WELCOME

Our 2026 Spring Bull Sale is heavily influenced by explosive growth rate sires, providing the ideal genetic base to produce heavy weaners with the inherent ability to continue growing and add value through all sectors of the supply chain.

A range of high-growth USA AI sires are represented including Kenny Rogers, two Connealy Clarity sons in Poss Winchester and Hart Network, Connealy Craftsman and Ellingson Prolific. These are complimented by tried and tested Alpine sires including Knockout Q211, Real Deal R163, Rock Solid R289, Special S021, Elevator M268 plus a new addition Titan, CGK22T150.

The American AI sires used are predominately true curve-benders combining moderate Birth Weights with massive growth EBVs sitting in the top 1% of the breed for 200 and 400 Day Weights and beyond. They offer a range of maturity patterns with Kenny Rogers providing plenty of length and frame, through to Hart Network offering heavy fleshing and dense bodies.

The Alpine sires represented in the sale all are extremely sound with excellent bodies and fleshing, first class structural data and are out of breed-leading cow families that have stood the

test of time. Alpine Real Deal and Alpine 38 Special S021 are now proven industry AI sires with sons topping sales throughout Australia and now New Zealand, while Alpine Qualifier and Alpine Elevator M268 have provided plenty of quality bulls through our sales with M268 especially producing multiple sons amongst our highest-selling bulls.

As usual there is a selection of ET calves out of some of our better females, including Alpine Longshot P354, the dam of Real Deal and this Autumn's \$120,000 high-seller Alpine Special V245. Also represented is a line of sons out of one of our favourite females in Alpine Blackbird N376, an amazingly sound, quiet cow stemming from the Davis YR Blackbird 558H cow line, one of the most iconic carcass cows in American Angus history. The consistent breed leading Net Feed Intake (NFI) EBVs of her progeny is notable.

Also featured are donors Alpine Blackbird T114, an Alpine Qualifier daughter of Alpine Blackbird N376 and Alpine Lowan T015 a Sitz Stellar daughter out of the dam of our joint high-selling bull in Alpine 38 Special S021.

**All the best,
Jim Delany, Principal
Chris Oswin, Alpine Manager**

SALE INFORMATION

OUR QUALITY ASSURANCE

All Sale bulls must complete the following before being deemed suitable to be offered for sale:

- Semen quality test and physical inspection by Haydn Shipard.
- Independent structural assessment by Ian Moreland from Studcare Genetics.
- All bulls sire verified.
- Performance recorded HBR or APR with Angus Breedplan.
- 7-in-1 vaccination (2 initial and then annually).
- Vibrio vaccination (2 initial and then annually).
- Sale bulls drenched just prior to sale day. Please refer to the NVD.
- Tested PI negative plus Pestiguard vaccination (2 initial and then annually).

ALPINE AFTER SALES SERVICE

As our Quality Assurance program outlined above demonstrates Alpine Angus have made every effort to ensure Alpine Sale Bulls leave Alpine as fully functional bulls ready to go straight to work!

As our many long term clients will vouch for – Alpine Angus have worked hard over 26 years to service our clients however we can – particularly when things go wrong! Depending on the situation and circumstances various solutions may apply including the loan of a bull; a suitable replacement bull or a full or part credit. Our promise is to work with our clients to find the best solution.

***Please contact Alpine Manager Chris Oswin (0427 562 254) if any problems arise as we endeavour to have spare bulls on hand throughout the joining season to assist clients with injury or other issues.**

AUCTIONS PLUS

Videos and details of all sale bulls will be available online on the Auctions Plus and Angus Australia websites. Sale Day there will be a live audio interface on line to allow for off site bidding

GST

All bulls are sold GST exclusive.

TRANSFER OF REGISTRATION

All bulls will be transferred on the Angus Australia Register. If you have an Angus Society prefix, please provide it when registering.

PRE-SALE INSPECTION

Pre-sale Inspection of Sale Bulls available on Sunday, 13 September from 11am–3pm at the Alpine Sales Complex, Rosewhite. Private inspections prior to sale day by appointment are welcomed. Sale Bulls will be yarded by 10am on Sale Day Wednesday 16 September at the Alpine Sales Complex, Rosewhite.

CATERING

Rosewhite CWA will be providing their excellent catering experience! Please come and enjoy the legendary morning tea and beef lunch they turn out!

Coffee provided by:
Sixpence Coffee Roasters, Bright.
www.sixpencecoffee.com.au

OUTSIDE AGENT REBATE FOR BULL SALE

A 5% Rebate will be paid ONLY to those outside agents who ACCOMPANY buyers or – a 2% Rebate will be paid to those who INTRODUCE BUYERS IN WRITING 24 hours prior to the sale.

FREE FREIGHT & DELIVERY

The purchase price paid for bulls includes free delivery by Alpine Angus up to 250km by road from the Alpine Sales Complex. Please note every effort will be made to ensure that delivery will take place within two weeks of sale day. Buyer co-operation in co-ordinating delivery is greatly appreciated. Outside of this we will endeavour to assist in any way we can. If bulls are needed ASAP, please let us know.

GENETIC CONDITIONS AND GENOMICS

All bulls in this catalogue have at a minimum been sire verified and have genomically enhanced EBVs.

DISCLAIMER

Whilst all care and attention has been paid to accuracy in the compilation of this catalogue, neither the vendors, selling agents or representatives thereof assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this sale catalogue.

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

THE ALPINE ANGUS LEGACY

1. ALPINE REAL DEAL R163 CGKR163 *2 SONS SELL
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
Top priced bull 2022 Autumn Sale at \$90,000 purchased by Venturon Livestock WA & Taimate Angus NZ with semen marketed by ABS. Deep bodied, high growth & IMF and very sound. Sons have topped multiple sales selling to \$100,000 in Australia as well as a NZ record \$159,000.

2. ALPINE TESTAMENT V219 CGK24V219
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
Our second top-priced bull from our 2026 Autumn Sale, purchased by Chris Connelly, Omeo. Out of Real Deal's dam P354, V219 is a long, clean-made bull with slick coat and exceptional Birth-to-Growth spread.

3. ALPINE TESTAMENT V220 CGK24V220
FC 6 / RC 6 / FA 5 / RA 5 / RS 5 / RH 4
Used by Alpine as a yearling, V220 is a full brother to V219, once again being out of Real Deal's dam P354. V220 was another high-selling bull from our Autumn Sale, going to the Ferguson family, Bowmans Forrest. A balanced bull with clean skin we eagerly await his calves.

4. ALPINE KNOCKOUT Q211 CGKQ211 *3 SONS SELL
FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
An outstanding son of Karoo Knockout out of a very sound donor J110, Q211 is one of the most complete bulls we have used. Super thick with exceptional disposition, scrotal, skeletal design and foot quality.

5. ALPINE RIP WHEELER R144 CGKR144
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
This Karoo Main Event son was our \$60,000 top price bull in our 2021 Spring Sale, selling to Peter Collins and Luke Graham with semen marketed by Genetics Australia. Strong, well balanced with an elite combination of Birth to Growth spread plus high fat cover.

6. ALPINE ELEVATOR M268 CGKM268 *3 SONS SELL
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
Top price bull at our 2018 sale, selling to Wes Hall, Tasmania. Full ET brother to Alpine Muzza M245 & Real Deal's granddam CGKM242. A Coonamble embryo, M268 sires sound, powerful sons with presence, including the next two bulls featured. Sons have sold to \$52,000.

7. ALPINE ELEVATOR R205 CGKR205
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 4
2nd top-price bull from our 2022 Autumn Sale, selling to Arden Angus, Adelong NSW. Big-bodied, quiet M268 son with tremendous growth, plenty of fleshing and strong carcass attributes.

8. ALPINE ELEVATOR S049 CGK21S049
FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5
2nd top-price from our 2022 Spring Sale selling to Cascade Angus, Tamworth. Big-bodied M268 son with great thickness.

9. ALPINE RIGHT TIME V014 CGK24V014

FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5

Top-priced bull \$60,000 from our 2025 Spring Bull Sale purchased by Wes & Ange Jeffery, Falconvale. One of the best bulls we have bred phenotypically.

10. ALPINE SPECIAL V245 CGK24V245

FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5

Purchased by Shane & Jodie Foster, Boonaroo Angus this bull was a standout and sold for our equal record price of \$120,000 in the Autumn. He is the first calf we have sold from his elite sire, Alpine 38 Special S021 and is out of the dam of Real Deal, P354.

11. ALPINE 38 SPECIAL S021 CGK21S021 *1 SON SELL

FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5

This ST Genetics semen sire was our top-priced bull from the 2022 Spring Sale at \$120,000 selling to Arkle Angus WA, where he has bred extremely well.

12. ALPINE RONALDO R232 CGKR232

FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5

Super sound, long-bodied N542 son with Calving Ease, low Birth & high carcass credentials, Ronaldo was purchased by Brad Cavanagh, Hardhat Angus with semen marketed by ST Genetics. Ronaldo produced Hardhat's top 4 priced bulls last year!

13. ALPINE NEXT GEN R272 CGKR272

FC 6 / RC 6 / FA 5 / RA 5 / RS 6 / RH 5

Flush brother to Ronaldo and Rock Solid, this low birth, heavy-bodied sire was one of our high sellers in the 2021 Spring Sale selling to Dulverton and Five Star Angus studs, NSW.

14. ALPINE ROCK SOLID R289 CGKR289 *1 SON SELL

FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5

Rock Solid rounds off an amazing set of three flush brothers from the great breeding female, CGKM152. R289 is now a herd sire at Coonamble Angus, WA, where he produced their top-priced bull this year.

15. ALPINE UNDERTAKER U358

FC 6 / RC 5 / FA 6 / RA 5 / RS 5 / RH 5

Top-priced bull from our 2025 Autumn Bull Sale, purchased by Agri Gene as a semen sire. He is the first calf of CGK21S227, a cow now in our donor program.

16. ALPINE PARATROOPER U270

FC 6 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5

U270 is a great specimen, with excellent EBVs, he is one of 5 sons of our donor cow Alpine Longshot P354 featured here, showing the massive impact she has made.

THE BULLS BEHIND THE COWS

The sires below have all demonstrated tremendous longevity, having walked cows here at Alpine for multiple seasons and are heavily represented in the cowlines of this sale offering. We've always aimed to purchase high quality, sound functional bulls to run with our cows. Targeting specific sirelines out of the best performing cow families from programs of respected breeders has been our strategy. The following is a snapshot of some of the sires we've owned that form the backbone of our cow herd.

1.

5.

6.

2.

3.

1. KAROO MAIN EVENT NENM367

FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5

Top priced bull from the 2018 Main Event has consistently left us progeny with superior foot quality. Sons have sold to \$70,000 and his daughters are excellent cows with good udders, long clean front and of course excellent structure. His damline extends from one of Karoo's top cows, Doris Y137.

2. LARGO FULL HOUSE

FC 5 / RC 5 / FA 6 / RA 5 / RS 5 / RH 5

This Coonamble Z3 son is one of the best we have used for foot quality and produces daughters that last. Out of the Dream family with grand dam Vermont Dream Y301 (168 progeny) and her daughters being responsible for a variety of Australian record breaking progeny.

3. HAZELDEAN HIGH ROLLER NHZH6

FC 5 / RC 5 / FA 6 / RA 5 / RS 5 / RH 5

An absolute favourite and worked up until 11 years of age. Daughters are docile and feminine. Sire TC Total and damsire LT Bando 9074 are absolute cowmakers. Dam Hazeldean A90 (22 progeny) also the dam of Dunoon herd sire Hazeldean Harlequin.

4. KAROO KNOCKOUT NENK176

FC 6 / RC 6 / FA 5 / RA 5 / RS 5 / RH 5

A Matauri Reality son deep and thick and his daughters are the same. Interestingly his mother and grandmother are both by sons of one of Karoo's best cows in Raff Doris Y137 (63 progeny). Karoo Main Event and the AI sire Karoo Realist are both out of Y137 daughters.

5. STERITA PARK BLACK JACK SPLJ231

FC 6 / RC 6 / FA 5 / RA 5 / RS 5 / RH 5

A half brother to leading USA AI sire Sydgen Trust, Blackjack produced moderate framed high-growth cattle with low mature-cow weights. Damsire of our \$70,000 Rip Wheeler.

6. BOWMONT JACKPOT SRKJ310

FC 5 / RC 5 / FA 6 / RA 5 / RS 5 / RH 5

An Ardrossan Equator A241 son, exceptionally sound and a producer of angular, long fronted daughters. Grandam V9 (22 progeny) is the dam of Ardrossan X3 & X15, two top AI sires of their day with a combined 6,000 registered progeny.

7. ALPINE MUZZA CGKM245

FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5

Part of an incredible flush from Coonamble resulting in Muzza, M268 and Real Deal's Grandmother M242. Dam J15 is one of Coonambles elite producing females from the A61 cow family. Muzza has left us a line of sound, well fleshed, docile daughters.

8. ALPINE ELEVATOR CGKM268

FC 5 / RC 5 / FA 5 / RA 5 / RS 5 / RH 5

Along with his full brother Muzza, these two Elevator sons have left an exceptional line of docile females. M268 topped our bull sale in 2018 and produced multiple high priced sons. He breeds big, strong, powerful cattle and his daughters pack plenty of performance.

4.

7.

* Breed average represents the average EBV of all 2024 drop Australian Angus and Angus-influenced seedstock animals analysed in the Mid August 2026 TransTasman Angus Cattle Evaluation

* The percentile band represents the distribution of EBVs across the 2024 drop Australian Angus and Angus-influenced seedstock animals analysed in the Mid August 2026 TransTasman Angus Cattle Evaluation

UNDERSTANDING ESTIMATED BREEDING VALUES (EBVs)

Calving Ease/Birth	CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	CEDtrs	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
	BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
Growth	200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
	400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
	600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
Maternal	MCH	cm	Genetic differences between animals in the height of mature females.	Higher EBVs indicate taller mature females.
	MBC	score	Genetic differences between animals in the body condition of mature females.	Higher EBVs indicate more body condition of mature females.
	MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
	Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
Fertility	DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
	SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
Carcase	CWT	kg	Genetic differences between animals in hot standard carcase weight at 750 days of age.	Higher EBVs indicate heavier carcase weight.
	EMA	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate larger eye muscle area.
	Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more fat.
	P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.	Higher EBVs indicate more fat.
	RBY	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.	Higher EBVs indicate higher yield.
	IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more intramuscular fat.
Feed/Temp.	NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
	Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
Structure	Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate less curl of the claw set.
	Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate more heel depth.
	Leg Angle	score	Genetic differences in rear leg structure when viewed from the side (angle at front of the hock).	Lower EBVs indicate a less angular leg angle.
Selection Index	\$A	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.	Higher selection indexes indicate greater profitability.
	\$D	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade. Steers are either finished using pasture, pasture supplemented by grain, or grain (e.g. 50 -70 days) with steers assumed to be slaughtered at 510kg live weight (280kg carcase weight with 12mm P8 fat depth) at 16 months of age.	Higher selection indexes indicate greater profitability.
	\$GN	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 250 day feedlot finishing period for the grain fed high quality, highly marbled markets. Steers are assumed to be slaughtered at 800 kg live weight (455 kg carcase weight with 30 mm P8 fat depth) at 24 months of age, with a significant premium for steers that exhibit superior marbling.	Higher selection indexes indicate greater profitability.
	\$GS	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers. Steers are assumed to be slaughtered at 650 kg live weight (350 kg carcase weight with 12 mm P8 fat depth) at 22 months of age. Emphasis has been placed on eating quality and tenderness to favour animals that are suited to MSA requirements.	Higher selection indexes indicate greater profitability.

12 SONS KENNY ROGERS

IDENTIFIER:
USA20092065
STATUS:
HBR
BIRTHDATE:
09/01/2021

- 12 decent framed, long, massive Growth sons.
- Kenny Rogers is a standout for producing progeny that stack on kilograms, sitting well inside the top 1% of the breed for all Growth Traits.
- Upon viewing him we knew he was the ideal type to deliver growth, length and frame for those looking to enhance weaner performance and subsequent growth.
- His sire Sydgen Gavel and Grandsire Baldrige Colonel have both been stand out bulls when viewed on

previous trips to the United States, while his dam Foxhovens Kintroy Annie 532 is now an elite donor for Baldrige Angus. So this is a bull in our eyes that has generations of power, performance and elite structure stacked in his pedigree.

- Kenny Rogers combines a breed average Birth Wt, with top 1% for all Growth traits, top 5% Docility, 15% EMA and inside the top 25% of the breed for Claw Set and foot Angle.

10 SONS POSS WINCHESTER

IDENTIFIER:
USA20060473
STATUS:
HBR
BIRTHDATE:
25/01/2021

- 10 long-sided, well-fleshed sons
- Winchester is a massive Growth sire, with great docility, long body and strong head. Upon inspection he exhibited the ideal combination of body mass, length, frame and Growth for our purposes.
- He is a high use AI sire in America with big carcass credentials in the USA's Expected Progeny Difference (EPD) system, sitting top 1% for Carcase Wt, 2% Marbling and 1% Rib Eye Area.
- Winchester's dam, Poss Blueblood 6502 is one of the elite Angus cows

in the USA, producing numerous AI and herd sires, while his sisters are some of the very best females in the Poss herd and are also producing sale toppers.

- There is a very even set of Winchester ET sons out of a wonderful proven cow in N376 and Alpine 38 Special 5021's half sister
- Winchester's Growth EBVs are elite, sitting in the top 1% of the breed, combined with top 15% Docility, 1% Carcase Wt, 10% Eye Muscle Area, 40% Claw Set & 25% Foot Angle.

14 SONS HART NETWORK

IDENTIFIER:
USA20488998
STATUS:
HBR
BIRTHDATE:
11/02/2022

- 14 dense bodied, heavy fleshed sons.
- Network is a heavy fleshed bull, with excellent early growth and a moderate frame and early maturity pattern while still delivering massive Growth potential. His progeny have excellent structure and foot quality, with plenty of body and strong heads.
- His sire Connealy Clarity died young and had limited semen available in the USA and has proven to be elite for combining moderate Birth with massive Growth and body mass.

- We have targeted two of Clarity sons, Network and Poss Winchester to introduce his genetics into our herd.
- Network sits top 1% for 200 and 400 Day Growth, 10% Carcase Wt, 5% Eye Muscle Area and Claw Set and Foot Angle well inside the top 10% of the breed.

5 SONS CONNEALY CRAFTSMAN

IDENTIFIER:
USA20132505
STATUS:
HBR
BIRTHDATE:
13/11/2020

- 5 strong-topped sons.
- Calves are born strong and grow well, with excellent back ends.
- Craftsman topped the 2021 Spring Connealy Angus Bull Sale for an eye watering US\$500,000. He is a square hipped, strong bodied bull with an excellent combination of Growth, Maternal and Structural traits and is amongst the highest Angus Breeding Index bulls in the breed.
- He was the top sire for registrations in the USA for 2024 and leads for 2025 also.

- His sire Sitz Resilient dominated USA sales a few years ago. His dam is by Connealy Niobrara, a bull whose daughters have caught our eye the last couple of visits to Connealys.
- Craftsman is one of the highest breed Index bulls in both Australia and the USA, combining moderate Birth with top 15% 400 Day Wt, moderate Mature Cow Weight, 5% Days to Calving, 12% Eye Muscle area and top 15% for Claw Set & Foot Angle.

ALPINE BLACKBIRD K233^{SV}
ALPINE G194^{PV}

Big, powerful, long made Kenny Rogers son that should punch some decent growth into his calves. Out of a thick made Beast Mode daughter, W121 sits in the top 2% of the breed for 600 Day Wt, top 10% EMA and 1% NFI.

There are many ways to participate in the Alpine Spring Bull Sale.

BACKED BY ALPINE'S COMPREHENSIVE QUALITY ASSURANCE PROGRAM

- Independent structural assessment of sale bulls pre-sale by Ian Moreland from Studcare Genetics.
- Independent semen quality test pre-sale has been conducted by Haydn Shipard.
- Alpine Backup Service (see Catalogue Sale Information)

• PRE-SALE INSPECTION SUNDAY 13 SEPTEMBER

Preview the sale lineup on Sunday 13 September 11am–3pm.

• PREVIEW BY APPOINTMENT

Preview the sale lineup by appointment with Chris Oswin, mobile 0427 562 254.

• ATTEND THE SALE

Attend the sale on 16 September in person – sale bulls will be on display from 10am. Refreshments and beef lunch provided.

• BID ONLINE YOURSELF

Bid online yourself via *AuctionsPlus* – please register as soon as you can to allow enough time to become familiar with how things work! www.auctionsplus.com.au

• BID ONLINE WITH ASSISTANCE

Bid online with assistance from your local agent at their office.

• BID VIA PHONE HOOKUP

To arrange to bid via phone hookup, please contact either Auctioneer Peter Godbolt 0457 591 929 (*Nutrien Stud Stock*) or Selling agents Dan Ivone 0427 480 548 and Hayden Rogers 0428 990 231 (*Nutrien Ivone Agencies*) or Mick Curtis 0428 953 222 and Scott Meehan 0428 952 536 (*Rodwells*)

Staying at the kilnhouses at Alpine Angus is a unique experience where contemporary luxury and design is combined with the stunning beauty of the Ovens Valley landscape in Porepunkah. The three houses – *Cavedon's Kilnhouse*, *Chinaman's Kilnhouse* and *The Sorting Shed* – are each in a separate part of the Alpine Angus stud. Each of the houses have spectacular views of Mount Buffalo, Feathertop and Bogong, with grape vines and – alpine angus cattle.

For bookings or enquiries
www.kilnhouse.com.au or call
Clare Delany 0408 553 332.

KAROO KNOCKOUT K176^{SV}
KAROO JEDDA H213#

Moderate Birth, nicely fleshed Network son out of a very strong damline. Flushed grand dam J050 a couple of times and Karoo Knockout has left us a wonderful line of stout, deep bodied daughters. Combines moderate Birth with top 15% 400 Day Wt, fats around top 10% and decent IMF.

BEEF CLASS STRUCTURAL ASSESSMENT

HOW TO USE THE BEEF CLASS STRUCTURAL ASSESSMENT SYSTEM

Sale bulls have been independently assessed by Ian Moreland.

The Beef Class Assessment System uses a 1–9 scoring system for feet and leg structure;

- A score of 5 is ideal. (Note: Except for Temperament Score where score of 1 is preferable – refer notes below)
- A score of 4 or 6 shows slight variation from ideal, but this includes most animals. An animal scoring 4 or 6 would be acceptable in any breeding program.
- A score of 3 or 7 shows greater variation but would be acceptable in most commercial programs.
- A score of 2 or lower or 8 & higher are low scoring animals and are culled.

Abbreviations:

FC: Front Claw
RC: Rear Claw
FA: Front Foot/Pastern Angle
RA: Rear Foot/Pastern Angle
RS: Rear Leg Side View
RH: Rear leg Hind View

AFTER SALES SERVICE AND MANAGEMENT OF BULLS

BUYING A BULL IS AN INVESTMENT. THIS INVESTMENT SHOULD CONTRIBUTE TO THE GENETICS AND SALE INCOME OF YOUR HERD FOR MANY YEARS. IF YOU ARE TO GET THE MOST FROM YOUR NEW BULL, IT PAYS TO LOOK AFTER HIM WELL, ESPECIALLY IN THE FIRST SEASON OF USE.

OUR QUALITY ASSURANCE

All Sale bulls must complete the following before being deemed suitable to be offered for sale:

- Semen quality test and physical inspection by Haydn Shipard.
- Independent structural assessment by Ian Moreland from Studcare Genetics.
- All bulls sire verified.
- Performance recorded HBR or APR with Angus Breedplan.
- 7 in 1 vaccination (2 initial and then annually).
- Vibrio vaccination (2 initial and then annually).
- Sale bulls drenched just prior to sale day. Please refer to the NVD.
- Pestivirus ear notch test negative PI plus Pestiguard vaccination (2 initial and then annually).

ALPINE AFTER SALES SERVICE

As our Quality Assurance program outlined above demonstrates Alpine Angus have made every effort to ensure Alpine Sale Bulls leave Alpine as fully functional bulls fit and ready to go straight to work!

The sale of a bull we regard as the beginning of a 'relationship' with our clients rather than the end of a 'deal'.

As our many long term clients will attest Alpine Angus have worked hard over 25 years to service our clients however we can – particularly when things go wrong! Depending on the situation and circumstances various solutions may apply including the loan of a bull; a suitable replacement bull or a full or part credit. Our promise is to work with our clients to find the best solution.

***Please contact Alpine Manager Chris Oswin (0427 562 254) if any problems arise as we endeavour to have spare bulls on hand throughout the joining season to assist clients with injury or other issues.**

ARRIVAL OF YOUR NEW BULL

Please bear in mind, when working bulls through the yards, handle them with care.

Preferably work them with other cattle and do not use force. Bulls can become upset and excited in the sale and delivery process. They are subjected to strange yards, different noises, loss of their mates, different people, different handling methods, trucking, unloading, new paddocks and different water and feed. This can upset animals, which are normally very quiet.

When the bull arrives home, unload him at the yards into a group of house cows, steers or herd cows. Never jump the bull from the back of a truck into a paddock. Bulls from different origins should be put into separate yards with other cattle, steers or cows, for company.

Provide hay and water, and then leave the bull alone until the next day.

All bulls should be drenched for worms every six months with a dectin drench.

In addition they may need a drench for fluke if necessary and to be treated for lice. The following annual vaccinations are recommended:

- 7-in-1 vaccine annually.
- vibriosis vaccine annually.
- Pestiguard vaccination annually.

Give particular attention to preventing new bulls bringing vibriosis into a herd. Vibriosis is a sexually transmitted disease that causes infertility and abortions and is most commonly introduced to a clean herd by an infected bull. Vaccinated bulls are free from vibriosis so vaccinating bulls against the disease should be routine practice. All Alpine Angus bulls are vaccinated.

MATING BULLS

For an efficient production system we recommend a 6–8 week joining season.

Newly purchased young bulls should not be multiple joined with older herd bulls. They will not be allowed to work much and in keeping them away from the cows, the older, dominant bull will knock them around.

Use new bulls in either single sire groups or with other young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later.

Ensure all bulls used are in good condition prior to working – condition score 3 is ideal. Remember bulls that are too light or heavy in condition may have problems with libido and semen production.

Yearling bulls are still growing strongly, so tend to be leaner, carrying less body fat reserves. The condition of the yearling bulls is critical. If they drop below condition score 3, sperm production may be impaired.

Service Ability Testing is recommended on all bulls prior to joining.

All working bulls should be tested or checked before joining for physical soundness, testicular tone and serving ability.

All bulls to be used must be free moving, active and in good store condition. Bulls may need supplementary feeding before the joining season to bring them up to condition score 3. The Australian Association of Cattle Veterinarians (AACV) defines a normal, fertile bull as 'expected to get 90% of 50 normal, cycling, disease-free females pregnant within 9 weeks, and 60% of these should become pregnant in the first three weeks of joining'. This expectation would apply to 2-year-old bulls, but not to younger bulls.

DURING MATING

Whilst generally all goes to plan we believe a proactive approach is best to ensure you get the best result.

We strongly recommend that you keep a close eye on the bulls if possible when joining. Even though we have performed a service ability test and had your bulls independently structurally assessed bulls are animals and things can still go wrong. Check bulls at least twice each week during joining. Get up close to them and see each bull walk; check for swellings around the sheath and for lameness.

Watch them work if possible. A significant number of cows or heifers bulling after 6 weeks of joining may indicate there is a problem. Young bulls are particularly vulnerable in their first season. Common problems that can occur are;

- They may not have built up immunity to IBR (the cattle form of herpes – making it painful to insert the penis).
- or may be more prone to a fever event through the stress of working, new surroundings and establishing their rank-ing with other bulls. This can render them temporarily infertile for a six week period.
- Problems such as warts on the penis will mean that the bull will need to be attended to.
- Pay particular attention to any sign of abnormal serving problems like 'cork-screw penis'.
