milk (kg) – Estimates of the genetic differences between animals in milk production, expressed as variation in 200-day weight of daughter's calves.

Scrotal Size (cm) – Estimates of the genetic differences between animals in scrotal circumference at 400 days of age.

Days to Calving – Estimates of the genetic differences in female fertility, expressed as the number of days from the start of the joining period until subsequent calving.

Carcase Weight (kg) – Estimates of the genetic differences between animals in carcase weight, adjusted to 650 days of age.

Eye Muscle Area (cm²) – Estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site, in a 300kg carcase.

Rib Fat (mm) – Estimates of the genetic differences between animals in fat depth at the 12/13th rib site, in a 300 kg carcase.

Rump Fat (mm) – Estimates of the genetic differences between animals in fat depth at the P8 rump site, in a 300kg carcase.

Retail Beef Yield % (RBY%) – Estimates of the genetic differences between animals in percentage retail beef yield, in a 300kg carcase.

Intra-Muscular Fat % (IMF%) – Estimates of the genetic differences between animals in percentage intra-muscular fat (marbling) at the 12/13th rib site, in a 300 kg carcase.

Trial Net Feed Intake (NFI) – Estimates of the genetic differences in feed intake for animals adjusted to the same growth rate and weight base.

Following a review last year a whole suite of new Selection Indexes were introduced with the December 2014 Group Breedplan run. The objective with the new Indexes was to bring them into line with the changes in cattle markets over time.

Angus Breeding Index – estimates the genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls.

This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.

The Angus Breeding Index is particularly suited to commercial producers who sell progeny into different markets, or to seedstock producers supplying bulls to commercial clients who produce for a range of different production systems and market end points.

Domestic Index – estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade. Steers are assumed to be finished using either grass, grass supplemented by grain or grain (eg. 50 – 70 days) with steers slaughtered at 490 kg live weight (270 kg carcase weight with 12 mm P8 fat depth) at 16 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. Emphasis has been placed on eating quality and tenderness to favour animals that are suited to MSA requirements.

Heavy Grain Index – estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.

Steers are assumed to be slaughtered at 760 kg live weight (420 kg carcase weight with 30 mm P8 fat depth) at 24 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. There is a significant premium for steers that exhibit superior marbling.

Heavy Grass Index – estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.

Steers are assumed to be slaughtered at 620 kg live weight (340 kg carcase weight with 12 mm P8 fat depth) at 22 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. Emphasis has been placed on eating quality and tenderness to favour animals that are suited to MSA requirements.

- By Connealy Forward a thickset bull by the same sire as Sitz Upward. Their sire Connealy Onward is one of the leading foot quality sires in America according to newly released structural EPDs.
- Black Jack is a strong bodied, well muscled sire who produces moderate calves with plenty of top. His daughters are standouts in our first set of heifers and are due to start calving soon.
- Sons have sold to \$18,000 and as an added bonus was sire of last years Royal Melbourne Show Grand Champion carcass.
- Dam is also the mother of Sydgen Trust, one of the USA's leading AI performance sires.

- Ten X son, that like his sire takes performance combined with Birth to an amazing level. His growth EBVs are extraordinary and to combine these with such a low birth weight makes Discovery a rare genetic package. Bred very similarly to Deer Valley All in who also has a couple of sons in this years sale.
- Descends from a female lineage that is a massive stud sire producer in the USA and his grandam GAR Objective 2345 is one of Americas leading producers of Calving Ease and Marbling genetics. Her and her daughters are responsible for producing multiple high use AI sires.

- We inspected H176 at Lake Grace in W.A. as a four year old bull and were so impressed with his body, depth, structure and heavy fleshing that we tried to buy him. Unfortunately we couldn't so settled on semen instead.
- His sire Coonamble Elevator is a dominant producer of high growth, sound, quiet cattle and produced our top price bull in the 2018 Autumn Sale.
- His dam, D94 is one of Coonambles best. She is by Booroomooka Warwick, a noted sire of deep bodied, quiet, easy doing cattle with first class structure and D94 is built exactly in this vein. She has produced numerous high quality and stud sires and we have quality calves on the ground by H176's full brother, Coonamble Leader L325.

BEEF CLASS STRUCTURAL ASSESSMENT

HOW TO USE THE BEEF CLASS STRUCTURAL ASSESSMENT SYSTEM

The 2019 Alpine autumn sale bulls were independently assessed in January 2019 by Ian Moreland.

The Beef Class Assessment System uses a 1–9 scoring system for feet and leg structure;

- A score of 5 is ideal. (Note: Except for Temperament Score where score of 1 is preferable – refer notes below)
- A score of 4 or 6 shows slight variation from ideal, but this includes most animals. An animal scoring 4 or 6 would be acceptable in any breeding program.
- A score of 3 or 7 shows greater variation but would be acceptable in most commercial programs.
- A score of 2 or lower or 8 & higher are low scoring animals and are culled.

Abbreviations:

FC: Front Claw

RC: Rear Claw

FA: Front Foot/Pastern Angle

RA: Rear Foot/Pastern Angle

RS: Rear Leg Side View

RH: Rear leg Hind View

HOW TO USE THE BEEF CLASS TEMPERAMENT SCORE

- A score of 1 is ideal.
- The score is evaluated as bulls leave the crush when being assessed for structure at approx 18 mths. This is not ideal as peer group behaviour in the yards can distort the result so in future these assessments will be made at weaning.

Structural problems in cattle have a substantial effect on both the reproductive and growth performance of a beef herd. It is widely recognised that structural problems in sires have detrimental effects on conception rates, calving patterns and thus profitability. Similarly, females with inadequate structural characteristics are more prone to weaning lighter calves or conceiving later in the breeding season than their more functional counterparts. These structural problems are filtered through the supply chain resulting in reduced income for the producer, feedlot and thus reducing the overall productivity of the Australian Beef Industry. The current trend for improving consistency and quality has shifted producers' focus, towards selecting seedstock on carcase and growth genetic traits (EBVs). Whilst, this selection has been, and will continue to be pivotal in developing the Australian beef industry, we must not forget the fundamentals of livestock breeding. The Independent Assessment System was designed by the MLA, the BIA and several breed societies to address structural problems in the beef industry. Detailed analysis of three thousand genetically linked herds indicated that structural characteristics such as leg and foot structure were moderately to highly heritable.

First of 3 H176 sons and like lot 1 a product of th Blackbird cow family.
We used H176 with the aim of producing soft bodied, quiet, high growth bulls with decent muscle expression and he has worked a treat.

YTHANBRAE EXT R36

N133 is long and correct with plenty of growth. We used the sire J7 over some older cows with decent production records and have been very impressed with the growth of the calves. Top 1% of breed for growth traits and Carcase Wt.

Unfortunately there was a problem with a batch of hair samples we sent to Zoetis in November and N132 got caught up in the mess. We have just used his mid parent EBVs but expect his numbers to be big! He was easily our heaviest calf at weaning.

Mid parent EBVs. EBVs available mid-February

RODWELLS

LOCAL SERVICE NATIONAL STRENGTH

It's a trust thing

Representative, negotiator, ally, and mate – this is a relationship business.

At Rodwells we are known for our team of local, experienced, independent livestock specialists and property agents across Victoria, New South Wales and South Australia.

Backed by the strength of a national network, our Rodwells agents deliver the most effective solution tailored for your livestock. Our knowledge and experience in local markets and seasonality means that you can trust us to deliver the highest standard of service.

And as part of the Ruralco group of businesses, we are able to draw on the resources of Ruralco Property, providing real estate agency services in both rural and residential markets, as well as a comprehensive property management service.

Our agents have access to up-to-the-minute market intelligence, including market trends and performance statistics, and are committed to securing successful buying and selling results for their clients.

Whatever your livestock or property needs, we are confident our service offering provides the best possible outcomes at all levels of the industry supported by our ethos of Local Service, National Strength.

- ▶ Beast Mode will be our most sought after bull in 2018. A Prophet son from one of the most world renown cows and sire producers currently standing in the USA.
- ▶ He has an excellent set of EBV's that few can match for calving ease with huge growth and marbling over +3. His first Australian calves are due to hit the ground in the next few weeks. Be sure to include this bull in your Autumn matings to avoid getting left behind.

- ▶ An outcross Reality son whose pedigree is stacked with maternal quality on the bottom side. He displays awesome capacity & muscling & is a great option to go back over some of today's high indexing pedigrees.
- ▶ Well balanced EBV's that offer calving ease with good growth, excellent fertility, fat cover and marbling.

The Kilns

Staying at the kilnhouses at Alpine Angus is a unique experience where contemporary luxury and design is combined with the stunning beauty of the Ovens Valley landscape in Porepunkah. The three houses – **Cavedon's Kilnhouse**, **Chinaman's Kilnhouse** and **The Sorting Shed** – are each in a separate part of the Alpine Angus stud. Each of the houses have spectacular views of Mount Buffalo, Feathertop and Bogong, with grape vines and – alpine angus cattle.

For bookings or enquiries

- Discovery has been the dominant sire in the USA over the past two years, with progeny topping sales right across the USA.
- Discovery has taken the term "curve bender" to a whole new level whilst keeping mature cow weight in check.
- A maternal pedigree that traces back to GAR Objective 2345, a leading donor at Deer Valley Farms and the dam of GAR Progress who is one of the highest marbling sires in the Angus breed.

AFTER SALES SERVICE AND MANAGEMENT OF BULLS

BUYING A BULL IS AN INVESTMENT. THIS INVESTMENT SHOULD CONTRIBUTE TO THE GENETICS AND SALE INCOME OF YOUR HERD FOR MANY YEARS. IF YOU ARE TO GET THE MOST FROM YOUR NEW BULL, IT PAYS TO LOOK AFTER HIM WELL, ESPECIALLY IN THE FIRST SEASON OF USE.

Please remember, when working bulls through the yards, handle them with care. Preferably work them with other cattle and do not use force.

OUR GUARANTEE

All Alpine bulls for commercial clients are guaranteed for up to three years from the date of sale. See p. 2 for details and conditions. Every effort has been made to ensure our bulls leave Alpine in top working order.

AFTER SALES SERVICE

Our 3 year guarantee is designed to deliver the best quality assurance. The sale of a bull we regard as the beginning of a relationship with our clients rather than the end of a 'deal'. We also believe we have a vested interest in helping our clients breeding programs in any way we can.

If you have any problems with your bulls or any other aspect of your breeding program we invite you to make contact with us regarding your concerns as soon as possible. We endeavor to keep a supply of back up bulls at all times in order to meet our guarantee obligations and as a service to clients whose bulls are accidentally injured.

ARRIVAL OF YOUR NEW BULL

Bulls can become upset and excited in the sale and delivery process. They are subjected to strange yards, different noises, loss of their mates, different people, different handling methods, trucking, unloading, new paddocks and different water and feed. This can upset animals, which are normally very quiet.

When the bull arrives home, unload him at the yards into a group of house cows, steers or herd cows. Never jump the bull from the back of a truck into a paddock. Bulls from different origins should be put into separate yards with other cattle, steers or cows, for company.

Provide hay and water, and then leave the bull alone until the next day.

All bulls should be drenched for worms every six months with a dectin drench. In addition they may need a drench for fluke if necessary and to be treated for lice. The following annual vaccinations are recommended:

- 7-in-1 vaccine annually.
- vibriosis vaccine annually.
- Pestiguard vaccination annually.

Give particular attention to preventing new bulls bringing vibriosis into a herd. Vibriosis is a sexually transmitted disease that causes infertility and abortions and is most commonly introduced to a clean herd by an infected bull. Vaccinated bulls are free from vibriosis so vaccinating bulls against the disease should be a routine practice. All Alpine Angus bulls are vaccinated.

MATING BULLS

For an efficient production system we recommend a 6–8 week joining season.

Newly purchased young bulls should not be multiple joined with older herd bulls. They will not be allowed to work much and in keeping them away from the cows, the older, dominant bull will knock them around.

Use new bulls in either single sire groups or with other young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later.

Ensure all bulls used are in good condition prior to working—condition score 3 is ideal. Remember bulls that are too light or heavy in condition may have problems with libido and semen production.

Yearling bulls are still growing strongly, so tend to be leaner, carrying less body fat reserves. The condition of the yearling bulls is critical. If they drop below condition score 3, sperm production may be impaired.

Service Ability Testing is recommended on all bulls prior to joining.

All working bulls should be tested or checked before joining for physical soundness, testicular tone and serving ability.

All bulls to be used must be free moving, active and in good store condition. Bulls may need supplementary feeding before the joining season to bring them up to condition score 3. The Australian Association of Cattle Veterinarians (AACV) defines a normal, fertile bull as 'expected to get 90% of 50 normal, cycling, disease

free females pregnant within 9 weeks, and 60% of these should become pregnant in the first three weeks of joining'. This expectation would apply to 2 year old bulls, but not to younger bulls.

DURING MATING

Whilst generally all goes to plan we believe a proactive approach is best to ensure you get the best result.

We strongly recommend that you keep a close eye on the bulls if possible when joining. Even though we have performed a service ability test and had your bulls independently structurally assessed bulls are animals and things can still go wrong. Check bulls at least twice each week during joining. Get up close to them and see each bull walk; check for swellings around the sheath and for lameness. Watch them work if possible. A significant number of cows or heifers bulling after 6 weeks of joining may indicate there is a problem. Young bulls are particularly vulnerable in their first season. Common problems that can occur are;

- they may not have built up immunity to IBR (the cattle form of herpes—making it painful to insert the penis).
- or may be more prone to a fever event through the stress of working, new surroundings and establishing their ranking with other bulls. This can render them temporarily infertile for a six week period.
- Problems such as warts on the penis will mean that the bull will need to be attended to.
- and pay particular attention to any sign of abnormal serving problems like 'cork-screw penis'.

Replace any suspect bull immediately. If you think there is or might be a problem please do not hesitate to contact us immediately as we can help you investigate the problem and if available provide a replacement bull so your joining is uninterrupted by any unforeseen event.

If you have to replace a bull, it is always wise to get the problem bull checked by your vet. Sometimes prompt treatment for small problems can avoid culling.

In addition to the Alpine Guarantee, Alpine Angus endeavour to keep a team of back up bulls for commercial clients who have bull breakdowns. If available the back up bull service is free including delivery and collection.

Our thanks to the Angus Society for their contribution to this article.
