ALPINE GUARANTEE

YEAR 1:

(until conclusion of first breeding season)

Commercial Buyers: 100% Unconditional Guarantee for Feet & Fertility.

= (Purchase price – salvage value) × 100%

Which can be used as a credit for the purchase of a replacement bull as soon as available e.g (Purchase price \$6,000 – salvage value \$2,000) × 100% = \$4,000 Credit (ex GST).

Commercial Buyers: 66% Unconditional Guarantee for Death & Accidental Injury.

= (Purchase price – salvage value) × 66%

Which can be used as a credit for the purchase of a replacement bull as soon as available e.g (Purchase price \$6,000 – salvage value \$2,000) × 66% = \$2,640 Credit (ex GST).

Stud Buyers: 100% Guarantee for Feet & Fertility ONLY.

Guarantee does NOT cover accidental injury or death by misadventure. Stud Stock Insurance will be available Sale Day and is strongly recommended.

= (Purchase price – salvage value) × 100%

Which can be used as a credit for the purchase of a replacement bull as soon as available. e.g (Purchase price \$6,000 – salvage value \$2,000) × 100% = \$4,000 Credit (ex GST).

YEAR 2:

(until conclusion of second year breeding season)

66% Guarantee for Feet & Fertility ONLY.*

= (Purchase price – salvage value) × 66%

Which can be used as a credit for the purchase of a replacement bull as soon as available. e.g (Purchase price \$6,000 – salvage value \$2,000) × 66% = \$2,640 Credit (ex GST).

* Guarantee does not apply to injury or disease.

YEAR 3:

(until conclusion of third year breeding season)

33% Guarantee for Feet & Fertility ONLY.*

= (Purchase price – salvage value) × 33%

Which can be used as a credit for the purchase of a replacement bull as soon as available. e.g (Purchase price \$6,000 – salvage value \$2,000) × 33% = \$1,320 Credit (ex GST).

* Guarantee does not apply to injury or disease.

* In all cases, commercial buyers and stud buyers, the guarantee covers the purchase value of the bull, without interest, costs and damages (if any).

* The salvage value is retained by purchaser.

* A veterinary certificate must be supplied by the purchaser upon request.

In addition to the above guarantee, Alpine Angus endeavour to keep a team of back up bulls for commercial clients who have bull breakdowns. If available the back up bull service is free including delivery and collection.

SALE INFORMATION

OUR QUALITY ASSURANCE

All Sale bulls must complete the following before being deemed suitable to be offered for sale:

- Semen quality test and physical inspection by Haydn Shipard.
- Independent structural assessment by Ian Moreland from Studcare Genetics.
- All bulls sire verified.
- Performance recorded HBR or APR with Angus Breedplan.
- 7 in 1 vaccination (2 initial and then annually).
- Vibrio vaccination (2 initial and then annually).
- Sale bulls drenched just prior to sale day. Please refer to the NVD.
- Pestivirus ear-notch test negative PI plus Pestiguard vaccination (2 initial and then annually).

AUCTIONS PLUS

Photos and details of all sale bulls will be available online on AuctionsPlus as well as the Angus Australia websites. The 2020 Alpine Spring Sale will be interfaced with live audio to allow clients to Bid online. If you have not used AuctionsPlus before, we urge you to register at least a few days before the sale so you can view the training video, watch a few online sales live and be familiar with how things work.

CATERING

Morning tea and a delicious beef lunch will be provided on Sale Day.

PRE-SALE INSPECTION

Private inspections prior to sale day by appointment are welcomed. Bulls will be yarded for inspection by 10am on sale day.

OUTSIDE AGENT REBATE FOR BULL SALE

A 5% Rebate will be paid ONLY to those outside agents who ACCOMPANY buyers to the sale OR to those who INTRODUCE BUYERS IN WRITING 24 hours prior to the sale.

A 2% Rebate will be paid to Agents who handle the sale transaction only.

GST

All bulls are sold GST exclusive.

TRANSFER OF REGISTRATION

All bulls will be transferred on the Angus Australia Register. If you have an Angus Society prefix, please provide it when registering.

FREE FREIGHT & DELIVERY

The purchase price paid for bulls includes free delivery by Alpine Angus up to 250km by road from the Alpine Sales Complex. Please note every effort will be made to ensure that delivery will take place within 2 weeks of sale day. Buyer co-operation in co-ordinating delivery is greatly appreciated.

Outside of this we will endeavour to assist in any way we can. If bulls are needed ASAP, please let us know.

GENETIC CONDITIONS

All Sale Bulls have their Genetic Condition Status clearly identified in the top row of their lot details.

DISCLAIMER

Whilst all care and attention has been paid to accuracy in the compilation of this catalogue, neither the vendors, selling agents or representatives thereof assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this sale catalogue.

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, neither the vendor, Angus Australia or the selling agents assume any responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

SEMEN COLLECTION

Alpine reserves the right to collect semen for in herd use from any bulls in this years catalogue. This will be done at Alpines expense and the purchasers convenience.

WELCOME

Alpine Angus will run its 2020 Spring Bull Sale on Wednesday 23rd September commencing at 1 pm at the Alpine Sales Complex at Rosewhite. A total of 45 HBR registered bulls will be for sale by auction.

Pre-sale inspection of the Sale Bulls will also be available at the Alpine Sales Complex at Rosewhite on Sunday 20th September from 10am–4pm. If this is not convenient, another suitable time can be arranged by calling Chris Oswin 0427 562 254.

2020 is destined to go down as one of the most challenging years in recent history. The swing from a bushfire scenario to the COVID epidemic has required many rapid and major adjustments as to how we all live and do business.

The next phase of COVID restrictions will not be in place until on or after 13th September. Visitors to Alpine Angus can be confident, all COVID guidelines will be complied with both for the pre-sale inspection and for Sale Day. Please note

that any changes to the COVID measures referred to above will be updated on the Alpine website by 14th September – www.alpineangus.com.au

The Alpine Sales Complex is a large, well-ventilated shed with the sale bulls on display in the pens outside the shed from 10am on Sale Day.

On Sale Day, *AuctionsPlus* will livestream the audio to enable online bidding. If intending to bid via *AuctionsPlus*, buyers need to register at least 24 hours prior to the sale – in fact we suggest you do so well before that! It is also important for those not familiar with online bidding to view the video online and watch an auction live to be comfortable with how online bidding works – www.auctionsplus.com.au. A phone bidding option is also available upon request.

An excellent Autumn for Alpine and a strong Beef Market should give purchasers the confidence to make the investment in good genetics. The sale features 15 sons

by the Outcross Reality son Karoo Knockout K176 – renowned for his thickness and muscling. In addition, Knockout's pedigree is stacked with maternal quality – number 7 for calf registrations for the past 2 years. The sale also features 5 sons by Baldrige Beast Mode B074 whose sons have topped many Bull Sales in the past year.

Quality Assurance with independent structural and semen quality assessment is further backed up by Alpine's 3-Year Guarantee (conditions apply) and is all designed to give buyers great confidence when purchasing an Alpine bull.

Whether you bid online or attend the 2020 Alpine Spring Bull Sale in person we greatly appreciate your support in these challenging times!

All the best,
Jim Delany *Principal*
Chris Oswin *Manager*

THE ALPINE ANGUS LEGACY

1.

2.

3.

4.

5.

1. KAROO KNOCKOUT NENK176
FC 6 / RC 6 / FA 5 / RA 5 / RS 5 / RH 5
Exciting herd sire, part-owned with Texas Angus. Stamping his cattle with incredible depth, thickness and doing ability. Semen marketed by Agri Gene.

2. LARGO FULL HOUSE HSHF12
FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
Evergreen sire that has provided our herd with countless sound, quality cattle. Daughters are first class. One of the best we have used for foot shape and structure.

3. MILWILLAH GATSBY NJWG279
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
We are a part owner in this current AI sire with exceptional carcase numbers. Daughters are first class. Semen marketed by ABS Australia.

4. STERITA PARK BLACK JACK SPLJ231
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
AI sire owned by Alpine Angus and Sterita Park Angus, semen marketed by ABS Australia. Sired grand-champion carcase Melbourne Royal 2018 – got a couple more steers in this year, fingers crossed.

5. HAZELDEAN HIGH ROLLER NHZH6
FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
A sire that has significantly impacted on the structure and docility of our herd. His daughters stand out for their superior type.

6. TEXAS HOLD'EM DXTH126
FC 6 / RC 5 / FA 6 / RA 5 / RS 5 / RH 5
Alpine owned sire and calving ease king. Full sister recently produced \$106,000 top priced bull at Texas Angus. Last year we purchased the sale topping Texas Hold'em son at Coonamble Angus.

7. BOWMONT JACKPOT SRKJ310
FC 5 / RC 6 / FA 5 / RA 5 / RS 5 / RH 5
Alpine Angus owned AI Sire with semen marketed by Genetics Australia.

8. ALPINE HECTOR CGKM172
FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
One of the high sellers in Autumn 2018 sale, purchased by Sterita Park Angus. Faultless type by Coonamble Hector out of a Gatsby daughter with perfect structure scores. Has 4 sons in this sale.

8.

6.

7.

9.

10.

12.

13.

11.

14.

9. ALPINE LEADER P216 CGKP216

FC 6 / RC 6 / FA 5 / RA 5 / RS 5 / RH 4

Strong bodied, moderate Birth Coonamble Leader son. Top price bull from this years Autumn Sale, selling to Mark Ham, Freshwater Creek.

10. ALPINE HERO CGKN042

FC 6 / RC 5 / FA 6 / RA 5 / RS 5 / RH 5

Coonamble H176 son with excellent muscle expression, who was equal top priced bull in our 2019 Autumn Sale, selling to John Canavan, Mansfield.

11. KAROO MAIN EVENT NENM367

FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5

\$25,000 top priced bull 2018 Karoo sale, from arguably their best cow family. Closely related to Knockout with first class structure scores and excellent disposition.

12. ALPINE ELEVATOR M268 CGKM268

FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 4

\$18,000 top priced bull at 2018 Autumn bull sale, selling to Wes Hall from Tasmania. Coonamble Elevator son used in our AI & ET programs.

13. ALPINE EQUATOR L004 CGKL004

FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5

Equal top priced bull in Autumn 2017 selling to Jock Hislop. Son recently topped the JB Angus bull sale. From the Tracey cow family and a maternal sister produced QLD top priced Angus bull @ \$110,000. We have leased L004 back and will have sons on offer next year.

14. ALPINE MUZZA CGKM245

FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5

Retained by Alpine for his excellent structure and type and a full ET brother to M268. Their dam is one of Coonamble's top cows. Pictured a week after running with 45 cows.

15. ALPINE JACKPOT N329 CGKN329

FC 6 / RC 5 / FA 5 / RA 5 / RS 4 a / RH 5

Long, correct Bowmont Jackpot son who was top priced bull at our 2019 Spring Bull Sale selling to the Ferguson family, Murmungee.

16. ALPINE JAEGER M339 CGKM339

FC 6 / RC 6 / FA 6 / RA 4 / RS 4 / RH 5

\$16,000 top priced bull at last year's Spring sale. High quality Coonamble ET bred bull purchased by Stuart Bewley, Bewmont Angus.

* The percentile bands represent the distribution of EBVs across the 2018 drop Australian Angus and Angus-influenced seedstock animals analysed in the September 2020 TransTasman Angus Cattle Evaluation.

SUMMARY OF ANGUS EBVs & \$ INDEX VALUES

The following is a brief description of EBVs and \$Index values and Accuracies.

Accuracy (%) – Provides an indication of the reliability of an EBV. As more performance information becomes available on an animal (or it's progeny, or relatives) then the accuracy of it's EBVs for particular traits will increase. See Understanding Accuracies for a more detailed explanation.

Calving Ease DIR (%) – Estimates of the genetic differences between animals in the ability of their calves from 2 year old heifers to be delivered without assistance.

Calving Ease DTRS (%) – Estimates of the genetic differences between animals in the ability of their 2 year old daughters to calve without assistance.

Gestation Length (Days) – Estimates of the genetic differences between animals in the number of days from the date of conception to the calf birth date.

Birth Wt (kg) – Estimates of the genetic differences between animals in calf birth weight.

200-Day Wt (kg) – Estimates of the genetic differences between animals in liveweight at 200 days of age.

400-Day Wt (kg) – Estimates of the genetic differences between animals in liveweight at 400 days of age.

600-Day Wt (kg) – Estimates of the genetic differences between animals in liveweight at 600 days of age.

Mature Cow Weight (kg) – Estimates of the genetic differences between animals in cow weight at 5 years of age.

Milk (kg) – Estimates of the genetic differences between animals in milk production, expressed as variation in 200-day weight of daughter's calves.

Scrotal Size (cm) – Estimates of the genetic differences between animals in scrotal circumference at 400 days of age.

Days to Calving – Estimates of the genetic differences in female fertility, expressed as the number of days from the start of the joining period until subsequent calving.

Carcase Weight (kg) – Estimates of the genetic differences between animals in carcass weight, adjusted to 650 days of age.

Eye Muscle Area (cm²) – Estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site, in a 300kg carcass.

Rib Fat (mm) – Estimates of the genetic differences between animals in fat depth at the 12/13th rib site, in a 300 kg carcass.

Rump Fat (mm) – Estimates of the genetic differences between animals in fat depth at the P8 rump site, in a 300kg carcass.

Retail Beef Yield % (RBY%) – Estimates of the genetic differences between animals in percentage retail beef yield, in a 300kg carcass.

Intra-Muscular Fat % (IMF%) – Estimates of the genetic differences between animals in percentage intra-muscular fat (marbling) at the 12/13th rib site, in a 300 kg carcass.

Trial Net Feed Intake (NFI) – Estimates of the genetic differences in feed intake for animals adjusted to the same growth rate and weight base.

Following a review last year a whole suite of new Selection Indexes were introduced with the December 2014 Group Breedplan run. The objective with the new Indexes was to bring them into line with the changes in cattle markets over time.

Angus Breeding Index – estimates the genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls.

This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.

The Angus Breeding Index is particularly suited to commercial producers who sell progeny into different markets, or to seedstock producers supplying bulls to commercial clients who produce for a range of different production systems and market end points.

Domestic Index – estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade. Steers are assumed to be finished using either grass, grass supplemented by grain or grain (eg. 50 – 70 days) with steers slaughtered at 490 kg live weight (270 kg carcass weight with 12 mm P8 fat depth) at 16 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. Emphasis has been placed on eating quality and tenderness to favour animals that are suited to MSA requirements.

Heavy Grain Index – estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.

Steers are assumed to be slaughtered at 760 kg live weight (420 kg carcass weight with 30 mm P8 fat depth) at 24 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. There is a significant premium for steers that exhibit superior marbling.

Heavy Grass Index – estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.

Steers are assumed to be slaughtered at 620 kg live weight (340 kg carcass weight with 12 mm P8 fat depth) at 22 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. Emphasis has been placed on eating quality and tenderness to favour animals that are suited to MSA requirements.

- 7th highest sire for calves registered with Angus Australia over the last two years.
- Was a standout amongst Karoo's K bull crop in our opinion. Deep, thick, well muscled with tremendous growth and excellent movement.
- Produces big scrotal, wide, deep, thickset cattle with plenty of doing ability, performance and softness.
- Big, scrotal, good growth & EMA and high fat.
- Sons are in the front end of many sale catalogues this year.

- Produces deep bodied, heavily fleshed cattle standing on good feet and legs, with breed leading docility.
- Progeny have topped numerous sales and is the sire of the \$190,000 Australian Record Priced female, Millah Murrah Prue M4.
- Top 1% Docility and 8% EMA.
- His Coonamble Z3 sired dam E9 was one of the high sellers at the record breaking 2016 Coonamble mature cow dispersal. Grand dam is Coonamble Junior's dam A61. A61 and her daughters have produced numerous stud sires.
- A son, Alpine Hector M172 (picture in legacy page) has 4 sons in this sale.

The Kilns

Staying at the kilnhouses at Alpine Angus is a unique experience where contemporary luxury and design is combined with the stunning beauty of the Ovens Valley landscape in Porepunkah. The three houses – **Cavedon's Kilnhouse**, **Chinaman's Kilnhouse** and **The Sorting Shed** – are each in a separate part of the Alpine Angus stud. Each of the houses have spectacular views of Mount Buffalo, Feathertop and Bogong, with grape vines and – alpine angus cattle.

For bookings or enquiries

MAINTAINING & MONITORING BULL HEALTH

VITAL TOOLS TO MAXIMISING LIVE CALVES BORN: TOP BEEF PRODUCERS NEVER SET AND FORGET!

All Alpine sale bulls have been semen tested and physically examined for penile and testicle abnormalities by Haydn Shipard of Agri Gene. From our point of view the QA program for our bulls is designed to ensure we have done everything we can for them to be in optimum condition for their FIRST joining after they leave Alpine.

Once your Alpine Bull arrives at your farm the baton passes to you! This is because Bulls face a range of variables throughout their working lives – but it is important to know they at their greatest risk of problems in their FIRST joining season.

Bull injuries, disease, accidents, general herd health and dumb ass bad luck play a role in the success of a joining program. Closely monitoring your bull(s) and cow herd during as well as pre joining is essential to avoid a 'train wreck' come pregnancy testing – which can involve big losses in \$ terms and a big drag on farm cash flow.

There are four key tools to maximise bull performance and pregnancy rates year after year:

The first is to maintain the annual vaccination program for pestivirus, vibriosis and leptospirosis for the rest of a bulls working life.

The second is to get ALL of your bulls checked prior to joining by the appropriate industry experts for your bulls' semen quality as well as allowing a physical evaluation of their working parts to make sure all is in order. This will help to identify any bulls that have issues due to a past or current infection or a physical injury not obvious to the naked eye.

Unfortunately if bulls are not checked issues relating to the above are sometimes only discovered as a result of a poor calving or pregnancy test results. This is the 'train wreck' we need to avoid! In our experience with our many Alpine clients there is a DIRECT correlation between those clients achieving consistently better preg test results and the pro active management of the beef producer themselves – those who do all of the above

on a consistent year by year basis are well ahead of those who don't – both in terms of job satisfaction and \$ Profits.

Obviously employing the services of an industry expert to perform these bull tests is another cost. However we strongly recommend that you view this not as a cost but as an investment! We are confident you will get a very significant return in \$ terms over time by putting in place the process outlined above and by employing the right outside expertise.

Industry experts we recommend who could help include the services of specialists like Haydn Shipard or Ian Moreland, of Studcare Genetics. Both Haydn and Ian offer on farm fertility evaluation of bulls and we highly recommend their services – between them they have a combined 70 plus years experience in this field!

Glen Page from Zoetis is also happy to discuss any issues in regards to Vaccination programs and of course your local vet is another handy resource for any of the above.

The third strategy in each joining period is to try and observe each bull you have successfully serving a cow.

The fourth and final strategy is to focus on the cow herd. The majority of cows should be pregnant in the first cycle of joining (approx. 60–70%), so large numbers of cycling females after the first 3–4 weeks of bull introduction is most likely a KEY indicator of potential problems and should get alarm bells ringing.

There are a number of different strategies to help minimise the risk of bull breakdown during joining. These include multiple sire groups, rotation of bulls through different mobs, as well as the introduction of fresh bulls. Each of these have their own pros and cons and it gets down to personal preference and confidence levels. If you think you have a problem please don't hesitate to use Alpine Manager Chris Oswin as your first port of call – Chris is only too happy to help with trying to identify the problem and help you to identify the solution options available to you.

BEEF CLASS STRUCTURAL ASSESSMENT

HOW TO USE THE BEEF CLASS STRUCTURAL ASSESSMENT SYSTEM

The 2020 Alpine Spring Sale bulls were independently assessed in January 2020 by Ian Moreland.

The Beef Class Assessment System uses a 1–9 scoring system for feet and leg structure;

- A score of 5 is ideal. (Note: Except for Temperament Score where score of 1 is preferable – refer notes below)
- A score of 4 or 6 shows slight variation from ideal, but this includes most animals. An animal scoring 4 or 6 would be acceptable in any breeding program.
- A score of 3 or 7 shows greater variation but would be acceptable in most commercial programs.
- A score of 2 or lower or 8 & higher are low scoring animals and are culled.

Abbreviations:

FC: Front Claw
 RC: Rear Claw
 FA: Front Foot/Pastern Angle
 RA: Rear Foot/Pastern Angle
 RS: Rear Leg Side View
 RH: Rear leg Hind View

Ian Moreland, *Studcare Genetics*

RODWELLS

LOCAL SERVICE NATIONAL STRENGTH

It's a trust thing

Representative, negotiator, ally, and mate – this is a relationship business.

At Rodwells we are known for our team of local, experienced, independent livestock specialists and property agents across Victoria, New South Wales and South Australia.

Backed by the strength of a national network, our Rodwells agents deliver the most effective solution tailored for your livestock. Our knowledge and experience in local markets and seasonality means that you can trust us to deliver the highest standard of service.

And as part of the Ruralco group of businesses, we are able to draw on the resources of Ruralco Property, providing real estate agency services in both rural and residential markets, as well as a comprehensive property management service.

Our agents have access to up-to-the-minute market intelligence, including market trends and performance statistics, and are committed to securing successful buying and selling results for their clients.

Whatever your livestock or property needs, we are confident our service offering provides the best possible outcomes at all levels of the industry supported by our ethos of Local Service, National Strength.

Talk to your local Rodwells expert...

Give us a call for more information about our services and products

There are many ways to participate in the Alpine Spring Bull Sale.

BACKED BY ALPINE'S COMPREHENSIVE QUALITY ASSURANCE PROGRAM

- Independent structural assessment of sale bulls pre-sale by Ian Moreland from Studcare Genetics.
- Independent semen quality test pre-sale has been conducted by Haydn Shipard.
- Alpine 3-year Bull Guarantee (Conditions apply).

• PREVIEW SUNDAY 20 SEPTEMBER

Preview the sale lineup on Sunday 20 September 10am–4pm.

• PREVIEW BY APPOINTMENT

Preview the sale lineup by appointment with Chris Oswin mobile 0427 562 254.

• ATTEND THE SALE

Attend the sale on 23 September in person – sale bulls will be on display from 10am. Refreshments and beef lunch provided.

• BID ONLINE YOURSELF

Bid online yourself via *AuctionsPlus* – please register as soon as you can to allow enough time to become familiar with how things work! www.auctionsplus.com.au

• BID ONLINE WITH ASSISTANCE

Bid online with assistance from your local agent at their office.

• BID VIA PHONE HOOKUP

To arrange to bid via phone hookup, please contact either GTSM Auctioneer Michael Glasser 0403 526 702 or Stock Agents Dan Ivone 0427 480 548 (Paull & Scollard) or Mick Curtis 0428 953 222 (Rodwells)

AFTER SALES SERVICE AND MANAGEMENT OF BULLS

BUYING A BULL IS AN INVESTMENT. THIS INVESTMENT SHOULD CONTRIBUTE TO THE GENETICS AND SALE INCOME OF YOUR HERD FOR MANY YEARS. IF YOU ARE TO GET THE MOST FROM YOUR NEW BULL, IT PAYS TO LOOK AFTER HIM WELL, ESPECIALLY IN THE FIRST SEASON OF USE.

Please remember, when working bulls through the yards, handle them with care. Preferably work them with other cattle and do not use force.

OUR GUARANTEE

All Alpine bulls for commercial clients are guaranteed for up to three years from the date of sale. See p. 2 for details and conditions. Every effort has been made to ensure our bulls leave Alpine in top working order.

AFTER SALES SERVICE

Our 3 year guarantee is designed to deliver the best quality assurance. The sale of a bull we regard as the beginning of a relationship with our clients rather than the end of a 'deal'. We also believe we have a vested interest in helping our clients breeding programs in any way we can.

If you have any problems with your bulls or any other aspect of your breeding program we invite you to make contact with us regarding your concerns as soon as possible. We endeavor to keep a supply of back up bulls at all times in order to meet our guarantee obligations and as a service to clients whose bulls are accidentally injured.

ARRIVAL OF YOUR NEW BULL

Bulls can become upset and excited in the sale and delivery process. They are subjected to strange yards, different noises, loss of their mates, different people, different handling methods, trucking, unloading, new paddocks and different water and feed. This can upset animals, which are normally very quiet.

When the bull arrives home, unload him at the yards into a group of house cows, steers or herd cows. Never jump the bull from the back of a truck into a paddock. Bulls from different origins should be put into separate yards with other cattle, steers or cows, for company.

Provide hay and water, and then leave the bull alone until the next day.

All bulls should be drenched for worms every six months with a dectin drench. In addition they may need a drench for fluke if necessary and to be treated for lice. The following annual vaccinations are recommended:

- 7-in-1 vaccine annually.
- vibriosis vaccine annually.
- Pestiguard vaccination annually.

Give particular attention to preventing new bulls bringing vibriosis into a herd. Vibriosis is a sexually transmitted disease that causes infertility and abortions and is most commonly introduced to a clean herd by an infected bull. Vaccinated bulls are free from vibriosis so vaccinating bulls against the disease should be a routine practice. All Alpine Angus bulls are vaccinated.

MATING BULLS

For an efficient production system we recommend a 6–8 week joining season.

Newly purchased young bulls should not be multiple joined with older herd bulls. They will not be allowed to work much and in keeping them away from the cows, the older, dominant bull will knock them around.

Use new bulls in either single sire groups or with other young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later.

Ensure all bulls used are in good condition prior to working—condition score 3 is ideal. Remember bulls that are too light or heavy in condition may have problems with libido and semen production.

Yearling bulls are still growing strongly, so tend to be leaner, carrying less body fat reserves. The condition of the yearling bulls is critical. If they drop below condition score 3, sperm production may be impaired.

Service Ability Testing is recommended on all bulls prior to joining.

All working bulls should be tested or checked before joining for physical soundness, testicular tone and serving ability.

All bulls to be used must be free moving, active and in good store condition. Bulls may need supplementary feeding before the joining season to bring them up to condition score 3. The Australian Association of Cattle Veterinarians (AACV) defines a normal, fertile bull as 'expected to get 90% of 50 normal, cycling, disease

free females pregnant within 9 weeks, and 60% of these should become pregnant in the first three weeks of joining'. This expectation would apply to 2 year old bulls, but not to younger bulls.

DURING MATING

Whilst generally all goes to plan we believe a proactive approach is best to ensure you get the best result.

We strongly recommend that you keep a close eye on the bulls if possible when joining. Even though we have performed a service ability test and had your bulls independently structurally assessed bulls are animals and things can still go wrong. Check bulls at least twice each week during joining. Get up close to them and see each bull walk; check for swellings around the sheath and for lameness. Watch them work if possible. A significant number of cows or heifers bulling after 6 weeks of joining may indicate there is a problem. Young bulls are particularly vulnerable in their first season. Common problems that can occur are;

- they may not have built up immunity to IBR (the cattle form of herpes—making it painful to insert the penis).
- or may be more prone to a fever event through the stress of working, new surroundings and establishing their ranking with other bulls. This can render them temporarily infertile for a six week period.
- Problems such as warts on the penis will mean that the bull will need to be attended to.
- and pay particular attention to any sign of abnormal serving problems like 'cork-screw penis'.

Replace any suspect bull immediately. If you think there is or might be a problem please do not hesitate to contact us immediately as we can help you investigate the problem and if available provide a replacement bull so your joining is uninterrupted by any unforeseen event.

If you have to replace a bull, it is always wise to get the problem bull checked by your vet. Sometimes prompt treatment for small problems can avoid culling.

In addition to the Alpine Guarantee, Alpine Angus endeavour to keep a team of back up bulls for commercial clients who have bull breakdowns. If available the back up bull service is free including delivery and collection.

Our thanks to the Angus Society for their contribution to this article.
