WELCOME

Banquet Quarter Pounder Q252 VONQ252. ABS semen sire and \$60,000 top-priced bull at the 2022 Banquet Bull Sale.

The 2024 Alpine Angus Autumn Bull Sale is to be held at the Alpine Sales Complex at Rosewhite on Wednesday 13 March at 1pm offering 100 HBR and APR Angus Bulls. The Sale Bulls will be yarded for inspection by 10am on Sale Day.

Alpine Principal Jim Delany, 'Over the last few years, the Beef Industry enjoyed record market conditions with strong prices for cattle across the board, bulls included. It has been wonderful to see how well so many clients have presented calves they have bred with Alpine bulls, the success they have achieved and the demand they help create for Alpine genetics. Our thanks to them for their great support. In recent times markets cooled more than expected, but its been refreshing to see the corresponding rebound on the back of the Spring and Summer rains that were never meant to be!

With record US cattle prices, hopefully this trend can continue. Just as we share the good times with our clients, we also share the more trying ones. We would also like to acknowledge the faith Angus purebred breeders and AI companies have shown in the uptake of our genetics and hope they will continue to deliver the desired result. Our job is to make sure that whatever the market is doing, our bulls will position our clients at the top of that market with their progeny and promote structural integrity in their herds.'

Alpine source sires from both the USA and Australia from leading cow families, with pedigrees containing sound, proven genetics to compliment the Alpine herd and add performance and carcass merit while maintaining and/or improving basic traits that are a necessity for producing efficient working Angus bulls – sound feet, tight sheathes, good testicles, docility and all-black hides.

Alpine Manager Chris Oswin, 'The aim of our breeding program is to maintain a highly maternal and functional herd of Angus cows. We seek long fronted, feminine, sound, easy-calving cows with good udder-quality that are true-to-type and have a great temperament and structural integrity.'

The March 2024 sale will include lines of Calving Ease bulls by Karoo Main Event and Alpine Pablos Pulse. Both are proven consistent producers of high quality bulls with Main Event siring our 2021 top priced Spring Bull, Alpine Rip Wheeler R144 whose

semen is marketed by Genetics Australia alongside another Main Event son in Alpine Main Event Q192.

There is also a run of higher IMF carcass bulls, with depth and constitution including sons of Murdeduke Quarterback and Alpine Junior M205. Chris Oswin, 'Quarterback sons have sold well across the country and were well appreciated at our last Autumn sale with a long bodied son topping it.'

Alpine Angus will also be offering a set of stout, thick bodied sons of USA Sires Sitz Stellar, Heiken Broadview and Baldrige SR Goalkeeper combining moderate Birth with explosive Growth. These three American sires were targeted for their ability to transmit easy calving, big growth rates and dense, deep bodied progeny.

A bigger framed run of Banquet Quarter Pounder sons, with plenty of length and ideal weaner producers will round out the sale offering. Chris Oswin, 'Quarter Pounder topped Banquets sale a couple of years ago where he impressed with his overall body mass and type. These are our first calves by him.'

For those wishing to view the Sale Bulls prior to Sale Day there are two options – firstly the Sale Preview to be held at the Alpine Sales Complex, Rosewhite on Sunday 3 March from 11am to 3pm – or alternatively by appointment with Alpine Manager Chris Oswin, Mobile 0427 562 254.

All the best,
Jim Delany *Principal*
Chris Oswin *Manager*

SALE INFORMATION

OUR QUALITY ASSURANCE

All Sale bulls must complete the following before being deemed suitable to be offered for sale:

- Semen quality test and physical inspection by Haydn Shipard.
- Independent structural assessment by Ian Moreland from Studcare Genetics.
- All bulls sire verified.
- Performance recorded HBR or APR with Angus Breedplan.
- 7-in-1 vaccination (2 initial and then annually).
- Vibrio vaccination (2 initial and then annually).
- Sale bulls drenched just prior to sale day. Please refer to the NVD.
- Pestivirus ear-notch test negative PI plus Pestiguard vaccination (2 initial and then annually).

ALPINE BACK UP SERVICE

As our Quality Assurance program outlined above demonstrates Alpine Angus have made every effort to ensure Alpine Sale Bulls leave Alpine as fully functional bulls ready to go straight to work!

As our many long term clients will vouch for – Alpine Angus have worked hard over 25 years to service our clients however we can – particularly when things go wrong! Depending on the situation and circumstances various solutions may apply including the loan of a bull; a suitable replacement bull or a full or part credit. Our promise is to work with our clients to find the best solution.

***Please contact us if any problems arise as we endeavour to have spare bulls on hand throughout the joining season to assist clients with injury or other issues.**

AUCTIONS PLUS

Videos and details of all sale bulls will be available online on the Auctions Plus and Angus Australia websites. Sale Day there will be a live audio interface on line to allow for off site bidding

GST

All bulls are sold GST exclusive.

TRANSFER OF REGISTRATION

All bulls will be transferred on the Angus Australia Register. If you have an Angus Society prefix, please provide it when registering.

PRE-SALE INSPECTION

Pre-sale Inspection of Sale Bulls available on Sunday, 3 March from 11am–3pm at the Alpine Sales Complex, Rosewhite. Private inspections prior to sale day by appointment are welcomed. Sale Bulls will be yarded by 10am on Sale Day Wednesday 13 March at the Alpine Sales Complex, Rosewhite.

CATERING

Rosewhite CWA will be providing their excellent catering experience! Please come and enjoy the legendary morning tea and beef lunch they turn out!

Coffee provided by Sixpence Coffee Roasters, Bright. www.sixpencecoffee.com.au

OUTSIDE AGENT REBATE FOR BULL SALE

A 5% Rebate will be paid ONLY to those outside agents who ACCOMPANY buyers to the sale OR to those who INTRODUCE BUYERS IN WRITING 24 hours prior to the sale.

A 2% Rebate will be paid to Agents who handle the sale transaction only.

FREE FREIGHT & DELIVERY

The purchase price paid for bulls includes free delivery by Alpine Angus up to 250km by road from the Alpine Sales Complex. Please note every effort will be made to ensure that delivery will take place within 2 weeks of sale day. Buyer co-operation in co-ordinating delivery is greatly appreciated. Outside of this we will endeavour to assist in any way we can. If bulls are needed ASAP, please let us know.

GENETIC CONDITIONS AND GENOMICS

LOTS 34 & 71 will have EBVs updated in March Breedplan run.

Lot 70 is a CA carrier & 87 is a DD carrier.

All bulls in this catalogue have at a minimum been sire verified and have genomically enhanced EBVs.

DISCLAIMER

Whilst all care and attention has been paid to accuracy in the compilation of this catalogue, neither the vendors, selling agents or representatives thereof assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this sale catalogue.

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

THE ALPINE ANGUS LEGACY

1. ALPINE REAL DEAL R162 CGKR162
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
Semen marketed by ABS. Top priced bull 2022 Autumn Sale, purchased by Harris Thompson, Venturon Livestock and Taimate Angus NZ. Deep bodied, high IMF NORN542 son. Dam by Longshot out of a full sister to Alpine Muzza & Alpine Elevator M268.

2. KAROO MAIN EVENT NENM367
FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
Top priced bull at the 2018 Karoo Bull sale, A calving ease Sire with impeccable structure and outstanding feet. Sons sold to \$75,000. Progeny – Alpine Rip Wheeler R144 and Alpine Main Event Q192 both AI sires for Genetics Australia.

3. BANQUET QUARTER POUNDER Q252 VONQ252
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
Semen sire and \$60,000 top priced bull at 2022 Banquet Bull Sale, Quarter Pounder sires long, growthy cattle with frame & strong heads.

4. ALPINE RIP WHEELER R144 CGKR144
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
Main Event son – our top-priced bull in 2021 Spring Sale, selling to Peter Collins and Luke Graham. Strong, well-balanced elite combination of Birth, Growth spread plus high fat cover. Semen sire for Genetics Australia currently one of their highest volume semen sellers!

5. ALPINE MUZZA M245 CGKM245
FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
Retained by Alpine for his excellent type and temperament, Muzza throws quiet, true to type Angus with fleshing and depth. Full brother Alpine Elevator M268, topped our sale in 2018 and their sister is the grandam of Alpine Real Deal R163 also featured on this Legacy page. Muzza throws quiet, true to type Angus with fleshing and depth. Sons have sold to \$28,000.

6. ALPINE KNOCKOUT Q211 CGKQ211
FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
Quiet and sound, with a massive scrotal, we retained Q211 to form a cornerstone of our breeding program over the next few years. His sire Karoo Knockout is the best we have used for body mass and depth and his ET donor dam is an excellent structured A241 daughter.

7. ALPINE PABLOS PULSE P348 CGKP348
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
Pablos Pulse has proven to be a sure fire Calving Ease sire, producing light born calves with growth and vigour. Sons have made to \$25,000. Sired by Te Mania Long Shot, like Rip Wheeler he is out of a Sterita Park Black Jack daughter, while his grandam K233 has a few ET bred bulls in this sale.

8. COONAMBLE NAVIGATOR N245 WDCN435
Navigator is super thick and wide topped. A brother Coonamble Nic Nat is an AI sire for Agri Gene. Navigator sons are born light and pack plenty of punch.

9. ALPINE ELEVATOR M268 CGKM268
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 4
Top priced bull at our 2018 Autumn bull sale, selling to Wes Hall, Tasmania. Full ET brother to Alpine Muzza M245. Elevator M268 sires sound, powerful sons with presence. Two sons, S049 and R205 are featured below. Sons have sold to \$52,000.

10. ALPINE ELEVATOR S049 CGKS049
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
2nd top priced bull from our 2022 Spring Sale selling to Cascade Angus, Tamworth. Big bodied M268 son with great thickness.

11. ALPINE ELEVATOR R205 CGKR205
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 4
2nd top priced bull from our 2022 Autumn Sale, selling to Arden Angus, Adelong NSW. Big bodied, quiet M268 son with tremendous growth, plenty of fleshing and strong carcase attributes.

12. ALPINE MAIN EVENT Q192 CGKQ192
FC 6 / RC 6 / FA 5 / RA 5 / RS 5 / RH 4
By Main Event out of a Texas Hold'em daughter, this calving ease son was purchased by Genetics Australia

in the 2021 Autumn sale as an AI sire. Q192 is one of their highest volume semen sellers.

13. ALPINE 38 SPECIAL 5021 CGKS021
FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
This ST Genetics semen sire was our top priced bull from the 2022 Spring Sale at \$120,000 selling to Arkle Angus W.A. 5021 is a strong bodied 38 Special son with excellent structure and EBVs.

14. ALPINE RONALDO R232 CGKR232
FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
Super sound, long bodied N542 son with Calving Ease, low Birth and high Carcase credentials. Purchased by Brad Cavanagh, Hardhat Angus with semen marketed by ST Genetics Australia.

15. ALPINE NEXT GEN R272 CGKR272
FC 6 / RC 6 / FA 5 / RA 5 / RS 6 / RH 5
Flush brother to Ronaldo and Rock Solid, this low Birth, heavy bodied sire was one of our high sellers in the 2021 Spring sale selling to Dulverton and Five Star Angus studs, NSW.

16. ALPINE ROCK SOLID R289 CGKR289
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
Purchased by JB Angus as one of our high sellers at the Autumn 2022 sale. Rock Solid rounds off an amazing set of three flush brothers from the incredible breeding female, CGKM152.

SUMMARY OF ANGUS EBVs & \$ INDEX VALUES

The following is a brief description of EBVs and \$Index values and Accuracies.

Accuracy (%) – Provides an indication of the reliability of an EBV. As more performance information becomes available on an animal (or it's progeny, or relatives) then the accuracy of it's EBVs for particular traits will increase. See Understanding Accuracies for a more detailed explanation.

Calving Ease DIR (%) – Estimates of the genetic differences between animals in the ability of their calves from 2 year old heifers to be delivered without assistance.

Calving Ease DTRS (%) – Estimates of the genetic differences between animals in the ability of their 2 year old daughters to calve without assistance.

Gestation Length (Days) – Estimates of the genetic differences between animals in the number of days from the date of conception to the calf birth date.

Birth Wt (kg) – Estimates of the genetic differences between animals in calf birth weight.

200-Day Wt (kg) – Estimates of the genetic differences between animals in liveweight at 200 days of age.

400-Day Wt (kg) – Estimates of the genetic differences between animals in liveweight at 400 days of age.

600-Day Wt (kg) – Estimates of the genetic differences between animals in liveweight at 600 days of age.

Mature Cow Weight (kg) – Estimates of the genetic differences between animals in cow weight at 5 years of age.

Milk (kg) – Estimates of the genetic differences between animals in milk production, expressed as variation in 200-day weight of daughter's calves.

Scrotal Size (cm) – Estimates of the genetic differences between animals in scrotal circumference at 400 days of age.

Days to Calving – Estimates of the genetic differences in female fertility, expressed as the number of days from the start of the joining period until subsequent calving.

Carcase Weight (kg) – Estimates of the genetic differences between animals in carcase weight, adjusted to 650 days of age.

Eye Muscle Area (cm²) – Estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site, in a 300kg carcase.

Rib Fat (mm) – Estimates of the genetic differences between animals in fat depth at the 12/13th rib site, in a 300 kg carcase.

Rump Fat (mm) – Estimates of the genetic differences between animals in fat depth at the P8 rump site, in a 300kg carcase.

Retail Beef Yield % (RBY%) – Estimates of the genetic differences between animals in percentage retail beef yield, in a 300kg carcase.

Intra-Muscular Fat % (IMF%) – Estimates of the genetic differences between animals in percentage intra-muscular fat (marbling) at the 12/13th rib site, in a 300 kg carcase.

Trial Net Feed Intake (NFI) – Estimates of the genetic differences in feed intake for animals adjusted to the same growth rate and weight base.

Selection Index \$A Index – Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.

Selection Index \$A-L Index – The \$A-L index is similar to the \$A index but is modelled on a production system where feed is surplus to requirements for the majority of the year, or the cost of supplying additional feed when animal feed requirements increase is low.

While the \$A aims to maintain mature cow weight, the \$A-L does not aim to limit the increase in mature cow weight as there is minimal cost incurred if the feed maintenance requirements of the female breeding herd increase as a result of selection decisions.

- Quarter Pounder topped the 2022 Banquet sale at \$60,000, where he was well fleshed and quiet, with great eye appeal.
- He produces strong headed, stretchy cattle with plenty of growth and a good frame.
- He is the ideal sire for those looking to add extra frame, length and punch to their weaners.
- We were drawn to Quarter Pounder for his stout body, excellent fleshing and scrotal and strong Angus head.
- Furthermore we identified him as a sire bred for the physical attributes Banquet target, while maintaining a pleasing to the eye data set.
- We were fortunate enough to be part of the syndicate that purchased him.

- Coonamble Navigator is a super thick, wide-topped Discovery son out of a leading Coonamble dam.
- Female line goes back to Imran Rosebud U17, most notably the dam of Coonamble Z3. Z3 and his sons have had a significant impact on our herd.
- Full brother to Coonamble Nic Nat, a semen sire for Agri Gene and Coonamble Next Step, a herd sire at Coonamble Angus.
- He produces light born, quick growing calves that are deep with great muscle expression.

- Muzza is a well fleshed, moderate Birth, easy keeping Elevator son displaying true breed character.
- Progeny are well made and docile with plenty of growth potential.
- His dam WDCJ15 has produced stud sires and sale toppers for Coonamble. She is a daughter of Lowan A61, the damline that has had a massive impact on Australian Angus.
- Part of a flush from Coonamble that has had a big impact on our herd going forward.
- We retained Muzza due to his excellent combination of superb structure and type (straight 5's when assessed), female breeding potential and growth.
- wo flush brothers M268 & achieved the top and 4th top price in our 2018 sale, with M268 going on to produce some of our higher priced bulls since with sons topping to \$56,000.
- Their sister, M242 is the grandam of Real Deal, our \$90,000 sale topper a couple of years ago, and now ABS semen sire seeing high use by many prominent breeders.

11.2	-3	-0.3	0.8	5	\$211	\$356

- M205 is a high Carcase Merit sire we used as a mature bull to inject IMF into our herd. He produces long, big scrotal calves with good tops.
- He is sired by Coonamble Junior, a bull that did an excellent job raising carcase EBVs without sacrificing growth and constitution. Junior's dam, Lowan A61 is one of the most impactful females in the Australian Angus, with her and her daughters producing multiple purebred Angus Herd and AI sires.
- His highly fertile dam has 5 daughters in our herd.

EMA	RIB	P8	RBY	IMF	\$A+	\$A-L
5.2	2.1	2.8	-1	5.2	\$230	\$400

- Quarterback is a long, sound high IMF bull backed by an impressive stud producing cow family.
- He offers a great combination of short gestation length, birth to Growth spread, decent scrotal and high IMF.
- His calves are born light and early, are well structured with excellent Carcase traits.
- We used Quarterback to improve the Carcase potential of our cattle without sacrificing constitution.
- He stamps his sons with length.

10 SONS
KAROO MAIN EVENT M367

IDENTIFIER: NENM367
STATUS: HBR
BIRTH: 20/9/2016

NOTES: CALVING EASE/FAT/ STRUCTURE

CE-DIR	CE-DTR	GL	BW	200	400	600
4	4.2	-6.3	2.7	42	91	112

EMA	RIB	P8	RBY	IMF	\$A+	\$A-L
2	3.1	5.7	-0.7	3	\$191	\$337

- Main Event is a free moving, long, clean fronted bull with impeccable structure.
- Upon arrival at Alpine he was assessed by Ian Moreland as straight 5's for structure and amongst the soundest bulls he had cast his eye over.
- Main Event has since proven to be one of the elite foot improvers in our herd. This year's sale further enhances this with half his progeny in this sale scoring 5s for feet.
- Main Event stems from arguably Karoo's most successful female line, Karoo Doris Y137. Full brother in blood to Main Event, Karoo Realist N278 was a high seller for Karoo and a semen sire for Breeder Genetics.
- Calves are born light, with great structure and grow out well.
- Main Event is the sire of our \$70,000 sale topper Alpine Rip Wheeler R144, a semen sire for Genetics Australia as well as Main Event Q192, also a semen sire for G.A.

6 SONS
BALDRIDGE SR GOALKEEPER

IDENTIFIER: USA19356243
STATUS: HBR
BIRTH: 7/1/2019

NOTES: GROWTH/BODY/ DOCILITY

CE-DIR	CE-DTR	GL	BW	200	400	600
4.3	1.2	-2.3	4.3	68	125	148

EMA	RIB	P8	RBY	IMF	\$A+	\$A-L
12.3	-0.2	-0.3	0.4	2.1	\$248	\$417

- Goalkeeper has proven somewhat of a revelation from his first crop of Australian calves with bulls selling extremely well and topping to \$100,000 from limited progeny last year.
- He is regally bred being by Sydgen Enhance, the USA's highest bull for registrations twice a few years ago out of a daughter of Baldridge Isabel Y69, a true matron of the breed with her cow family producing too many quality bulls and AI sires to mention.
- On inspection Goalkeeper was docile, square made with a deep body and a wide strong topline. He throws calves very similar to this with excellent disposition, good bodies and big EMA.
- Over the next couple of years Goalkeeper will be one of the highest represented sirelines in our sales.

5 SONS
SITZ STELLAR 726D

IDENTIFIER: USA18397542
STATUS: HBR
BIRTH: 23/1/2016

NOTES: FEET/BODY/ BIRTH TO GROWTH

CE-DIR	CE-DTR	GL	BW	200	400	600
6.1	8.2	-9.1	2.6	56	108	141

EMA	RIB	P8	RBY	IMF	\$A+	\$A-L
4.8	3.9	3.6	-0.1	1.5	\$258	\$448

- Stellar and his sons have topped numerous sales in the USA, highlighted by his grandson Connealy Craftsman topping at \$500,000.
- Calves are slick skinned and good footed, with excellent bodies and plenty of depth.
- Sitz describe him as the following – "Stellar is a super thick topped deep sided bull that transmits added substance, fleshing ability, muscle shape, and is becoming recognized as one of the true quality foot improvers of the breed. The Stellar progeny have consistently performed very well at all levels. The daughters have excellent udders, and his progeny PAP test extremely well. A very well rounded bull that will produce real world cattle."

MAINTAINING & MONITORING BULL HEALTH

VITAL TOOLS TO MAXIMISING LIVE CALVES BORN: TOP BEEF PRODUCERS NEVER SET AND FORGET!

All Alpine sale bulls have been semen tested and physically examined for penile and testicle abnormalities by Haydn Shipard of Agri Gene. From our point of view the QA program for our bulls is designed to ensure we have done everything we can for them to be in optimum condition for their FIRST joining after they leave Alpine.

Once your Alpine Bull arrives at your farm the baton passes to you! This is because Bulls face a range of variables throughout their working lives – but it is important to know they at their greatest risk of problems in their FIRST joining season.

Bull injuries, disease, accidents, general herd health and dumb ass bad luck play a role in the success of a joining program. Closely monitoring your bull(s) and cow herd during as well as pre joining is essential to avoid a 'train wreck' come pregnancy testing – which can involve big losses in \$ terms and a big drag on farm cash flow.

There are four key tools to maximise bull performance and pregnancy rates year after year:

The first is to maintain the annual vaccination program for pestivirus, vibriosis and leptospirosis for the rest of a bulls working life.

The second is to get ALL of your bulls checked prior to joining by the appropriate industry experts for your bulls' semen quality as well as allowing a physical evaluation of their working parts to make sure all is in order. This will help to identify any bulls that have issues due to a past or current infection or a physical injury not obvious to the naked eye.

Unfortunately if bulls are not checked issues relating to the above are sometimes only discovered as a result of a poor calving or pregnancy test results. This is the 'train wreck' we need to avoid! In our experience with our many Alpine clients there is a DIRECT correlation between those clients achieving consistently better preg test results and the pro active management of the beef producer themselves – those who do all of the above

on a consistent year by year basis are well ahead of those who don't – both in terms of job satisfaction and \$ Profits.

Obviously employing the services of an industry expert to perform these bull tests is another cost. However we strongly recommend that you view this not as a cost but as an investment! We are confident you will get a very significant return in \$ terms over time by putting in place the process outlined above and by employing the right outside expertise.

Industry experts we recommend who could help include the services of specialists like Haydn Shipard or Ian Moreland, of Studcare Genetics. Both Haydn and Ian offer on farm fertility evaluation of bulls and we highly recommend their services – between them they have a combined 70 plus years experience in this field!

Glen Page from Zoetis is also happy to discuss any issues in regards to Vaccination programs and of course your local vet is another handy resource for any of the above.

The third strategy in each joining period is to try and observe each bull you have successfully serving a cow.

The fourth and final strategy is to focus on the cow herd. The majority of cows should be pregnant in the first cycle of joining (approx. 60–70%), so large numbers of cycling females after the first 3–4 weeks of bull introduction is most likely a KEY indicator of potential problems and should get alarm bells ringing.

There are a number of different strategies to help minimise the risk of bull breakdown during joining. These include multiple sire groups, rotation of bulls through different mobs, as well as the introduction of fresh bulls. Each of these have their own pros and cons and it gets down to personal preference and confidence levels. If you think you have a problem please don't hesitate to use Alpine Manager Chris Oswin as your first port of call – Chris is only too happy to help with trying to identify the problem and help you to identify the solution options available to you.

RODWELLS

LOCAL SERVICE NATIONAL STRENGTH

It's a trust thing

Representative, negotiator, ally, and mate – this is a relationship business.

At Rodwells we are known for our team of local, experienced, independent livestock specialists and property agents across Victoria, New South Wales and South Australia.

Backed by the strength of a national network, our Rodwells agents deliver the most effective solution tailored for your livestock. Our knowledge and experience in local markets and seasonality means that you can trust us to deliver the highest standard of service.

And as part of the Ruralco group of businesses, we are able to draw on the resources of Ruralco Property, providing real estate agency services in both rural and residential markets, as well as a comprehensive property management service.

Our agents have access to up-to-the-minute market intelligence, including market trends and performance statistics, and are committed to securing successful buying and selling results for their clients.

Whatever your livestock or property needs, we are confident our service offering provides the best possible outcomes at all levels of the industry supported by our ethos of Local Service, National Strength.

Talk to your local Rodwells expert...

There are many ways to participate in the Alpine Spring Bull Sale.

BACKED BY ALPINE'S COMPREHENSIVE QUALITY ASSURANCE PROGRAM

- Independent structural assessment of sale bulls pre-sale by Ian Moreland from Studcare Genetics.
- Independent semen quality test pre-sale has been conducted by Haydn Shipard.
- Alpine Backup Service (see Sale Information)

- **PRE-SALE INSPECTION SUNDAY 3 MARCH**
Preview the sale lineup on Sunday 3 March 11am–3pm.
- **PREVIEW BY APPOINTMENT**
Preview the sale lineup by appointment with Chris Oswin mobile 0427 562 254.
- **ATTEND THE SALE**
Attend the sale on 13 March in person – sale bulls will be on display from 10am. Refreshments and beef lunch provided.
- **BID ONLINE YOURSELF**
Bid online yourself via *AuctionsPlus* – please register as soon as you can to allow enough time to become familiar with how things work! www.auctionsplus.com.au
- **BID ONLINE WITH ASSISTANCE**
Bid online with assistance from your local agent at their office.
- **BID VIA PHONE HOOKUP**
To arrange to bid via phone hookup, please contact either Auctioneer Peter Godbolt 0457 591 929 (*Nutrien Stud Stock*) or Selling agents Dan Ivone 0427 480 548 and Wade Ivone 0487 233 208 (*Nutrien Ivone Agencies*) or Mick Curtis 0428 953 222 and Scott Meehan 0428 952 536 (*Rodwells*)

BEEF CLASS STRUCTURAL ASSESSMENT

HOW TO USE THE BEEF CLASS STRUCTURAL ASSESSMENT SYSTEM

Sale bulls have been independently assessed by Ian Moreland.

The Beef Class Assessment System uses a 1–9 scoring system for feet and leg structure;

- A score of 5 is ideal. (Note: Except for Temperament Score where score of 1 is preferable – refer notes below)
- A score of 4 or 6 shows slight variation from ideal, but this includes most animals. An animal scoring 4 or 6 would be acceptable in any breeding program.
- A score of 3 or 7 shows greater variation but would be acceptable in most commercial programs.
- A score of 2 or lower or 8 & higher are low scoring animals and are culled.

Abbreviations:

FC: Front Claw
 RC: Rear Claw
 FA: Front Foot/Pastern Angle
 RA: Rear Foot/Pastern Angle
 RS: Rear Leg Side View
 RH: Rear leg Hind View

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350. If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email office@angusaustralia.com.au

AFTER SALES SERVICE AND MANAGEMENT OF BULLS

BUYING A BULL IS AN INVESTMENT. THIS INVESTMENT SHOULD CONTRIBUTE TO THE GENETICS AND SALE INCOME OF YOUR HERD FOR MANY YEARS. IF YOU ARE TO GET THE MOST FROM YOUR NEW BULL, IT PAYS TO LOOK AFTER HIM WELL, ESPECIALLY IN THE FIRST SEASON OF USE.

OUR QUALITY ASSURANCE

All Sale bulls must complete the following before being deemed suitable to be offered for sale:

- Semen quality test and physical inspection by Haydn Shipard.
- Independent structural assessment by Ian Moreland from Studcare Genetics.
- All bulls sire verified.
- Performance recorded HBR or APR with Angus Breedplan.
- 7 in 1 vaccination (2 initial and then annually).
- Vibrio vaccination (2 initial and then annually).
- Sale bulls drenched just prior to sale day. Please refer to the NVD.
- Pestivirus ear notch test negative PI plus Pestiguard vaccination (2 initial and then annually).

ALPINE BACK UP SERVICE

As our Quality Assurance program outlined above demonstrates Alpine Angus have made every effort to ensure Alpine Sale Bulls leave Alpine as fully functional bulls fit and ready to go straight to work!

The sale of a bull we regard as the beginning of a 'relationship' with our clients rather than the end of a 'deal'.

As our many long term clients will attest Alpine Angus have worked hard over 25 years to service our clients however we can – particularly when things go wrong! Depending on the situation and circumstances various solutions may apply including the loan of a bull; a suitable replacement bull or a full or part credit. Our promise is to work with our clients to find the best solution.

***Please contact us if any problems arise as we endeavour to have spare bulls on hand throughout the joining season to assist clients with injury or other issues.**

ARRIVAL OF YOUR NEW BULL

Please bear in mind, when working bulls through the yards, handle them with care. Preferably work them with other cattle and do not use force. Bulls can become

upset and excited in the sale and delivery process. They are subjected to strange yards, different noises, loss of their mates, different people, different handling methods, trucking, unloading, new paddocks and different water and feed. This can upset animals, which are normally very quiet.

When the bull arrives home, unload him at the yards into a group of house cows, steers or herd cows. Never jump the bull from the back of a truck into a paddock. Bulls from different origins should be put into separate yards with other cattle, steers or cows, for company.

Provide hay and water, and then leave the bull alone until the next day.

All bulls should be drenched for worms every six months with a dectin drench.

In addition they may need a drench for fluke if necessary and to be treated for lice. The following annual vaccinations are recommended:

- 7-in-1 vaccine annually.
- vibriosis vaccine annually.
- Pestiguard vaccination annually.

Give particular attention to preventing new bulls bringing vibriosis into a herd. Vibriosis is a sexually transmitted disease that causes infertility and abortions and is most commonly introduced to a clean herd by an infected bull. Vaccinated bulls are free from vibriosis so vaccinating bulls against the disease should be routine practice. All Alpine Angus bulls are vaccinated.

MATING BULLS

For an efficient production system we recommend a 6–8 week joining season.

Newly purchased young bulls should not be multiple joined with older herd bulls. They will not be allowed to work much and in keeping them away from the cows, the older, dominant bull will knock them around.

Use new bulls in either single sire groups or with other young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later.

Ensure all bulls used are in good condition prior to working – condition score 3 is ideal. Remember bulls that are too light or heavy in condition may have problems with libido and semen production.

Yearling bulls are still growing strongly,

so tend to be leaner, carrying less body fat reserves. The condition of the yearling bulls is critical. If they drop below condition score 3, sperm production may be impaired.

Service Ability Testing is recommended on all bulls prior to joining.

All working bulls should be tested or checked before joining for physical soundness, testical tone and serving ability.

All bulls to be used must be free moving, active and in good store condition. Bulls may need supplementary feeding before the joining season to bring them up to condition score 3. The Australian Association of Cattle Veterinarians (AACV) defines a normal, fertile bull as 'expected to get 90% of 50 normal, cycling, disease-free females pregnant within 9 weeks, and 60% of these should become pregnant in the first three weeks of joining'. This expectation would apply to 2-year-old bulls, but not to younger bulls.

DURING MATING

Whilst generally all goes to plan we believe a proactive approach is best to ensure you get the best result.

We strongly recommend that you keep a close eye on the bulls if possible when joining. Even though we have performed a service ability test and had your bulls independently structurally assessed bulls are animals and things can still go wrong. Check bulls at least twice each week during joining. Get up close to them and see each bull walk; check for swellings around the sheath and for lameness.

Watch them work if possible. A significant number of cows or heifers bulling after 6 weeks of joining may indicate there is a problem. Young bulls are particularly vulnerable in their first season. Common problems that can occur are;

- They may not have built up immunity to IBR (the cattle form of herpes – making it painful to insert the penis).
- or may be more prone to a fever event through the stress of working, new surroundings and establishing their rank-ing with other bulls. This can render them temporarily infertile for a six week period.
- Problems such as warts on the penis will mean that the bull will need to be attended to.
- Pay particular attention to any sign of abnormal serving problems like 'cork-screw penis'.
