## FREE FREIGHT

Conditions Apply  
(See Sale Details page 4)

## 5% REBATE

To all agents  
(conditions apply refer page 4)

### YEAR 1:

(until conclusion of first breeding season)

**Commercial Buyers: 100% Unconditional Guarantee for Feet & Fertility.**

= (Purchase price – salvage value) × 100%

Which can be used as a credit for the purchase of a replacement bull as soon as available e.g (Purchase price \$6,000 – salvage value \$2,000) × 100% = \$4,000 Credit (ex GST).

**Commercial Buyers: 66% Unconditional Guarantee for Death & Accidental Injury.**

= (Purchase price – salvage value) × 66%

Which can be used as a credit for the purchase of a replacement bull as soon as available e.g (Purchase price \$6,000 – salvage value \$2,000) × 66% = \$2,640 Credit (ex GST).

**Stud Buyers: 100% Guarantee for Feet & Fertility ONLY.**

Guarantee does NOT cover accidental injury or death by misadventure. Stud Stock Insurance will be available Sale Day and is strongly recommended.

### YEAR 2:

(until conclusion of second year breeding season)

**66% Guarantee for Feet & Fertility ONLY.\***

= (Purchase price – salvage value) × 66%

Which can be used as a credit for the purchase of a replacement bull as soon as available. e.g (Purchase price \$6,000 – salvage value \$2,000) × 66% = \$2,640 Credit (ex GST).

\* Guarantee does not apply to injury or disease.

### YEAR 3:

(until conclusion of third year breeding season)

**33% Guarantee for Feet & Fertility ONLY.\***

= (Purchase price – salvage value) × 33%

Which can be used as a credit for the purchase of a replacement bull as soon as available. e.g (Purchase price \$6,000 – salvage value \$2,000) × 33% = \$1,320 Credit (ex GST).

\* Guarantee does not apply to injury or disease.

In addition to the above guarantee, Alpine Angus endeavour to keep a team of back up bulls for commercial clients who have bull breakdowns. If available the back up bull service is free including delivery and collection.

### CONTACT DETAILS

## SALE INFORMATION

### OUR QUALITY ASSURANCE

All Sale bulls must complete the following before being deemed suitable to be offered for sale:

- Semen quality test and physical inspection by Haydn Shipard.
- Independent structural assessment by Ian Moreland from Studcare Genetics.
- All bulls sire verified.
- Performance recorded HBR or APR with Angus Breedplan.
- 7 in 1 vaccination (2 initial and then annually).
- Vibrio vaccination (2 initial and then annually).
- Sale bulls drenched just prior to sale day. Please refer to the NVD.
- Pestivirus ear-notch test negative PI plus Pestiguard vaccination (2 initial and then annually).

### AUCTIONS PLUS

Photos and details of all sale bulls will be available online on the Auctions Plus and Angus Australia websites. Sale Day there will be a live interface on line to allow for off site bidding

### CATERING

We are delighted to welcome back the Rosewhite CWA after an enforced COVID break! Please come and enjoy the legendary morning tea and beef lunch they turn out!

Coffee provided by Sixpence Coffee Roasters, Bright.  
www.sixpencecoffee.com.au

### PRE SALE INSPECTION

Pre-sale Inspection of Sale Bulls available on Sunday, 5 March from 11am–3pm at the Alpine Sales Complex, Rosewhite. Private inspections prior to sale day by appointment are welcomed. Bulls will be yarded for inspection by 10am on sale day.

### GST

All bulls are sold GST exclusive.

### TRANSFER OF REGISTRATION

All bulls will be transferred on the Angus Australia Register. If you have an Angus Society prefix, please provide it when registering.

### OUTSIDE AGENT REBATE FOR BULL SALE

A 5% Rebate will be paid ONLY to those outside agents who ACCOMPANY buyers to the sale. A 2% Rebate will be paid to Agents who INTRODUCE BUYERS IN WRITING 24 hours prior to the sale.

### FREE FREIGHT & DELIVERY

The purchase price paid for bulls includes free delivery by Alpine Angus up to 250km by road from the Alpine Sales Complex. Please note every effort will be made to ensure that delivery will take place within 2 weeks of sale day. Buyer co-operation in co-ordinating delivery is greatly appreciated.

Outside of this we will endeavour to assist in any way we can. If bulls are needed ASAP, please let us know.

### GENETIC CONDITIONS AND GENOMICS

Lots 60 and 96 will have EBVs updated in early March. Lots 10 and 33 awaiting results of red gene test. Lot 64 is a DD carrier. All other lots are free of defects.

All bulls in this catalogue have at a minimum been sire verified and have genomically enhanced EBVs.

### DISCLAIMER

Whilst all care and attention has been paid to accuracy in the compilation of this catalogue, neither the vendors, selling agents or representatives thereof assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this sale catalogue.

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

# WELCOME

**Alpine Angus are celebrating the 25th Anniversary year since their inception in 1998. On Wednesday 20 September 2023 at 1 pm Alpine host their 8th Annual Spring Bull Sale presenting 60 Alpine Bulls to be held at the Alpine Sales Complex, Rosewhite Victoria.**

This sale will be Tim Brown's last sale at Alpine Angus. Tim has put his heart and soul into the Alpine Angus business over the last 20 years. Tim will be leaving us in the next couple of months to take up his own family farming operation near Tarrawingee. We wish Tim, Melissa and their family, every success in this new and exciting phase of their farming careers. We take this opportunity to publicly thank Tim for all of his work and input to the Alpine Angus program.

The 2023 Spring Sale line up features sons of home bred sire Alpine Pablos Pulse P348 displaying deep bodied well fleshed sons who promise calving ease with great birth weight to growth credentials.

USA AI Sire Sitz Stellar 726D has a line of sons in the sale. Extremely popular in the United States due to his ability to produce long, deep bodied cattle with first class structure and foot quality. Stellar's sons and grandsons have topped numerous bull sales for the highly regarded Sitz program as well as numerous other renowned Stud sales throughout the USA.

Lawsons Momentous also has sons in the Spring Alpine sale. Momentous is a highly proven, elite numbered IMF sire with over 4,000 progeny. And has been used by Alpine over the last few years to increase marbling propensity with his sons being well received.

Alpine Junior M205 is another home bred sire with sons in the sale. Chris Oswin, 'M205 is a thick bodied, sound, docile sire we sold in our 2018 sale and used after viewing him as an older bull. He incorporates high IMF with body, fleshing ability and an elite pedigree. Sire Coonamble Junior produced numerous quality progeny throughout Australia, and his dam H142 is a high marbling female with a great production record.'

Coonamble Leader Q500 and Alpine Qualifier Q211 also have sons presented. Both sires are stout bodied with excellent phenotypes and are out of elite dams, with Q500 being out of one of the countries finest females in Lowan A61. Their sires Coonamble Leader L325 and Karoo Knockout both excelled at producing strong powerful cattle for Alpine and these two sons were selected to continue this influence on the Alpine herd.

The Alpine herd has progressed in leaps and bounds over the last decade with a dedicated focus on pursuing genetics to produce fault-free, responsibly framed cattle with fleshing ability, good temperament and consistency combining EBVs promising calving ease and explosive growth.

Alpine Angus Manager Chris Oswin, 'We place extensive production and structural pressure on the Alpine female herd and are proud of the female base we have developed. From this we aim to breed bulls with the physical and structural quality traits that allow them to last and proliferate their genetics over multiple mating seasons. In turn producing sound, functional daughters in clients herds that will breed on and flourish in the vast array of conditions

thrown up in our commercial clients beef environments.'

'One of the true strengths of our program comes from not simply relying solely on trait-leading AI sires to produce Alpine progeny. We are constantly seeking to minimise risk by augmenting these high-performance genetics with sires sourced from leading Australian herds, out of dominant cow families with the physical attributes and qualities we rely on for longevity and consistency. Coonamble genetics among others have played a significant role in aiding Alpine Angus to produce fault-free, strong, balanced cattle that allow clients to present long lines of consistent progeny that will breed on and grow well.'

Over the recent past, Alpine Angus are now gaining widespread industry acceptance with Alpine Main Event Q192, Alpine Rip Wheeler R144, Alpine Real Deal R163, Alpine Ronaldo R232 and Alpine 38 Special S021 all featuring in main stream AI catalogues. Chris Oswin, 'Whilst this was not the objective as our clients are our prime focus, it is a rewarding, albeit a humbling outcome. All are sound, well balanced bulls and pleasingly represent a range of genetics from our herd incorporating different sirelines and cow families.'

A Sale Preview will be held on Sunday 17 September 11am-3pm at the Alpine Sales Complex, Rosewhite. Refreshments and lunch will be available at the Sale Preview and on Sale Day. Sale Bulls will be yarded by 10am on Sale Day Wednesday 20 September.

All the best,  
The Alpine Team

## THE ALPINE ANGUS LEGACY

1.

5.

6.

2.

3.

**1. ALPINE RIP WHEELER** CGKR144  
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5  
This Main Event was our top priced bull in our 2021 Spring Sale, selling to Peter Collins and Luke Graham. Strong and well balanced with elite combination of Birth to Growth spread and high fat cover. Semen marketed by Genetics Australia.

**2. KAROO KNOCKOUT** NENK176  
FC 6 / RC 6 / FA 5 / RA 5 / RS 5 / RH 5  
Fantastic herd sire that stamps his cattle with incredible depth and thickness. Selling 2 sons and 3 grandsons.

**3. KAROO MAIN EVENT** NENM367  
FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5  
Top priced bull at the 2018 Karoo Bull sale, Main Event is a calving ease bull with impeccable structure and outstanding feet. Progeny include Alpine Rip Wheeler R144 and Alpine Main Event Q192, featured on this legacy page. Selling 6 sons.

**4. ALPINE RONALDO** R232 CGKN042  
FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5  
Super sound, long bodied N542 son with Calving Ease, low Birth and high Carcase credentials. Purchased by Brad Cavanagh, Hardhat Angus with semen marketed by ST Genetics Australia.

**5. ALPINE MUZZA** CGKM245  
FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5  
Retained by Alpine for his excellent type and temperament, and a full brother to Alpine Elevator M268. Their sister is the grandam of Alpine Real Deal R163, also featured on this legacy page. Muzza throws quiet, true to type Angus with fleshing and depth. Selling 17 sons.

**6. ALPINE ELEVATOR** M268  
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 4  
Top priced bull at our 2018 Autumn bull sale, selling to Wes Hall, Tasmania. He sires sound, powerful sons with presence. Two sons, S049 and R205 are featured on this legacy page. Selling 2 sons.

**7. ALPINE PUNTER** P239  
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5  
Punter was one of our high sellers in our 2020 Autumn bull sale, selling to JB Angus, South Australia. A Beast Mode son, Punter produces long spined cattle with spring of rib and exceptional growth. Selling 8 sons.

**8. COONAMBLE NAVIGATOR** N435  
Navigator is super thick and wide topped. A brother Coonamble Nic Nat is an AI sire for Agri Gene. Navigator sons are born light and pack plenty of punch. Selling 2 sons.

4.

7.

8.

9.

10.

11.

12.

13.

14.

**9. ALPINE ELEVATOR S049**

FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5

2nd top priced bull from our 2022 Spring Sale selling to Cascade Angus, Tamworth. Big bodied M268 son with great thickness.

**10. ALPINE ELEVATOR R205**

FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 4

2nd top priced bull from our 2022 Autumn Sale, selling to Arden Angus, Adelong NSW. Big bodied, quiet M268 son with tremendous growth, plenty of fleshing and strong carcass attributes.

**11. ALPINE LEADER Q238**

FC 6 / RC 6 / FS 5 / RS 5 / RS 4 / RH 5

Top priced bull 2020 Spring Sale, out of an excellent Hold'em daughter. Strong maternal pedigree and excellent Birth to Growth spread will see P171 used in our AI program.

**12. ALPINE MAIN EVENT Q192**

FC 6 / RC 6 / FA 5 / RA 5 / RS 5 / RH 4

Strong bodied, moderate Birth Coonamble Leader son. Top price bull from 2020 Autumn Sale, selling to Mark Ham, Freshwater Creek.

**13. ALPINE REAL DEAL R163**

FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5

Top priced bull 2022 Autumn Sale, purchased by Harris Thompson, Venturon Livestock and Taimate Angus NZ. Semen marketed by ABS. Deep bodied, high IMF NORN542 son. Dam by Longshot out of a full sister to Alpine Muzza and Alpine Elevator M268.

**14. ALPINE 38 SPECIAL S021**

FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH

Top priced bull from our 2022 Spring Sale at \$120,000 selling to Arkle Angus W.A. S021 is a strong bodied 38 Special son with excellent structure and EBVs.

**15. ALPINE BEAST MODE CGKP171**

FC 6 / RC 6 / FS 5 / RS 5 / RS 4 / RH 5

Top priced bull 2020 Spring Sale, purchased by the Brindley family, Lucvale. Strong maternal pedigree and excellent Birth to Growth spread.

**16. ALPINE LEADER CGKP216**

FC 6 / RC 6 / FA 5 / RA 5 / RS 5 / RH 4

Strong bodied, moderate Birth Coonamble Leader son. Top price bull from 2020 Autumn Sale, selling to Mark Ham, Freshwater Creek.

# SUMMARY OF ANGUS EBVs & \$ INDEX VALUES

The following is a brief description of EBVs and \$Index values and Accuracies.

**Accuracy (%)** – Provides an indication of the reliability of an EBV. As more performance information becomes available on an animal (or it's progeny, or relatives) then the accuracy of it's EBVs for particular traits will increase. See Understanding Accuracies for a more detailed explanation.

**Calving Ease DIR (%)** – Estimates of the genetic differences between animals in the ability of their calves from 2 year old heifers to be delivered without assistance.

**Calving Ease DTRS (%)** – Estimates of the genetic differences between animals in the ability of their 2 year old daughters to calve without assistance.

**Gestation Length (Days)** – Estimates of the genetic differences between animals in the number of days from the date of conception to the calf birth date.

**Birth Wt (kg)** – Estimates of the genetic differences between animals in calf birth weight.

**200-Day Wt (kg)** – Estimates of the genetic differences between animals in liveweight at 200 days of age.

**400-Day Wt (kg)** – Estimates of the genetic differences between animals in liveweight at 400 days of age.

**600-Day Wt (kg)** – Estimates of the genetic differences between animals in liveweight at 600 days of age.

**Mature Cow Weight (kg)** – Estimates of the genetic differences between animals in cow weight at 5 years of age.

**Milk (kg)** – Estimates of the genetic differences between animals in milk production, expressed as variation in 200-day weight of daughter's calves.

**Scrotal Size (cm)** – Estimates of the genetic differences between animals in scrotal circumference at 400 days of age.

**Days to Calving** – Estimates of the genetic differences in female fertility, expressed as the number of days from the start of the joining period until subsequent calving.

**Carcass Weight (kg)** – Estimates of the genetic differences between animals in carcass weight, adjusted to 650 days of age.

**Eye Muscle Area (cm<sup>2</sup>)** – Estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site, in a 300kg carcass.

**Rib Fat (mm)** – Estimates of the genetic differences between animals in fat depth at the 12/13th rib site, in a 300 kg carcass.

**Rump Fat (mm)** – Estimates of the genetic differences between animals in fat depth at the P8 rump site, in a 300kg carcass.

**Retail Beef Yield % (RBY%)** – Estimates of the genetic differences between animals in percentage retail beef yield, in a 300kg carcass.

**Intra-Muscular Fat % (IMF%)** – Estimates of the genetic differences between animals in percentage intra-muscular fat (marbling) at the 12/13th rib site, in a 300 kg carcass.

**Trial Net Feed Intake (NFI)** – Estimates of the genetic differences in feed intake for animals adjusted to the same growth rate and weight base.

**Selection Index \$A Index** – Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.

**Selection Index \$A-L Index** – The \$A-L index is similar to the \$A index but is modelled on a production system where feed is surplus to requirements for the majority of the year, or the cost of supplying additional feed when animal feed requirements increase is low.

While the \$A aims to maintain mature cow weight, the \$A-L does not aim to limit the increase in mature cow weight as there is minimal cost incurred if the feed maintenance requirements of the female breeding herd increase as a result of selection decisions.

+4.0	+3.6	-0.1	+1.5	+\$253	+\$423	

- Stellar and his sons have proved a massive hit in the United State, topping multiple sales highlighted by his grandson Connealy Craftsman topping at \$500,000.
- Stellar has dominated Sitz sales over the last couple of years, producing high selling, heavy bodied sires combining low Birth with great growth, eye appeal and calving ease.
- Sitz describe him as the following – “Stellar is a super thick topped, deep sided bull that transmits added substance, fleshing ability, muscle shape, and is becoming recognized as one of the true foot quality improvers of the breed. The Stellar progeny have consistently performed very well at all levels. The daughters have excellent udders, and his progeny PAP test extremely well. A very well-rounded bull that will produce real world cattle.”

Te Mania Longshot, sire of Pablos Pulse

-1.1	-0.9	-0.2	+2.5	+\$250	+\$414	

- Pictured is Te Mania Longshot, sire of Pablos Pulse.
- We retained Pablos Pulse for his Calving Ease, Birth to Growth and high Milk attributes. He is clean fronted, with good length and a moderate frame.
- He has proven a dream to calve heifers to while still injecting growth and vigour into his progeny and is now used as a cover sire for cows in our herd.
- Unfortunately we lost his sire, Te Mania Longshot to a twisted bowel and Pablos Pulse was the obvious replacement.
- Longshot females are angular, high-milking and very good producers and a daughter, CGKP354, is the dam of last Autumns \$90,000 top seller Alpine Real Deal.
- The grandam of Pablos Pulse, CGKK233, is a quality female that packs plenty of punch into her calves and has a number of embryo calves coming through the system. She is a product of the imported Davis YR Blackbird 558H cow family, with 558H being one of the United States iconic Carcase cows.

- Momentous produces long, sound cattle with massive carcase potential and maternal qualities, sitting top 1% of the breed for EMA & IMF and 3% for Milk.
- He is one of Genetics Australia's leading AI sires and is a son of the high carcase sire G A R Momentum, who is represented by 3 sons in this sale.
- Momentous sons have been highly sort after at sales throughout Australia.
- We used a Momentous son, Murdeduke Quarterback Q011, heavily in last year's AI program and we are targeting this line to inject IMF potential.

- Coonamble Navigator is a super thick, wide-topped Discovery son out of a leading Coonamble dam.
- He produces light born, quick growing calves that are deep with great muscle expression.
- Navigator was our pick as a yearling from of an outstanding set of ET brothers. A brother Coonamble Nic Nat was purchased by Murdeduke Angus as one of the 2019 Coonamble high sellers and is an AI sire for Agri Gene, while a 3rd brother from this flush -Coonamble Next Step, has been retained by Coonamble.
- Navigator was used by Coonamble over a small mob of Spring heifers before crossing the Nullabor with two of his sons from this joining averaging \$19,000, despite being amongst the youngest in the sale while we have had sons top to \$18,000.

**1 SON**

RIB	P8	RBY	IMF	\$A+	\$A-L	
+3.6	+5.9	-0.9	+3.1	+\$207	+\$376	

- Main Event is a free moving, long, clean fronted calving-ease bull with impeccable structure.
- A son Alpine Rip Wheeler R144 topped our 2021 Spring sale at \$75,000 and is marketed by Genetics Australia, while a high seller from the year before, Alpine Main Event Q192 also has semen marketed by Genetics Australia.
- Main Event was our \$26,000 top priced selection from the 2018 Karoo bull sale. His combination of low birth, coupled with high performance, perfect feet and flawless structure was too good to pass by.
- He offers a wonderful combination of calving ease, low Birth, 400 Day Weight and good carcass traits and passes on first class foot quality to his progeny.
- Stems from arguably Karoo's most successful female line, Karoo Doris Y137. Full brother in blood to Main Event, Karoo Realist N278 was a high seller in the 2019 sale and is now a semen sire with Breeder Genetics. His sons are topping sales as well.

**3 SONS, 2 GRANDSONS**  
ALPINE MUZZA M245

IDENTIFIER: CGKM245  
STATUS: HBR  
BIRTH: 9/7/16

NOTES: CALVING EASE/BIRTH/  
GROWTH/DOCILITY

CE-DIR	CE-DTR	GL	BW	200	400	600

RIB	P8	RBY	IMF	\$A+	\$A-L	
-0.8	+0.8	+0.2	+1.3	+\$157	+\$296	

- Muzza excels at producing true to type Angus with fleshing, sound structure and excellent docility.
- His daughters will be a mainstay of our program and his sons have been very well received at previous sales, selling to \$32,000.
- The result of an embryo from Coonamble Angus, his dam is from the elite producing Lowan A61 cow family whose descendants include Coonamble Hector and Coonamble Junior.
- Muzza's flush brother M268 was our high seller in 2018 and has had sons sell to \$55,000.
- Muzza's flush sister CGKM242 is the grandam of ABS sire Alpine Real Deal R163, last years \$90,000 high seller.

## 6 SONS

ALPINE JUNIOR M205

IDENTIFIER: **CGKM205**  
STATUS: **HBR**  
BIRTH: **8/29/16**

CE-DIR	CE-DTR	GL	BW	200	400	600	MCWT	MILK	DC	SS	DOC	CWT	EMA	RIB	P8	RBY	IMF	\$A+	\$A-L
+4.5	+2.1	-0.9	+2.7	+41	+85	+111	+90	+19	-4.6	+3.6	+31	+67	+11.4	-2.6	-0.5	+0.8	+4.4	+\$215	+\$358

We purchased M205 back as a mature bull, identifying him as a sire that could increase the marbling level in our herd without sacrificing body mass and functionality. His dam produced 8 natural calves with five daughters still in our herd.

## 3 SONS

ALPINE MUZZA Q232

IDENTIFIER: **CGKQ232**  
STATUS: **HBR**  
BIRTH: **8/21/19**

Broadview cattle are wide, thick and deep. He has a very good Birth to Growth spread.

## MAINTAINING & MONITORING BULL HEALTH

### VITAL TOOLS TO MAXIMISING LIVE CALVES BORN: TOP BEEF PRODUCERS NEVER SET AND FORGET!

All Alpine sale bulls have been semen tested and physically examined for penile and testicle abnormalities by Haydn Shipard of Agri Gene. From our point of view the QA program for our bulls is designed to ensure we have done everything we can for them to be in optimum condition for their FIRST joining after they leave Alpine.

Once your Alpine Bull arrives at your farm the baton passes to you! This is because Bulls face a range of variables throughout their working lives – but it is important to know they at their greatest risk of problems in their FIRST joining season.

Bull injuries, disease, accidents, general herd health and dumb ass bad luck play a role in the success of a joining program. Closely monitoring your bull(s) and cow herd during as well as pre joining is essential to avoid a 'train wreck' come pregnancy testing – which can involve big losses in \$ terms and a big drag on farm cash flow.

There are four key tools to maximise bull performance and pregnancy rates year after year:

The first is to maintain the annual vaccination program for pestivirus, vibriosis and leptospirosis for the rest of a bulls working life.

The second is to get ALL of your bulls checked prior to joining by the appropriate industry experts for your bulls' semen quality as well as allowing a physical evaluation of their working parts to make sure all is in order. This will help to identify any bulls that have issues due to a past or current infection or a physical injury not obvious to the naked eye.

Unfortunately if bulls are not checked issues relating to the above are sometimes only discovered as a result of a poor calving or pregnancy test results. This is the 'train wreck' we need to avoid! In our experience with our many Alpine clients there is a DIRECT correlation between those clients achieving consistently better preg test results and the pro active management of the beef producer themselves – those who do all of the above

on a consistent year by year basis are well ahead of those who don't – both in terms of job satisfaction and \$ Profits.

Obviously employing the services of an industry expert to perform these bull tests is another cost. However we strongly recommend that you view this not as a cost but as an investment! We are confident you will get a very significant return in \$ terms over time by putting in place the process outlined above and by employing the right outside expertise.

Industry experts we recommend who could help include the services of specialists like Haydn Shipard or Ian Moreland, of Studcare Genetics. Both Haydn and Ian offer on farm fertility evaluation of bulls and we highly recommend their services – between them they have a combined 70 plus years experience in this field!

Glen Page from Zoetis is also happy to discuss any issues in regards to Vaccination programs and of course your local vet is another handy resource for any of the above.

The third strategy in each joining period is to try and observe each bull you have successfully serving a cow.

The fourth and final strategy is to focus on the cow herd. The majority of cows should be pregnant in the first cycle of joining ( approx. 60–70%), so large numbers of cycling females after the first 3–4 weeks of bull introduction is most likely a KEY indicator of potential problems and should get alarm bells ringing.

There are a number of different strategies to help minimise the risk of bull breakdown during joining. These include multiple sire groups, rotation of bulls through different mobs, as well as the introduction of fresh bulls. Each of these have their own pros and cons and it gets down to personal preference and confidence levels. If you think you have a problem please don't hesitate to use Alpine Manager Chris Oswin as your first port of call – Chris is only too happy to help with trying to identify the problem and help you to identify the solution options available to you.

# RODWELLS

## LOCAL SERVICE NATIONAL STRENGTH

## It's a trust thing

***Representative, negotiator, ally, and mate – this is a relationship business.***

At Rodwells we are known for our team of local, experienced, independent livestock specialists and property agents across Victoria, New South Wales and South Australia.

Backed by the strength of a national network, our Rodwells agents deliver the most effective solution tailored for your livestock. Our knowledge and experience in local markets and seasonality means that you can trust us to deliver the highest standard of service.

And as part of the Ruralco group of businesses, we are able to draw on the resources of Ruralco Property, providing real estate agency services in both rural and residential markets, as well as a comprehensive property management service.

Our agents have access to up-to-the-minute market intelligence, including market trends and performance statistics, and are committed to securing successful buying and selling results for their clients.

Whatever your livestock or property needs, we are confident our service offering provides the best possible outcomes at all levels of the industry supported by our ethos of Local Service, National Strength.

**Talk to your local Rodwells expert...**

**Give us a call for more information about our services and products**

## There are many ways to participate in the Alpine Spring Bull Sale.

### BACKED BY ALPINE'S COMPREHENSIVE QUALITY ASSURANCE PROGRAM

- Independent structural assessment of sale bulls pre-sale by Ian Moreland from Studcare Genetics.
- Independent semen quality test pre-sale has been conducted by Haydn Shipard.
- Alpine 3-year Bull Guarantee (Conditions apply).

- **PREVIEW SUNDAY 17 SEPTEMBER**  
Preview the sale lineup on Sunday 17 September 11am–3pm.
- **PREVIEW BY APPOINTMENT**  
Preview the sale lineup by appointment with Chris Oswin mobile 0427 562 254.
- **ATTEND THE SALE**  
Attend the sale on 20 September in person – sale bulls will be on display from 10am. Refreshments and beef lunch provided.
- **BID ONLINE YOURSELF**  
Bid online yourself via *AuctionsPlus* – please register as soon as you can to allow enough time to become familiar with how things work! [www.auctionsplus.com.au](http://www.auctionsplus.com.au)
- **BID ONLINE WITH ASSISTANCE**  
Bid online with assistance from your local agent at their office.
- **BID VIA PHONE HOOKUP**  
To arrange to bid via phone hookup, please contact either Auctioneer Peter Godbolt 0457 591 929 (*Nutrien Stud Stock*) or Selling agents Dan Ivone 0427 480 548 and Wade Ivone 0487 233 208 (*Nutrien Ivone Agencies*) or Mick Curtis 0428 953 222 and Scott Meehan 0428 952 536 (*Rodwells*)

# The Kilns

Staying at the kilnhouses at Alpine Angus is a unique experience where contemporary luxury and design is combined with the stunning beauty of the Ovens Valley landscape in Porepunkah. The three houses – Cavedon's Kilnhouse, Chinaman's Kilnhouse and The Sorting Shed – are each in a separate part of the Alpine Angus stud. Each of the houses have spectacular views of Mount Buffalo, Feathertop and Bogong, with grape vines and – alpine angus cattle.

For bookings or enquiries  
[www.kilnhouse.com.au](http://www.kilnhouse.com.au) or call  
 Clare Delany 0408553332 or  
 the onsite kilnhouse manager  
 Laura Rigby 0422175345

# BEEF CLASS STRUCTURAL ASSESSMENT

## HOW TO USE THE BEEF CLASS STRUCTURAL ASSESSMENT SYSTEM

Sale bulls have been independently assessed by Ian Moreland.

The Beef Class Assessment System uses a 1–9 scoring system for feet and leg structure;

- A score of 5 is ideal. (Note: Except for Temperament Score where score of 1 is preferable – refer notes below)
- A score of 4 or 6 shows slight variation from ideal, but this includes most animals. An animal scoring 4 or 6 would be acceptable in any breeding program.
- A score of 3 or 7 shows greater variation but would be acceptable in most commercial programs.
- A score of 2 or lower or 8 & higher are low scoring animals and are culled.

Abbreviations:

FC: Front Claw  
 RC: Rear Claw  
 FA: Front Foot/Pastern Angle  
 RA: Rear Foot/Pastern Angle  
 RS: Rear Leg Side View  
 RH: Rear leg Hind View

## AFTER SALES SERVICE AND MANAGEMENT OF BULLS

**BUYING A BULL IS AN INVESTMENT. THIS INVESTMENT SHOULD CONTRIBUTE TO THE GENETICS AND SALE INCOME OF YOUR HERD FOR MANY YEARS. IF YOU ARE TO GET THE MOST FROM YOUR NEW BULL, IT PAYS TO LOOK AFTER HIM WELL, ESPECIALLY IN THE FIRST SEASON OF USE.**

Please remember, when working bulls through the yards, handle them with care. Preferably work them with other cattle and do not use force.

### OUR GUARANTEE

All Alpine bulls for commercial clients are guaranteed for up to three years from the date of sale. See p. 2 for details and conditions. Every effort has been made to ensure our bulls leave Alpine in top working order.

### AFTER SALES SERVICE

Our 3 year guarantee is designed to deliver the best quality assurance. The sale of a bull we regard as the beginning of a relationship with our clients rather than the end of a 'deal'. We also believe we have a vested interest in helping our clients breeding programs in any way we can. If you have any problems with your bulls or any other aspect of your breeding program we invite you to make contact with us regarding your concerns as soon as possible. We endeavor to keep a supply of back up bulls at all times in order to meet our guarantee obligations and as a service to clients whose bulls are accidentally injured.

### ARRIVAL OF YOUR NEW BULL

Bulls can become upset and excited in the sale and delivery process. They are subjected to strange yards, different noises, loss of their mates, different people, different handling methods, trucking, unloading, new paddocks and different water and feed. This can upset animals, which are normally very quiet.

When the bull arrives home, unload him at the yards into a group of house cows, steers or herd cows. Never jump the bull from the back of a truck into a paddock. Bulls from different origins should be put into separate yards with other cattle, steers or cows, for company.

Provide hay and water, and then leave the bull alone until the next day.

All bulls should be drenched for worms every six months with a dectin drench. In addition they may need a drench for fluke if necessary and to be treated for lice. The following annual vaccinations are recommended:

- 7-in-1 vaccine annually.
- vibriosis vaccine annually.
- Pestiguard vaccination annually.

Give particular attention to preventing new bulls bringing vibriosis into a herd. Vibriosis is a sexually transmitted disease that causes infertility and abortions and is most commonly introduced to a clean herd by an infected bull. Vaccinated bulls are free from vibriosis so vaccinating bulls against the disease should be a routine practice. All Alpine Angus bulls are vaccinated.

### MATING BULLS

For an efficient production system we recommend a 6–8 week joining season.

Newly purchased young bulls should not be multiple joined with older herd bulls. They will not be allowed to work much and in keeping them away from the cows, the older, dominant bull will knock them around.

Use new bulls in either single sire groups or with other young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later.

Ensure all bulls used are in good condition prior to working—condition score 3 is ideal. Remember bulls that are too light or heavy in condition may have problems with libido and semen production.

Yearling bulls are still growing strongly, so tend to be leaner, carrying less body fat reserves. The condition of the yearling bulls is critical. If they drop below condition score 3, sperm production may be impaired.

Service Ability Testing is recommended on all bulls prior to joining.

All working bulls should be tested or checked before joining for physical soundness, testicular tone and serving ability.

All bulls to be used must be free moving, active and in good store condition. Bulls may need supplementary feeding before the joining season to bring them up to condition score 3. The Australian Association of Cattle Veterinarians (AACV) defines a normal, fertile bull as 'expected to get 90% of 50 normal, cycling, disease

free females pregnant within 9 weeks, and 60% of these should become pregnant in the first three weeks of joining'. This expectation would apply to 2 year old bulls, but not to younger bulls.

### DURING MATING

Whilst generally all goes to plan we believe a proactive approach is best to ensure you get the best result.

We strongly recommend that you keep a close eye on the bulls if possible when joining. Even though we have performed a service ability test and had your bulls independently structurally assessed bulls are animals and things can still go wrong. Check bulls at least twice each week during joining. Get up close to them and see each bull walk; check for swellings around the sheath and for lameness. Watch them work if possible. A significant number of cows or heifers bulling after 6 weeks of joining may indicate there is a problem. Young bulls are particularly vulnerable in their first season. Common problems that can occur are;

- they may not have built up immunity to IBR (the cattle form of herpes—making it painful to insert the penis).
- or may be more prone to a fever event through the stress of working, new surroundings and establishing their ranking with other bulls. This can render them temporarily infertile for a six week period.
- Problems such as warts on the penis will mean that the bull will need to be attended to.
- and pay particular attention to any sign of abnormal serving problems like 'cork-screw penis'.

Replace any suspect bull immediately. If you think there is or might be a problem please do not hesitate to contact us immediately as we can help you investigate the problem and if available provide a replacement bull so your joining is uninterrupted by any unforeseen event.

If you have to replace a bull, it is always wise to get the problem bull checked by your vet. Sometimes prompt treatment for small problems can avoid culling.

In addition to the Alpine Guarantee, Alpine Angus endeavour to keep a team of back up bulls for commercial clients who have bull breakdowns. If available the back up bull service is free including delivery and collection.

Our thanks to the Angus Society for their contribution to this article.
